Bk2

Activity
1  Mental counting to 10
   T asks 10 Ps (by name) to come and stand in a line, all facing in the same direction but sideways on to the rest of the class.
   T gives various items to certain Ps in the line (e.g. a flower, a toy animal, a funny hat to wear, a bag to hold, etc.) Rest of Ps answer questions such as those below by showing number cards.
   • How many children are in the line? Show me . . . now! (10)
   • How many boys (girls) are there?
   • In which position from the front is the person holding the flower (toy animal, etc)?
   • How many Ps are between the person holding the toy animal and the person wearing the funny hat?
   • A, come and point to the 2nd girl from the back. Is A correct? In what position is she from the front?
   • B, come and point to the 3rd boy from the front? Is B correct? In what position is he from the back?

2  Counting and writing numbers to 20
   • Let's count from 0 to 20.
   • Let's do it again in a relay.
   • Let's count from 20 back to 0.
   • Let's do it again in a relay.

Book 2, page 1
Q.1 Read:
   a) Write the numbers from 0 to 20 in increasing order.
   b) Write the numbers from 20 to 0 in decreasing order.

   Make sure Ps know what 'increasing' and 'decreasing' mean.

3  Book 2, page 1
Q.2 Read: Draw as many objects along each line as the number at the beginning.

   You can draw what you like but keep your drawings simple.
   C, tell us what you drew for the number '4'. Is C correct?
   Who drew 4 of the same object? Who drew 4 different objects? Which is correct? (both correct) Similarly for other numbers.

4  Book 2, page 1
Listen carefully and tell me the odd one out:
   a) T: 'pear, strawberry, grape, shell, banana'
      D, what do you think? Why? (e.g. shell – others are fruit) Who agrees?
   b) T: 'dog, giraffe, hen, cow, pig'
      E, what do you think? (e.g. hen – it is the only bird) Who thinks something else? (e.g. giraffe – only wild animal

Q.3 Talk about the pictures first. What are they? (all but one are fruit: the mushroom is the odd one out)
How many are there? (10) Which do you like best (dislike most)?
T (or P) reads questions. Deal with one part at a time.
Review at BB with whole class.

Lesson Plan

Notes
Whole class activity
Involve several Ps by a turn-over of Ps in the line
Note Ps who have difficulty in counting.
In unison
Ask Ps with wrong answer to come out and check.
All done at a good pace
Ps can ask the questions too

Whole class in unison first
Then Ps in relay (or ask a few individual Ps)
At speed
Individual work, monitored
T (or Ps) also writes the numbers on the BB so that Ps can check theirs.

Individual work, closely monitored
Only rough drawings needed
Discussion, checking at BB
Praising

Whole class activity.
T repeats each list slowly
Ask several Ps
Discuss whether choice is correct and reason valid
Discussion using enlarged copy master/OHP (or real fruit)
Individual work, monitored
Discussion, agreement

R: Mental work with numbers to 20
C: Revision: numbers to 20
E: Cardinal and ordinal numbers. Odd, even

### Lesson Plan 2

**R:** Mental counting to 20  
**C:** Numbers to 20  
**E:** Sets, relations

<table>
<thead>
<tr>
<th>Activity</th>
<th>Notes</th>
</tr>
</thead>
</table>
| **1** Numbers and sets  
T holds up a number and chooses a P to read out the number and stick it on the BB. e.g.  
Let's put these number into 2 groups. How could we group them? (e.g. even and odd)  
BB:  
| Whole class activity  
T has cards already prepared. (Use copy master enlarged and cut out.)  
T puts word-cards on BB and Ps come out to put numbers in correct set.  
Class agrees/disagrees  
Ask several Ps |
| What other numbers could go in this set? (T points to each set in turn.)  
How else could we group the numbers? (e.g. 1-digit and 2-digit)  
BB:  
|  |
| What other numbers could go in this set? (T points to each set in turn.) |

<table>
<thead>
<tr>
<th>Book 2, page 2</th>
</tr>
</thead>
</table>
| Q.1 Read: **Draw leaves on the plants according to the signs.** **Write in the numbers.**  
| Individual work, but class kept together  
Discussion, demonstration  
'Leaves' need only be lines.  
BB: 3, 7, 10, 5  
(Or done as whole class activity with Ps coming out to stick leaves (real or cut-out) on drawing on BB or enlarged copy master or OHP) |
| T explains task and revises meaning of inequality signs.  
How many leaves are on the first plant? (3) Will the 2nd plant have more or less leaves? (more) How many more? (4) So how many leaves will you draw on the 2nd plant? (3 + 4 = 7)  
Ps draw leaves and write '7' in plantpot.  
Continue in a similar way for the other plants. |
|  |
| **20 min** |

<table>

| **4** Interlude  
Physical exercises (to music) | 22 min  
Whole class in unison |
| **5**  
*Book 2, page 4*  
Q.3 Read: *Join up the equal amounts*  
Do the numbers 20 and 14 first at BB with the whole class.  
Who can come and point to the picture on the LHS which shows 20 of something? Is he/she correct? Join it up to the number '20'.  
Who can come and point to the picture on the RHS which shows 20 altogether? Is he/she correct? Join it up to the number '20'. Who can come and join up this picture to the correct point on the number line? Is he/she correct?  
Repeat for the number '14' in similar way.  
Ps do remaining numbers as individual work, reviewed at BB with the whole class (or continue as a whole class activity if you think Ps do not understand). | Whole class activity first  
Drawn on BB or use enlarged copy master or OHP  
Encourage the drawing of short, neat joining lines.  
Discussion, agreement  
Praising  
Involve several Ps  
Individual work, monitored  
Discussion, checking  
Self-correction |
| **6** Matching pictures  
a) T writes an addition on the BB (e.g. 4 + 4)  
Who can come and draw a picture to show it? Is he/she correct?  
T repeats for other additions (e.g. 2 + 6, 1 + 7)  
b) T draws something to show an addition on the BB (e.g. 8 squares, 3 of which are coloured in).  
Who can come and write a matching equation? Who thinks something else? | Whole class activity  
Involve several Ps  
Discussion, agreement  
BB: e.g.  
\[
\begin{align*}
\text{\ding{192}} \text{\ding{192}} & = 5 + 3 = 8 \\
\text{\ding{192}} \text{\ding{192}} & = 8 - 3 = 5 \\
\text{\ding{192}} & = 3 + 5 = 8 \\
\text{\ding{192}} & = 8 - 5 = 3
\end{align*}
\] |
| **7**  
*Book 2, page 2*  
Q.4 Read: *There are 3 more chestnuts than acorns. Complete the table.*  
Talk about chestnuts and acorns (show real ones if possible) to make sure Ps know which row is which.  
Review at BB with whole class.  
Who can come and write down the rule? Is he/she correct?  
Who can come and write the rule in a different way? etc.  
(If nobody, T writes them and asks Ps to check them.) | Whole class activity first  
Drawn on BB or use enlarged copy master or OHP  
Individual work  
Discussion, agreement, checking  
BB:  
\[
\begin{align*}
\text{\ding{192}} & < 3 \\
\text{\ding{192}} & = \text{\ding{192}} + 3 \\
\text{\ding{192}} & = \text{\ding{192}} - 3
\end{align*}

### Bk2

#### Activity 6

*Book 2, page 3, Q.4*

Make sure Ps know which are rows and which are columns and to count starting from the LHS.

T (or P) reads each part and Ps come out, first to point to numbers, then, if class agrees, to colour them in.

BB:  
- a) 6, 8 and 10  
- b) 13 and 18  
- c) 9 and 19  
- d) 10, 15 and 20

Who can think of another question to ask about the number grid?

---

#### Activity 7

*Book 2, page 3*

Q.5 Read: *Write down the Roman numerals from 1 to 5.*

Review at BB with whole class. Remind class that $IV = V - I$.

---

#### Activity 8

*Number bonds*

T asks pairs of Ps (one boy, one girl) to stand up. One says a number (e.g. '3') and the other has to complete it to make 11 (e.g. '8').

N.B. If breaktime, this can be a good way for the Ps to leave the class.

---

### Bk2

**R:** Mental counting  
**C:** Addition, subtraction. Problem in context  
**E:** Rules, equations

<table>
<thead>
<tr>
<th>Activity</th>
<th>Notes</th>
</tr>
</thead>
</table>
| **1** **Soft ball play**  
  a) T holds up a number card, e.g. 4 (7, 9, 11, 15) and throws ball to a P. P says the number 3 more (e.g. 7) and throws ball back to T.  
  b) T holds up a number card, e.g. 3 (6, 10, 13, 17) and throws ball to a P. P says the number 2 less (e.g. 1) and throws ball back to T. | Whole class activity  
Ask several Ps  
At speed |
| **2** **Book 2, page 6**  
  Q1 Read: Fill in the missing numbers.  
  Let's see how quickly you can write the answers to these subtractions! Review orally round class. Mistakes corrected at number line.  
  Who can see a connection between parts a) and b)? (Part b) is 10 more than part b). | Individual work, monitored  
Discussion, checking, agreement  
Praising |
| **3** **Book 2, page 6, Q.2**  
  Look carefully at the pictures.  
  Who can tell us a story about the first picture? (e.g. There were 5 ducks swimming on the pond but 3 flew into the air.)  
  A, come and write a subtraction about it. Is A correct? Who can write another subtraction about the picture?  
  Ask Ps to come to BB to write the inverse additions. (Note pattern.)  
  Continue in similar way for the other two pictures. | Whole class activity  
Use enlarged copy master/OHP  
Involve several Ps  
Discussion, agreement  
e.g. BB: 5 – 3 = 2; 2 + 3 = 5  
5 – 2 = 3; 3 + 2 = 5  
Check on number line  
Praising |
| **4** **Book 2, page 6**  
  Q.3 Read: Fill in the missing numbers.  
  Let's see how quickly you can do these. Review orally with the whole class. Mistakes corrected at class number line.  
  Go through the subtractions again orally round the class but this time Ps give reverse subtraction and inverse addition.  
  e.g. BB: 8 – 5 = 3, 8 – 3 = 5; 4 – 3 = 1, 4 – 1 = 3  
  3 + 5 = 8, 5 + 3 = 8  
  1 + 3 = 4, 3 + 1 = 4 | Individual work, monitored  
Discussion, checking, agreement  
T notes Ps having problems  
T demonstrates on BB, pointing out patterns  
Praising |
| **5** **Interlude**  
  Relaxation with music playing | Whole class resting |
| **6** **Book 2, page 6**  
  Q.4 Read: Fill in the missing numbers  
  What is the connection between the equations and the grids? (numbers refer to how many squares are shaded dark/light)  
  Review at BB with whole class. Mistakes corrected.  
  Let's look at the grids again. Can anyone see how the first grid in the top row can help you with the other two grids in the row?  
  B, come and tell us what you think. Who agrees?  
  Who can come and explain how the first grid in the 2nd row helps you with the other two grids? Who agrees? | Whole class discussion first  
Drawn on BB or use enlarged copy master or OHP  
Individual work, monitored  
Agreement, self-correction  
Whole class discussion, checking, agreement  
BB: 4 + 8 = (4 + 6) + 2 = 12  
4 + 9 = (4 + 6) + 3 = 13  
13 – 5 = (13 – 3) – 2 = 8  
13 – 8 = (13 – 3) – 5 = 5 |
**Lesson Plan 6**

**Activity 7**

**Problem solving**

Listen carefully, picture the story in your head and think about what we should do first to solve this problem.

*In a garden there are flowers growing. Some are daisies and some are roses. How many could there be of each type of flower if there are 10 flowers altogether growing in the garden?*

Who can tell us what we should do first? (Draw a table.)

BB:

<p>| | | | | | | | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>

<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

Discuss naming rows D and R (*Daisies* and *Roses*) and that each column should add up to 10. Which number should we start (finish) with? (e.g. the least number of daisies there could be is 0 and the most there could be is 10) Ps come out to fill in missing numbers. Class agrees/disagrees.

Who can come and write the rule? Who can write it in a different way? etc.

- Who can come and point to the column which is correct if there are 2 more roses than daisies? Class agrees/disagrees.

Demonstrate with Ps at front of class if there are difficulties.

---

**8**

**Problem**

Listen carefully and show me the answer with number cards when I say. Use what you like to help you.

*Judy bought 16 tulips. She bought 4 yellow tulips and the rest were red. How many red tulips did Judy buy?*

Show me . . . . now! (12)

C, come and explain to us how you worked out the solution. Who agrees with C? Who did it a different way?

Demonstrate with drawings on BB or with Ps at front of class.

*Answer:* Judy bought 12 red tulips.

---

**Notes**

Whole class activity

Repeat slowly several times (ask Ps to repeat the problem too) to give Ps time to think.

Praising

Drawn on BB or use enlarged copy master or OHP

Whole class discussion. Involve several Ps.

Development of logical thinking.

BB: 

\[ D + R = 10 \]

\[ D = 10 - R \]

\[ R = 10 - D \]

*Check*

BB

\[ D: \ 4 \ 6 + 4 = 10 \]

\[ R: \ 6 \ 6 \ 2 \geq 4 \]

---

Whole class activity

(Drawing, counters, etc.)

T repeats slowly several times or asks Ps to repeat it in unison

BB: 

\[ 16 - 4 = 12 \]

*Check:* \[ 4 + 12 = 16 \]
### Bk2 Lesson Plan 7

**Activity 1**

**Next nearest numbers**

T has BB already prepared (or cards stuck to side of BB):

\[
\begin{align*}
4 &< \square < 6 \\
8 &> \square > 6 \\
13 &< \square < 15 \\
20 &> \square > 18 \\
15 &< \square \square < 19 \\
17 &> \square \square > 14 \\
\end{align*}
\]

Ps come out to write in the missing numbers.

**Notes**

Whole class activity

Drawn on BB or use copy master, enlarged and cut out

If cards used, Ps can choose a card to complete

Class agrees/disagrees

Check on class number line

---

### Activity 2

**Book 2, page 7, Q.1**

**a)** Study this number puzzle carefully. Can anyone work out what the rule might be? (Diagonal pairs of numbers add up to the middle number, 9) Why do you think that? (P comes out to point to the '6 + 3' which equals 9.)

Let's use this rule. Who can come and fill in a missing number? (e.g. 2 + 7) Is he/she correct? Let's check that they add up to 9.

Continue until all numbers are complete.

**b)** As above, but this time the pairs of numbers add up to 14.

Who can come and write in their own pair of numbers? Think of a pair that we have not used yet. (e.g. 12 + 2 or 0 + 14 or 4 + 10)

**Solutions:**

\[
\begin{align*}
a) & \quad 2 & 5 \\
& \quad 4 & 5 & 7 & 3 & 6 \\
& \quad 6 & 0 & 1 & 8 & 9 \\
& \quad 7 & \square & \square & \square & \square \\
\end{align*}
\]

**Notes**

Whole class activity

Drawn on BB or use enlarged copy master or OHP

Praising

Discussion, checking, agreement

Involve several Ps

Discussion, checking, agreement

Give Ps time to think

Praising

Ps also write answers in their books

Develops observational and problem solving ability

---

### Activity 3

**Book 2, page 7**

**Q.2** Read: Draw arrows towards the one which is 2 more.

Write the answer above each sum.

Ask Ps to work out the answers first and write them above the sums. Review at BB with the whole class. Mistakes corrected.

Everyone put your finger on the first sum (LHS) on the top row. A, which picture is 2 more than '6 – 4'? (10 – 6) Is A correct?

Let's all draw an arrow from the '6 – 4' to the '10 – 6'.

T draws first arrow, then Ps can come to BB to draw the other arrows while rest of Ps do the same in their thei books.

**Solution:**

\[
\begin{align*}
\begin{array}{c}
2 \\
6 - 4 \\
10 - 4 \\
10 - 6 \\
12 \\
18 - 6 \\
14 - 8 \\
16 \\
9 + 7 \\
9 + 9 \\
\end{array}
\end{align*}
\]

**Notes**

Individual work at first

Monitored

Drawn on BB or use enlarged copy master or OHP

Discussion, agreement

T notes Ps having difficulty with crossing over tens

Work logically along the top row, then the bottom

Encourage drawing of short, neat arrows

Praising

E: Sharing and remainders
### Lesson Plan 8

#### Activity

**7**  
*Book 2, page 8*

Q.4 Read: *Follow the arrows and write in the missing numbers.*  
Start at the ‘2’ and follow what the arrows tell you.  
Show me with number cards the number you finish on.  
Show me . . . now! (11)  
Ask Ps who have responded incorrectly to go through the additions/subtraction a step at a time on BB or at the class number line.

40 min

#### Notes

- Individual work in writing missing numbers.
- In unison
- Drawn on BB or use enlarged copy master or OHP
- Self-correction

**8**  
*Preparation for division by 2*

T calls 7 Ps to front of class. How can we divide them up into 2 equal groups. (Put one P in LH group and 1 in RH group, then another in LH group and another in RH group, and so on.)  
How many are in each group? (3) How many remain? (1)  
T shows table on BB. E, come and point to the column which shows what we have just done. (BB: \(7 = 3 + 3 + 1\))  
Repeat with 10 Ps at the front of class.

</tbody>
</table>

Who can come and fill in a missing number without us having to demonstrate with Ps? Explain to us how you did it. Who agrees?

45 min

- Whole class activity
- Ask several Ps what they think
- Drawn on BB or use enlarged copy master or OHP
- Preparation for division by 2 with remainder
- Continue demonstrating if necessary
- Ps can use counters (or items from their collection) to help them.
- Discussion, agreement, checking, praising
### Lesson Plan 9

#### Activity 1

**Length and distances**

Talk about how far Ps have to travel to school. Who lives the nearest (farthest away). How do you get to school? (walk, bus, car) Talk about how buses have to stay on set routes (usually main roads) while cars can go down smaller roads and pedestrians can sometimes take shortcuts, so distance between 2 places depends on route taken.

*Book 2, page 9*

**Q.1** Read: *Bunny wants to go home for his tea.*

Which do you think is his shortest route? 

*Colour it red.*

**A.** Which path did you colour red? (e.g. middle one) Why did you choose that one? Who agrees?

T asks **B** to walk from his/her seat to, e.g. the door.

Did **B** take the shortest route possible?

How could **B** have covered a shorter distance? (perhaps by climbing over tables, chairs, etc. or by flying!)

Elicit that the shortest route between 2 points is always a straight line.

Talk about the expression 'as the crow flies', i.e. in a straight line. T draws 2 dots on BB. Who can come and draw the shortest distance between them? Class agrees/disagrees.

**10 min**

#### Activity 2

**Measuring length and distances**

- **a)** I have gathered lots of interesting things on my table. Who can come and choose one which we use to measure length or distances? Class agrees/disagrees and talks about when used. Who can come and find another one? etc.

- **b)** Who can tell me which standard units we use to measure length?

  T writes responses on BB. Class agrees/disagrees.

  Everyone stand up and put your your hands together like this.

  Now move one hand to what you think is 1 metre (10 centimetres, 1 centimetre) away from the other hand.

  T goes round with actual measures and praises those who have estimated closely.

- **c)** How many 1 cm strips (T holds up strip) are equal to 10 cm? (10)

  Let's check. (T demonstrates on BB)

  How many 10 cm strips (T holds up strip) are equal to 1 metre? (10)

  Let's check. (T demonstrates on BB)

  How many 1 cm strips do you think are equal to 1 metre?

  Ask several Ps what they think. (100) (Refer to 0 to 100 number line)

**Extension**

**20 min**

#### Activity 3

**Interlude**

Singing, verse, physical exercises

**22 min**

#### Notes

- Whole class discussion as introduction
- Involve several Ps
- Talk about local area: e.g. going to town (or other well-known area)
- Individual work
- Monitored, helped
- Reasoning, agreement
- Discussion
- Ask several Ps
- **B** can try again by pointing to the door and following an imaginary thread tied tightly from his finger to the door.
- Demonstration. Ask several Ps
- Can use blackboard ruler

- On table (for week’s lessons): e.g. different sizes of rulers, sets of scales, clock, metre rule, thermometer, measuring tape, watch, calibrated jug, etc.
- BB: cm, m, km

- Practice in estimation
- T has strips of card cut to exact lengths: 1 m, 10 cm, 1 cm (or 1 cm plastic cubes stuck together and metre stick, or tape measure)

  **BB:**
  
  - 10 cm = 10 lots of 1 cm
  - 1 m = 10 lots of 10 cm
  - 1 m = 100 lots of 1 cm
  - 1 m = 100 cm

- Whole class in unison

© CIMT, Plymouth University
**Lesson Plan 9**

**Ps have rulers on desks**

T demonstrates on BB using enlarged copy master or OHP for **demonstration only**

Individual work, monitored

Discussion, checking, agreement. T writes agreed answers on copy master.

**BB:**
- A: 5 cm
- B: 11 cm
- C: 6 cm
- D: 4 cm
- E: 9 cm
- F: 6 cm
- G: 7 cm

Discussion, agreement, especially about Pencil F

Demonstrate on class number line if there are problems.

---

**Activity 4**

**Book 2, page 9**

**Q.2**  
(a) Read: *Measure each pencil and write down its length in cm.*

T explains how to use the rulers (place zero on edge of pencil nearest letters, keep ruler straight along middle of pencil, measure to end of point of pencil.) Then write the number of cm in the box beside each pencil.

Continue until all pencils completed.

(b) Read: *Which is the longest pencil?* Ps write in *their* books. (B)

(c) Read: *Which is the shortest pencil?* Ps write in *their* books. (D)

(d) Read: *Which pencils are not longer than Pencil C?* (the 3rd pencil from the top)

Ask several Ps what they think before agreeing on correct answer. (A, D, F)

(e) Read: *Which pencils are not shorter than Pencil C?* (the 3rd pencil from the top)

Ask several Ps what they think before agreeing on correct answer. (B, E, F, G)

---

**Activity 5**

**Book 2, page 9**

**Q.3** Read: *Measure the length of each line segment.*

T explains what a 'line segment' means. (part of a line)

Continue until all segments are completed.

Read: *Draw arrows towards the line which is twice as long.*

Which line segment is shortest? (1 cm) What measurement is twice as long as 1 cm? (2 cm) E, come and point to the line which measures 2 cm. Is E correct? Let's draw an arrow from the 1 cm line segment towards the 2 cm line segment, like this. Deal with others in similar way. Ps can draw arrows on BB too.

**Solution:**

[Diagram: 1 cm, 2 cm, 4 cm, 5 cm, 6 cm]

If I drew the arrows pointing in the opposite direction, what would they mean? (This is half the length of this.)

---

**Activity 6**

**Practice in measuring**

T asks Ps to draw a line measuring 5 cm long at LH side of *their* books and write '5 cm' beneath line. T asks Ps to draw a line 10 cm long at RH side of their books and write '10 cm' below line.

Who can tell me something about the 2 lines? (e.g. 15 cm altogether, 5 cm is half of 10 cm. 10 cm is twice 5 cm, 10 cm is 5 cm more, etc.)

---
### Lesson Plan 10

#### Activity

<table>
<thead>
<tr>
<th>Bk2</th>
<th>R: Standard units of length</th>
<th>C: Measurement: capacity</th>
<th>E: Problem in context</th>
</tr>
</thead>
</table>

#### Oral work

- a) T says lengths of 2 line segments. P says total length of line.  
  e.g. T: 7 cm + 5 cm, P₁: 12 cm; T: 11 m + 3 m, P₂: 13 m; etc.
- b) T says the total length of a line. Ps say the lengths of two line segments which together would make the line.  
  e.g. T: 15 cm, P₁: 5 cm + 10 cm, P₂: 8 cm + 7 cm, etc.

5 min

#### Book 2, page 10

Q.1 Read: Draw arrows towards the container which can hold more.  
Talk about each picture first, what it might hold, e.g. water, milk, beer, honey (liquids) and how much when full (capacity).  
Tell Ps to work methodically, starting with LHS and drawing arrows to/from all the others. Encourage drawing of neat arrows.  
Review at BB with whole class.  

**Solution:**

10 min

#### Measuring capacity

- a) I have gathered lots of interesting things on my table.  
  Who can come and choose one which we could use to measure a certain amount of liquid? Class agrees/disagrees and talks about when it would be used.  
  Who can come and find another one? (T puts choices in a row.)
- b) Who can tell me a standard unit used to measure capacity? (litre)  
  Which of these holds exactly 1 litre? (e.g. bottle, jug)  
  Which of these holds less than (more than) 1 litre?  
  Check by demonstration if class is unsure.

15 min

#### Book 2, page 10

Q.2 T shows a container (transparent if possible) which holds 10 litres and demonstrates the first problem by pouring in 7 litres of water using a litre bottle or jug. Class keeps count. '1 . . . 2 . . . 7 litres'  
How much water do we need to pour in to fill it up? Let's check.  
Class keeps count as T pours in 1 . . . 2 . . . 3 litres.  
Ps do one part at a time. Review at BB with whole class.  
Demonstrate as above or refer to class number line if problems.

20 min

#### Interlude

Song, verse, game, physical exercises

22 min

#### Notes

- Whole class activity
- At speed round class
- Involve several Ps
- Insist on Ps saying units too
- Class agrees/disagrees
- Individual work
- Use enlarged copy master or OHP
- Discussion, agreement
- T demonstrates on BB
- Mistakes discussed with whole class
- Correct solution agreed on
- Point out that the largest (smallest) capacity has every arrow pointing towards (away from) it.
## Lesson Plan 10

### Bk2

#### Activity

**6**

**Book 2, page 10, Q.3**

- T shows two containers, one holding 10 and the other 8 litres.
  - a) Let's start with the 10 litre bucket first.
    - T pours in 4 litres of water while class keeps count. ‘1 . . . 4 litres’
    - How much more water do we need to pour in to fill it up to 10 litres?
    - A, come and write in the missing number and units. Is A correct?
    - Who thinks something else? Let's check (by demonstration or refer to class number line).
    - Continue for rest of part a), using a different P for each equation and only demonstrating if there are problems.
  - b) Repeat above for the 8 litre container.

**32 min**

**7**

**Book 2, page 10**

Q.4 Read: *Each morning, Sally has one glass of orange juice and John has 2 glasses. How many glasses will they each drink over a number of days?*

- Make sure Ps know which row is which.
- Review at BB with whole class. Mistakes corrected by demonstration (e.g. using 2 Ps at front of class with plastic cups) or at class number line.

**40 min**

**8**

**Problem**

- Listen carefully, picture the story in your head and show me the answer with number cards when I say. Use what you like to help you
  - *I filled a 10 litre bucket with water. I use 4 litres to water my plants and another 3 litres to clean out the bird bath. How many litres of water are left in the bucket?*
  - BB:
    - Show me . . . now! (3)
  - B, tell us how you got your answer.
  - Who agrees?
  - Who did it a different way?
  - Let's draw a diagram to help us.

*Answer:* There were 3 litres left in the bucket.

**45 min**

#### Notes

- Whole class activity
  - e.g. buckets
  - Demonstration
  - In unison
  - Written on BB or use enlarged copy master or OHP
  - Discussion, agreement, checking
  - Ps write in *their* books too
  - (Or done as individual work)

- Individual work
  - Monitored, helped
  - Drawn on BB or use enlarged copy master or OHP
  - Discussion, reasoning, checking, agreement

- Whole class activity
  - (Drawing, counters, etc.)
  - T repeats slowly several times or asks Ps to repeat it
  - In unison
  - BB:  
    - $4 + 3 = 7$
    - $10 - 7 = 3$
  - or
    - $10 - 4 - 3 = 3$
  - Only rough drawing needed
  - *Check:* $4 + 3 + 3 = 10$
<table>
<thead>
<tr>
<th>Activity</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1</strong></td>
<td><strong>Lesson Plan</strong></td>
</tr>
<tr>
<td><strong>Mass (weight)</strong></td>
<td><strong>11</strong></td>
</tr>
</tbody>
</table>
| T has a simple balance (or coathanger with transparent plastic bags tied to each side) and a collection of interesting objects (e.g. bottle of nail varnish, lipstick, brightly coloured ball, crayons, beads, plastic dinosaur, toy car, cotton wool balls, book, etc.) Ps come out to front of class, choose 2 items and say which is heavier. Then Ps weigh them on the balance. Elicit that weight can depend on:  
  • size (e.g. book weighed against pencil)  
  • number of objects (e.g. 1 crayon weighed against 6 crayons)  
  • type (density) of material (e.g. rubber ball weighed against cotton wool ball of same size) |
| **5 min** | Whole class activity  
Ps can choose items |
| **2** | Book 2, page 11 |
| Q.1 Read: Which animal weighs more? Write the correct sign between them. | Whole class discussion as introduction  
Use enlarged copy master or OHP  
Involve several Ps  
BB: >, <  
Elephant > monkey < lion > bird  
Discussion, agreement |
| Talk about each picture first. Same number of each, same type of material (bones, muscle, skin), but different sizes.  
Who can come and draw the sign which means 'greater than' (less than)?  
Review with whole class. Who do you think in the classroom is heaviest (lightest)? Why? (biggest, smallest) |
| **12 min** | |
| **3** | Measuring weight (mass) |
| a) Who can come and choose from the table something which we can use to find out exactly how heavy something is?  
When would we use each one? (e.g. cooking, dieting)  
Who can tell us other times when things are weighed? (e.g. shopping, air travel, medicines/pills, cement/gravel/sand, etc.)  
b) Who can tell me a standard unit used to measure weight?  
Which one is the smaller unit? (g) Who can show this on BB?  
If possible, T can show 1 g and 1 kg weights |
| **17 min** | Whole class discussion  
e.g. as in previous lessons but including kitchen and bathroom scales  
Discussion  
Involve several Ps  
BB: kg, g (lb, oz)  
kg > g, g < kg  
Pass round class so that all Ps can hold and compare. |
| **4** | Book 2, page 11 |
| Q.2 Read: Which weighs more?  
Draw arrows towards the heavier item.  
Talk about each picture first: Which is bigger? What might the bottle (carton, bag) hold? Are they empty or full? What size (how thick) is the book? What kind (size) of loaf?  
Let's estimate how heavy they could be.  
A, if both the bottle and the carton are full of milk, come and draw an arrow pointing towards the one which is heavier. Who agrees?  
Continue with other Ps, comparing each pair of items and class agreeing/disagreeing.  
Solution will depend on agreed state of each item, but could be as shown opposite. |
| **23 min** | Whole class activity  
Use enlarged copy master or OHP  
Discussion, agreement  
T can have real items to show and compare  
T helps in drawing of arrows  
Discussion, agreement |

**Bk2 Lesson Plan 12**

**R:** Calculations  
**C:** Measurement: length, capacity, mass  
**E:** Changing measurement units

### Activity 1

**Oral work**  
T says an item. P says a standard unit used to measure it.  
- e.g. T: 'milk,' P: litres (pints); T: 'sugar,' P: kg (lb);  
- T: 'ribbon,' P: m (yards); T: 'sweets,' P: g (oz), etc.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Activity 2

**Book 2, page 12**

Q.1 Read: *Join up the lengths to the corresponding places on the 20 cm stick.*

- Talk about the stick first. What is missing from it? (numbers)  
- What length does each white and black section show? (2 cm)  
- Explain that it is like jumping 2 at a time along a number line.  
- Ps write in '0' at LHS of stick and '20' at RHS of stick in their books.  
- Where would 1 cm (5 cm) be? (Ps come out to model to point.)  
- Elicit that even numbers will be at the intersections of light/dark segments, while odd numbers will be in the middle of each segment.

First Ps work out answers and write above elipses. Review.  
- T (or P) demonstrates first joining line, then Ps do the rest in their books. Review at BB with whole class.  
- (Or continue as a whole class activity if there are problems.)

**Solution:**

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Activity 3

**Book 2, page 12, Q.2**

Read: *Write an addition for the total amount of apples in each pair of baskets.*

- Deal with one part at a time. Revise how many in a 'pair.'  
- Ps come to BB to point to baskets being dealt with and to write in an addition. Who agrees/disagrees?

Have we dealt with all the possible pairs? Are there any pairs we have not added together yet?  
- (1st and 3rd: 4 kg + 3 kg = 7 kg; 2nd and 3rd: 6 kg + 3 kg = 9 kg)

### Activity 4

**Interlude**

Relaxation with music playing

---

**Notes**

- Whole class activity  
- Involve several Ps  
- At speed  
- Discuss non-metric units too

- Whole class discussion to start  
- T has a real 20 cm stick divided into 2 cm lengths, or drawn on BB, or use enlarged copy master or OHP

- Discussion, agreement

- Individual work, monitored, helped

- Demonstration

- Discussion, checking, agreement

**Note:**

A numberless stick like this can be used for any start and finish number and is good for mental practice.  
- e.g. 0–10, 0–100, 15–65, etc.

- Whole class activity  
- Revision of how many in a pair  
- Use enlarged copy master/OHP  
- Checking, agreement

- BB: a) 4 kg + 6 kg = 10 kg  
  b) 6 kg + 10 kg = 16 kg  
  c) 3 kg + 10 kg = 13 kg  
  d) 4 kg + 10 kg = 14 kg  
- Praising if Ps point them out

- Whole class resting

### Lesson Plan 13

#### Activity

<table>
<thead>
<tr>
<th>No.</th>
<th>Activity</th>
<th>Notes</th>
</tr>
</thead>
</table>
| 1   | Soft ball play  
   T throws ball to P saying an addition or subtraction. P throws ball back saying answer. (e.g. 4 + 3, 9 – 6, 14 – 3, etc.) | 5 min |
| 2   | Book 2, page 13  
   Q.1 Read: Colour the small rectangles according to their answers. 
   T explains key. A, what is the answer to the 1st rectangle on the left in the top row? (11) So what colour will you use? (red) 
   Review at BB with whole class. Mistakes corrected at class number line. | 13 min |
| 3   | Book 2, page 13  
   Q.2 Read: Complete the table. 
   Write down the rule in different ways. 
   Study the table carefully and think what the rule might be. B, what do you think the rule is? Is he/she correct? 
   Come and write it on the BB. (e.g.  a + b + c = 10) 
   Let’s use this rule to complete the table. 
   Review at BB with whole class. Mistakes corrected. 
   Who can come and write the rule in a different way? 
   Who agrees? Who thinks something else? etc. 
   Try to cover all possible variations in a logical manner. | 20 min |
| 4   | Interlude  
   Action song | |
| 5   | Logic set (20 elements)  
   First T shows Ps how to lay out set logically on desks. (5 columns of circles, triangles, squares, pentagons and hexagons; each column with 4 kinds: small white, large white, small black, large black (20 in all) 
   BB:  
   Ps come out to point to rows/columns which contain, e.g.  
   - circles (4)  
   - hexagons (4)  
   - large white shapes (5)  
   - small black shapes (5)  
   T holds up a shape. Ps hold up same one on command. 
   Who can tell us all about it? (e.g. small black triangle, 3 sides, large white square, 4 sides; large black hexagon, 6 sides, etc.) 
   Ps encouraged to pack away shape cards in order, so that they will be easier to lay out next time. | 32 min |
### Activity 6

**Book 2, page 13**

Q.3  Read: *Continue the colouring and shape pattern.*

Ps first colour in the shapes as instructed (R: red, B: blue, etc.)
Ps continue the pattern. You can turn the corner and go down the side of your book if you want.

Deal with one part at a time. Review orally with whole class.

T asks everyone to try to memorise the sequence of shapes and colours. T asks 4 Ps to come to front and stand in a line facing the class. You are the shapes in the pattern. Look where you are in the line and work out what shape/colour you should be.

T: Step forward (turn around, sit down, etc.) if you are a circle (blue, a triangle, etc). The rest of the class must make sure they are correct!

More Ps can be added or new Ps take the place of original line.

---

### Extension

**Book 2, page 13, Q.4**

What do you think the answers might be to these sums?

T writes each on BB. Ps come out to complete, explaining solution. Who disagrees? Why? etc.

**Solutions:**

- **a)** $X + V + I = XVII$
- **b)** $X + V - 1 = XIV$
- **c)** $XX - X = X$
- **d)** $I + I = IV$
- **e)** $I + I + I = VI$
- **f)** $I + I + I + I = VIII$
- **g)** $I + I + I = VI$
- **h)** $I + I + I + I = IX$
- **i)** $I + I + I + I + I = XII$

---

### Notes

Individual work
Monitored, helped
Discussion, agreement about the rule:
BB:
- a) circles: 1st, 4th, 7th, ...
- b) triangles: 2nd, 5th, 8th, ...
- c) squares: 3rd, 6th, 9th, ...

Develops understanding and forward thinking

Ps can give instructions too

Involve several Ps

---

| **Activity** | **Notes** |
| 1 | Individual work, monitored, helped |
| **Addition/subtraction relay** | Discussion, agreement |
| T says an addition or subtraction and touches a P. The P says answer then touches another P saying a different addition/subtraction. | Discussion, agreement |
| | In unison |
| | Individual (paired) work, monitored, helped |
| | Repeat slowly. Ps nod heads when they have done each one |
| | Reasoning, agreement |
| | Praising |
| **Whole class activity** | **Notes** |
| Many Ps involved | Praising for difficult questions posed or answered |

| **2** | Individual work, monitored, helped |
| **Logic set** | Discussion, agreement |
| Ps lay out in order on desks (as in previous lesson). | Discussion, agreement |
| | In unison |
| | Individual (paired) work, monitored, helped |
| | Repeat slowly. Ps nod heads when they have done each one |
| | Reasoning, agreement |
| | Praising |
| **Whole class in unison** | **Notes** |
| Many Ps involved | Praising for difficult questions posed or answered |

| **3** | Whole class introduction |
| **Book 2, page 14** | Demonstration |
| Q.1 Make sure Ps know what 'straight' and 'curved' mean. | P uses BB ruler (with T’s help) |
| T draws 2 large dots on BB. A, come and draw a straight line between them. Is A correct? (Refer to earlier lesson about straight line being the shortest distance between 2 points.) | Discussion, agreement |
| B, come and draw a curved (not straight) line between the 2 points. Is B correct? Who can come and draw another curved line? | Note that many curved lines are possible but only 1 straight line |
| Read: Draw over the straight lines in blue and the curved lines in red. Colour the shape in blue if all its edges are straight lines. | Individual work, monitored |
| C, how many shapes did you colour blue? (5) | Drawn on BB or use enlarged copy master or OHP |
| Come and point to them. Who agrees/disagrees? | Checking, agreement |
| Now colour the shapes in red which have only curved edges. | Talk about each shape (name, number of edges) |
| D, how many shapes did you colour red? (3) | Discussion, agreement |
| Come and point to them. Who agrees/disagrees? | |
| How many shapes are not coloured in? (2) How many straight (curved) edges does each have? What does it look like? | |
| **Whole class in unison** | **Notes** |
| Many Ps involved | Praising for difficult questions posed or answered |

| **4** | Individual work |
| **Interlude** | Monitored, helped |
| Song or rhyme | Class repeats name of each shape in unison |
| | (Mention 'regular' shapes) |

<p>| <strong>5</strong> | Individual work |
| <strong>Book 2, page 14</strong> | Monitored, helped |
| Q.2 Read: Complete the drawings. | Class repeats name of each shape in unison |
| First talk about each shape. What is it called? How many sides (edges) should it have? How many are missing? | (Mention 'regular' shapes) |
| What kind of lines should we draw? (straight) Point out that the lines do not necessarily need to be all the same length. | Praise creativity |</p>

<tr>
<td>Stand up if you have brought some fruit in your packed lunch today.</td>
<td>Tally chart</td>
</tr>
</tbody>
</table>
| E, what kind did you bring? (e.g. A says ‘apple’) | BB:  
| T draws an apple on the BB and a vertical line beside it. This line counts as A’s apple. | ![Tally chart example]|
| Continue asking Ps what they brought and drawing lines and new fruit as necessary until a particular fruit gets to the 5th P. T shows how to draw a diagonal line across the 4 already there to make counting in 5’s easier. This is called a Tally Chart. (T writes on BB and Ps repeat it.) | Use enlarged copy master or OHP |
| Q.4 Read: *These were the fruit that 25 children in a class brought for their lunch.* | Individual work |
| Make a tally chart by crossing out (or colouring in) a fruit and drawing a vertical line beside the fruit on the RHS. Remember that every 5th line should be drawn diagonally through the other 4 lines. | Monitored, helped |
| Review at BB with whole class. Mistakes corrected. | BB:  
| When tally chart is complete, T (or Ps) reads out one question at a time and Ps write answer in their books. | 5 + 5 = 10  
| a) and b) can also be shown with number cards. Ps come out to write additions on BB as a check. | 5 + 1 = 6  
| c) and d) Discuss what ‘most popular’ and ‘least popular’ means. | 4  
| e) Give Ps time to think about how to do it. | In unison |
| Show me with number cards . . . now! (e.g. 5) | BB:  
| X, come and explain to us how you got the answer. | 10 + 6 + 4 = 20  
| Is he/she correct? Who thinks something else? | 25 – 20 = 5  
| Could the answer be wrong? (Yes; some Ps could have brought more than one piece of fruit.) | Praising |
| Carry out the same exercise using real class data. | Or collect data from other classes |

---

Discussion  
Praising if P thinks of it  
P monitors with T  

**3** | **Logic set**  
Group the shapes in your set:  
a) by size (2 groups: 10 large, 10 white)  
b) by colour (2 groups: 10 white, 10 black)  
c) by shape (5 groups: 4 circles, triangles, squares, pentagons, hexagons)  
Who can think of another way to group them? (e.g. straight edges [polygons] and curved edges [circles] )  
Let's all try it.  

**Extension**  
Individual (or paired) work  
Monitored  
Discussion, checking after each part  
Praising if P thinks of it  
P monitors with T  

**4** | **Interlude**  
Action song  

**Extension**  
Whole class in unison  

**5** | **Book 2, page 16**  
Q.2 Read: *Colour similar pairs of shapes in the same colour.*  
Make each pair of shapes a different colour from the other pairs.  
Review at BB with the whole class. Ps come to BB to point to pairs and to say something about each pair. (e.g. name, number of edges, straight or curved).  

**Extension**  
Individual work  
Monitored  
Drawn on BB or use enlarged copy master or OHP  
Discussion, agreement  

**6** | **Book 2, page 16, Q.3**  
This activity is best done first on loose sheets of paper, or Ps can be given several of the shapes to fold or cut out, so that it does not matter if they make a mistake.  
Then Ps can draw their solutions in their their books.  
Review with whole class, with Ps demonstrating on a real shape and then marking it up on the BB.  

(A possible solution is shown opposite but there are others.)  

**Extension**  
Individual (or paired) work  
Monitored closely  
Use copy master, enlarged and cut out  
BB: e.g.  
triangle  
quadrilateral  
pentagon

### Activity 1

#### Number sets

T gives number cards to some Ps, e.g. 7, 20, 17, 2, 9, 14, 6, 0, 11, 5.  
T tells Ps to stand in order facing the class (zero on the left).  
Let’s all read out the numbers in increasing order. ‘0, 2, 5,...’  
Now let’s read out the numbers in decreasing order. ‘20, 17,...’  
How can we put these numbers into 2 groups? (e.g. odd/even)  
P comes out to rearrange the numbers into odd and even groups.  
Is he/she correct? Who can think of another way? (e.g. 1-digit / 2-digit)  
Numbers are rearranged again to fit new criteria.

| Bk2 5 | **Book 2, page 17, Q.3**  
X, come and put your finger on the zero on the class number line. You are going to jump along the the number line 2 at a time and the class will shout out the number you land on each time.  
T writes the number in the correct column in the table on the BB.  
T stops X after the 11th jump. Who knows what the last column will be before X has jumped? (12th jump: 24)  
T covers up table. Where did X get to after the 2nd (4th, 7th, 9th) jump? (4, 8, 14, 18)  
Can anyone notice something about the table? (Numbers on bottom row are twice the numbers on the top row.)  
(Or done as individual work, with Ps using their 0–20 number lines) |
| **35 min** | Whole class activity  
In unison  
Drawn on BB or use enlarged copy master  
Praising  
Ask several Ps  
Discussion, agreement, Praising |
| Bk2 6 | **Pairs**  
Listen carefully and show me the answer with number cards when I say.  
*Granny is counting all the gloves she has.*  
a) *How many gloves does she have if she has 4 pairs?*  
Show me . . . now! (8)  
Repeat for 5 (10, 7) pairs.  
Elicit that the number of gloves is '2 times' (‘twice’, 'double') the number of pairs.  
b) *How many pairs does she have if she has 2 gloves?*  
Show me . . . now! (1)  
Repeat for 6 (12, 18) gloves.  
Elicit that the number of pairs is 'half' the number of gloves. |
| **40 min** | Whole class activity  
In unison  
Praising  
Discussion, agreement  
In unison  
Discussion, agreement  
Demonstration if necessary |
| Bk2 7 | **Book 2, page 17**  
Q.4 Read: *Sue threw the ball 8 m. Joe threw it 2 times as far. How many metres did Joe throw the ball?*  
Review at BB with whole class, with Ps coming out to draw lines to show Sue’s and then Joe’s throws and then writing an addition about Joe’s throw on the BB.  
T elicits that:  
• 2 times 8 metres is 16 metres  
• half of 16 metres is 8 metres. |
| **45 min** | Individual work to start  
Discussion, agreement  
BB:  
*Sue:* 8 m  
*Joe:* 8 m + 8 m = 16 m  
or 2 times 8 m = 16 m |
### Bk2 Lesson Plan 18

#### Activity 1

**Mental counting**

a) T asks 3 Ps to stand at the front of the class and gives each of them 2 (e.g. flags) to hold, one in each hand.

How many flags are the Ps holding altogether? (6)

Who can come and write an addition about it? Who agrees?

We could also write it as a multiplication (BB) by saying there are 3 times 2 flags which equals 6 flags. (BB)

We could write an addition and multiplication in another way.

T tells the 3 Ps to hold up their right hands. How many flags are being held up? (3) How many are being held down? (3)

Who can come and write an addition about it? (BB)

Who can come and write a multiplication about it?

b) Imagine there are 5 Ps standing in the row, holding a flag in each hand.

Who can come and write an addition about it? (BB)

Who can come and write it as a multiplication? (BB)

Let's imagine that they all hold up the flags in their right hands. How many flags will be held up (down)? (5, 5)

Who can come and write an addition about it? (BB)

Who can come and write it as a multiplication? (BB)

Let's check that they are correct (Another 2 Ps come to join the line and the T gives them each 2 flags.) T goes through equations.

c) The 5 Ps are replaced by another 4 Ps and the T gives them each 3 pencils to hold

How many pencils do they have altogether? (12)

Who can come and write an addition about it? (BB)

Who can come and write it as a multiplication? (BB)

We could write another addition and multiplication about how many pencils there are altogether

T tells each P in row to put one pencil behind their ear and to hold one pencil in each hand. How many pencils are behind ears? (4)

How many pencils are in left (right) hands? (4, 4)

Who can come and write an addition about it? (BB) Who agrees?

Who can come and write it as a multiplication? (BB) Who agrees?

---

#### Notes

- **Whole class activity**
- (to demonstrate multiplication by a positive integer)

- BB: addition: $2 + 2 + 2 + 2 = 8$
  multiplication: $3 \times 2 = 6$

- BB: addition: $3 + 3 + 3 + 3 = 12$
  multiplication: $4 \times 3 = 12$

- BB: addition: $5 + 5 + 5 = 15$
  multiplication: $2 \times 5 = 10$

- BB: addition: $2 + 2 + 2 + 2 + 2 = 10$
  multiplication: $5 \times 2 = 10$

- addition: $5 + 5 = 10$
  multiplication: $2 \times 5 = 10$

- Demonstration, checking

---

#### Book 2, page 18

Q.1 Read: Write an addition and multiplication about each picture.

T requests that the addition should be written in the top box and the multiplication in the lower box.

Deal with one part at a time. Review at BB with whole class.

Ps come out to explain reasoning behind their equations.

Does anyone notice a connection between parts b) and c)?

(The total number of elements in each are equal.)

$3 + 3 + 3 + 3 = 5 + 5 + 5 = 5 \times 3 = 3 \times 5 = 15$

---

#### Interlude

Song, verse or physical exercises

---
Lesson Plan 18

Activity

4 Book 2, page 18
Q.2 Read: The length of a pink strip is 2 cm. What is the length of 6 pink strips?
Ps have on desks either six 2 cm strips cut from coloured card, or cuisenaire rods. They check the length of 1 strip (rod) with a ruler, then put the 6 strips(ods) together in a long line
and/or
Ps colour the single pink strip in their books and check its length. Then they colour pink each of the 6 strips.
Ps then complete the addition and multiplication.
Review at BB with whole class. Mistakes corrected.
T demonstrates with strips stuck to BB if there are problems.
23 min

5 Book 2, page 18
Q.3 Read: The length of a violet strip is 6 cm. What is the length of 2 violet strips?
Ps have on desks either two 6 cm strips cut from coloured card, or cuisenaire rods. They check the length of 1 strip (rod) with a ruler, then put the 2 strips(ods) together in a long line.
and/or
Ps colour the single violet strip in their books and check its length. Then they colour violet each of the 2 strips.
Ps then complete the addition and multiplication.
Review at BB with whole class. Mistakes corrected.
Can anyone see a connection Q.3 and Q.4? (The total lengths are equal, i.e. 6 times 2 cm = 2 times 6 cm = 12 cm)
29 min

6 Drawing Lines
T demonstrates on BB with BB ruler how to draw accurately a line of a certain length.
a) Ps draw a line of 10 cm (using rulers) on a sheet of paper and write the length beneath it.
Ps then draw over one half of the line in red. T writes on BB:
'one half of 10 cm = cm'
Ps copy it beneath their line, and fill in the missing length.
b) Ps draw a line of 3 cm and write the length beneath it.
Ps then extend the line to 2 times its length. T writes on BB:
'2 times 3 cm = cm'
Ps copy it beneath their line, and fill in the missing length.
Review as in part a).
40 min

7 Mental practice
a) T says a number, e.g. '4', P says 2 times that number, e.g. '8'.
b) T says a number, e.g. '10', P says half that number, e.g. "5".
45 min

Notes
Individual work
Monitored, helped
Manipulation with rods/rips
Discussion
Agreement, checking
BB: 2 cm + 2 cm + 2 cm + 2 cm + 2 cm + 2 cm = 12 cm
6 times 2 cm = 12 cm
Individual work
Monitored, helped
Use blue if no violet
Manipulation with rods/rips
Discussion
Agreement, checking
BB: 6 cm + 6 cm = 12 cm
2 times 6 cm = 12 cm
Discussion
Praising
Ps need pencils (1 black and 1 coloured) with sharp points, rulers and sheets of paper.
T demonstrates first
BB:

\[ \begin{array}{c}
\text{10 cm} \\
\text{one half of 10 cm} = \boxed{5} \text{ cm}
\end{array} \]

BB:

\[ \begin{array}{c}
\text{3 cm} \\
\text{2 times 3 cm} = \boxed{6} \text{ cm'}
\end{array} \]

N.B. Similar exercises are on Book 2, page 25, Q.3 and 4

Whole class activity
Involve several Ps
Demonstration with Ps if needed

© CIMT, Plymouth University
Activity

1. **Addition and multiplication**
   Listen carefully and picture the story in your head. Think of an addition and a multiplication which describe the story.
   a) *There are 4 plates on the table and 4 apples on each plate.*
      How many apples are on the table altogether?
      Who can tell me an addition about it? \((4 + 4 + 4 + 4 = 16)\)
      Who can tell me a multiplication about it? \((4 \times 4 = 16)\)
   
   Repeat above but with:
   b) 2 plates, each with 6 apples \((6 + 6 = 12, \ 2 \times 6 = 12)\)
   c) 3 plates each with 7 apples \((7 + 7 + 7 = 21, \ 3 \times 7 = 21)\)

2. **Book 2, page 19**
   Q.1 Read: **Write additions and multiplications about the picture.**
   a) Let's all look carefully at the picture.
      Who can tell me something about it? (e.g. 15 triangles, 3 rows, 5 in each row)
      A, come and write and addition about it. Is A correct?
      Who thinks something else?
      Who can write a multiplication which matches A's addition?
      Can anyone write another addition about the picture?
      Who can come and write a matching multiplication?
   
   b) Let's see if you can do the same with the picture in part b) in your books.
   Review at BB with whole class. Ps come out to explain solutions. Class agrees/disagrees.

3. **Dominoes**
   If possible, Ps have a set of dominoes on desks. Ps find dominoes which have the same number of dots on each half and hold them up.
   (If not possible, Ps come out to choose from T’s set.)
   T asks several Ps with correct dominoes to say an addition and a multiplication about their dominoes (e.g. \(3 + 3 = 6\) and to write them on the BB. Class agrees/disagrees.

   **Book 2, page 19**
   Q.2 Read: **Complete the dominoes so that both halves are equal. Write in the missing numbers.**
   Deal with one part at a time. Review at BB with whole class.

4. **Interlude**
   Relaxation

---

**Lesson Plan 19**

**Notes**

- Whole class activity
  - Done mentally/orally
  - (Do not write on BB)
  - Ps give the equations in words only
  - Agreeing, checking
  - Praising

- Whole class activity to start
  - Drawn on BB or use enlarged copy master or OHP
  - Ps write in their books too
  - Discussion, agreement
  - BB:
    a) \(5 + 5 + 5 = 15\)
    \(3 \times 5 = 15\)
    \(3 + 3 + 3 + 3 = 15\)
    \(5 \times 3 = 15\)
    b) \(8 + 8 = 16\)
    \(2 \times 8 = 16\)
    \(2 + 2 + 2 + 2 + 2 + 2 + 2 = 16\)
    \(8 \times 2 = 16\)

- Whole class introduction
  - If no set of dominoes, make T set on card from blank dominoes on copy master in Y1 LP 50 and stick to side of BB for Ps to choose
  - Discussion, agreement
  - Individual work, monitored
  - Drawn on BB or use enlarged copy master or OHP
  - Discussion, agreement

- Whole class resting, with music playing

© CIMT, Plymouth University
Lesson Plan 19

Notes
Paired work, monitored, helped
(1 takes away, 1 writes)

BB:
20 = 6 times 3 + 2
Discussion, agreement

BB: 13 – 3 – 3 – 3 = 1
13 = 4 times 3 + 1
Discussion, agreement

BB: 9 – 3 – 3 – 3 = 0
9 = 3 times 3
Discussion, agreement

Extension

Book 2, page 19

Q.3 Read:
Share 12 carrots equally among 4 rabbits.
Continue the drawing.

T explains task and Ps join up the carrots to the rabbits and fill in the missing numbers.
Read: How many carrots does each rabbit get?
Show me with a number card . . . now! (3)
X, come and explain to us how you got your answer.
Who agrees? Who thinks something else?
If there are problems, demonstrate with cut-out rabbits and carrots (or Ps and pencils).

How many times could we take away 4 carrots from 12 carrots?
Show me with a number card . . . now! (3)
Y, come and explain how you worked out the answer.
Who agrees? (Ps can cross out the carrots in their their books and draw a ring around every 4 carrots.)

Problem

Listen carefully, picture the story in your head and show me the answer with number cards when I say.
Ann is saving up for her holiday. Each day she puts two £1 coins into her piggy bank. How many £’s has she saved after one week?

Show me with number cards . . . now! (14)
T (or P with correct answer) explains method of solution:
BB: Each day: £ 2 1 week = 7 days
7 times £ 2 = £ 14

Answer: Ann has saved £14 after one week.
Activity

1 Mental practice (relay)
   T says an addition to P1. P1 gives answer and says a subtraction to P2, etc. (T intervenes occasionally if more variety needed.)

   5 min

2 Book 2, page 20
   Q.1 Read: Fill in the missing numbers.
   Let's see how quickly you can do them! (The first 4 questions in each column do not involve crossing tens.)
   Deal with one column at a time. Review orally with whole class. How many sums are there altogether? (24: 8 in each of the 3 columns, i.e. 3 times 8 = 24)
   Who had no (1, 2, 3, more than 3) mistakes?
   Mistakes corrected at class number line.

   18 min

3 Book 2, page 20
   Q.2 Read: Write an addition and a multiplication about each picture.
   a) What can you see in the picture? (e.g. 3 strings of beads, 5 beads on each string)
   A, come and write an addition about it. Is A correct?
   Who can come and write a matching multiplication?
   (If P writes ‘5 times 3’ point out that it does not match the picture.)
   b) Repeat as above. (2 bunches of balloons, 6 balloons in each)
   If T thinks Ps understand, c) and d) can be done as individual work, reviewed at BB with whole class.
   (Encourage Ps to write small as there is not much room!)

   25 min

4 Interlude
   Song, verse or physical exercises

   26 min

5 Book 2, page 20, Q.3
   T explains task. Talk about the animals in the table. Which do you think can jump the farthest? Why?
   Ps come out to choose an animal and show its jumps on the number line, e.g. Fox: P points to 10 on the number line. This is how far Fox jumped after 2 jumps. How far would he have got after 1 jump?
   P points to 5 and writes ‘5’ in the table, giving his reasoning. Who agrees? Who thinks something else? etc.
   Continue until all the blanks are completed.
   Ask Ps to compare the jumps orally, using words such as: 'double', 'twice', '2 times', 'half', e.g. 'frog's jumps are twice as long as squirrel's'
   Solution:
<table>
<thead>
<tr>
<th>Animal</th>
<th>After 1 jump</th>
<th>After 2 jumps</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fox</td>
<td>0 1 3 4 6 5 9</td>
<td>0 2 6 8 12 10 18</td>
</tr>
</tbody>
</table>

   32 min
## Lesson Plan 20

### Activity

**Sharing between 2**

T has a box of, e.g. marbles (or beads or cubes, or sweets, etc.).

- **a)** T asks B to come out and count out 8 of them. B chooses another P to share his marbles. How many will they each get if they both have the same number of marbles?
  - How can we do it? (1 to 1 correspondence, or sharing 8 into 2 equal groups)
  - T: 2 times how many will equal 8? (BB) B writes '4' in the box.

- **b)** Repeat as above for 16 marbles.

### Notes

- Whole class activity
- Discussion, demonstration, agreement

### Extension

**Problem**

Listen carefully, picture the story in your head and show me the answer with number cards when I say.

- **a)** Mum puts 4 cakes on each plate. There are 5 plates.
  - How many cakes are there altogether?
  - Ps can make a drawing or use counters, etc.
  - Show me with number cards . . . now! (20)
  - T (or P with correct answer) explains method of solution:
  - BB: Each plate: 4 cakes  5 plates: 4 + 4 + 4 + 4 = 20 cakes
  - (or a drawing)  5 times 4 = 20
  - Answer: There are 20 cakes altogether.

- **b)** Mum broke a plate and now has only 4 plates. She shares the cakes equally among the 4 plates. How many cakes are on each plate now?
  - Ps make a drawing, or use 20 counters, etc.
  - T (or P with correct answer) demonstrates method of solution:
  - BB: 20 cakes: 
  - 4 plates: 
  - or 4 times 5 = 20

**Answer:** If 20 cakes are shared equally among 4 plates, there will be 5 cakes on each plate.

### Notes

- Whole class activity
- T (or Ps) repeat problem
- Give Ps time to think/ try out
- In unison
- Discussion, demonstration, agreement
- T repeats problem
- Individual (or paired) work, monitored, helped
- Give Ps time to think/ try out
- Whole class discussion, demonstration, agreement
- Ps come to BB to draw a cake in a plate and cross it off, or (very difficult!) beginnings of division
- Praising
### Bk2

**R:** 1-digit and 2-digit numbers  
**C:** Extending the number line to 100. Reading 2-digit numbers  
**E:** Writing 2-digit numbers on the number line

<table>
<thead>
<tr>
<th>Activity</th>
<th>Notes</th>
</tr>
</thead>
</table>
| **1** | **Lesson Plan**  
**Counting**  
a) Let's start at zero and count aloud to 30. (Ps may use their 0–100 number line to help them.) (0, 1, 2, . . ., 29, 30)  
b) Let's start at 20 and count aloud to 50. (20, 21, 22, . . ., 49, 50)  
c) Let's say the whole tens aloud to 100. (10, 20, 30, . . ., 90, 100) |
| **8 min** | Whole class in unison (slowly)  
T points to numbers on the class number line|
| **2** | **Equal amounts**  
T has flash cards (numbers, multiplications and and pictures) stuck to BB at random. Ps come out to choose 3 (or in some cases 2) cards which show equal amounts and stick them in order across the BB. Class agrees or disagrees. Continue until all cards are used.  
Let's read out the tens (multiplications) together. |
| **16 min** | Whole class activity  
Use copy master, enlarged and cut out (or as OHP to join up)  
Involve several Ps  
Discussion, agreement  
In unison|
| **3** | **Book 2, page 21**  
**Q.1 Read:** Fill in the missing numbers.  
T explains that the numbers start at 0 (top right-hand corner) and should be written in increasing order from left to right. At the end of a line, the numbers continue on to the beginning of the next line.  
Let's all do one row at a time together. (T writes on BB and Ps write in their books.) Ps say each row aloud when complete.  
- What do you notice about the numbers in the first column? (all whole tens, i.e. units digit is zero)  
- What do you notice about the 2nd (3rd, etc,) columns? (units digits are the same; all even, all odd)  
- Who can come and point to numbers which have: equal digits (both digits odd, both digits even)?  
- How can you tell whether a 2-digit number is even or odd? (If the units digit is even, the whole number is even; if the units digit is odd, the whole number is odd)  
- Let's read all the numbers from 0 to 100 in increasing (decreasing) order. |
| **30 min** | Whole class activity  
Use enlarged copy master or OHP  
Or a different P comes out to write the numbers in each row  
Discussion, agreement  
Ps also show position of numbers on class number line  
Ps can ask questions too or talk about 2-digit numbers which mean something to them, e.g. house number, birthday, lucky numbers, lottey, etc.  
In unison|
| **4** | **Interlude**  
Relaxing |
| **32 min** | Whole class resting, with music playing|
| **5** | **Book 2, page 21**  
**Q.2 Read:** Write the missing numbers below each segment of the number line.  
T first reminds Ps what a 'line segment' is (part of a line)  
Deal with one part at a time. Ps can show where each segment is on the the class number line.  
Review at BB with whole class. Talk about tens and units and what they mean, e.g. 28 is 2 tens and 8 units (ones). Show with 2 bundles of 10 straws (lolly sticks, strings of 10 beads) and 8 single ones.  
- Draw a circle around all the whole tens  
- Who can find these numbers on the number square? |
| **38 min** | Whole class introduction  
Drawn on BB or use enlarged copy master of OHP  
Individual work, closely monitored, helped  
Discussion, demonstration (prepared beforehand)  
P to BB and Ps in their books too  
Praising |
**Activity 6**

*Book 2, page 21, Q3*

Let's read aloud the whole tens on this number line. (BB)

T explains that each 'tick' shows the position of a number (0 to 100), but there is no room to write the digits.

Who can come and point to number 5 (50, 75, 100)? Who agrees?

Each letter stands for a number. How can we find out which number it is? (follow the arrow from the letter to the number line)

X, come and point to the letter a and follow the arrow down to the number line. Which number is it pointing to? (12) Is X correct?

X writes the number in the box opposite a and Ps write it in their books.

Repeat with a different P for each letter. If problems, Ps can point to next nearest whole ten and count on (or back) to number required.

• Who can come and show us the next nearest whole tens to a?
• How can we write it using only numbers and signs?

Similarly for other numbers.

---

**Notes**

Whole class activity

Use enlarged copy master or OHP

Practice in finding 2-digit numbers on number line

Checking, agreement

Praising

BB:  
\[ a = 12 \quad b = 27 \]
\[ c = 38 \quad d = 51 \]
\[ e = 64 \quad f = 72 \]
\[ g = 85 \quad h = 92 \]

BB: 10 < a < 20

Praising

---
### Bk2 Lesson Plan

#### Activity

<table>
<thead>
<tr>
<th>No.</th>
<th>Book 2, page 22, Q.1</th>
</tr>
</thead>
</table>
| 1   | **Counting**  
|     | a) Let's count aloud from 0 to 100. (Ps have number line on desk if needed.)  
|     | b) Let's count aloud from 100 down to 50.  
|     | 5 min |
| 2   | a) Let's all say the numbers on this segment of the number line '20...'.  
|     | A, come and point to the number 22. What do you notice about it? (It has a black dot with 2 arrows pointing away from it.)  
|     | Follow the arrow and point to the next nearest number less than (greater than) 22. (21, 23)  
|     | This has been written as an inequality.  
|     | Let's all read it together from left to right: 'twenty-one is less than twenty-two, twenty-two is less than twenty-three'.  
|     | Now let's read it from right to left: 'twenty-three is greater than twenty-two, twenty-two is greater than twenty-one'.  
|     | B, come and point to the other number on this line segment which has a black dot. (30) Show us the next nearest number less than 30.  
|     | B points and says '29'. Is B correct?  
|     | B writes '29' on the left side of the inequality and Ps write it in their books too.  
|     | C, come and point to the next nearest number greater than 30.  
|     | C points to 31. Is C correct?  
|     | C writes '31' on the right side of the inequality and Ps also write it in their books.  
|     | Let's read the inequality from left to right (right to left).  
|     | b) As above with different Ps at BB.  
|     | Elicit that:  
|     | • each number has 2 nearest numbers (one less, one greater);  
|     | • if a number is even (odd) its next nearest numbers are odd (even).  
|     | 10 min |
| 3   | **Book 2, page 22**  
|     | Q.2 Read: Write down the next nearest numbers.  
|     | Ps may use number lines to help them. Review orally around the class. Ps read out each inequality with T's help.  
|     | Mistakes corrected at class number line and written on BB.  
|     | 15 min |
| 4   | **Book 2, page 22**  
|     | T shows large purse to class. I wonder how much money there is inside? D, come and find out. D takes out one coin at a time (real or play money) and T draws it on the BB (or sticks play money on BB).  
|     | How many 10 p coins? How many 1 p coins? How much altogether?  
|     | Q.3 Read: How much money do we have?  
|     | Write it down as numbers.  
|     | Ps could have play money on desks. Make sure Ps realise that 'units' are the same as 'ones'. Deal with one part at a time.  
|     | Review at BB with whole class (or Ps can show answer with number cards). Mistakes corrected.  
|     | If problems, demonstrate with coins (real or plastic or cardboard)  
|     | 23 min |
Activity

5 Interlude
Song, verse, physical exercises

25 min

6 Tens and units
Who can tell me a 1-digit number? (e.g. 8) T writes on BB.
What does the 8 mean? (8 of something, 8 single things, eight ’1’s or units) P comes out to stick 8 ’1’s on BB.
Who can tell me a 2-digit number? (e.g. 23) T writes on BB.
What does this digit mean? (T points to the ’2’) (twenty ’1’s or 2 ’10’s) P comes out to stick 2 ’10’s on BB.
What does this number mean? (T points to the ’3’) (3 ’1’s or units) P comes out to add 3 ’1’s to the 2 tens already on the BB.
Now I will stick some units on the BB and you must show me how many tens it is equal to. e.g.

T writes

10
10
10
10
10
10
10
10
10
10

BB: 10
10
10
10
10
10
10
10
10
10

= 100
10 tens = 100

20 min

7 Problem
Listen carefully and picture the story in your head. Draw a picture to help you. Show me the answer with number cards when I say.
I have 40 p in my left hand and 20 p in my right hand, but I have only 10 p coins. How much money do I have altogether?
Show me . . . now! (60)
T (or P with correct answer) shows drawing and calculation on BB.
Answer: I have 60 p altogether.
Which hand has more? How much more? (Left hand has 20 p more.)

40 min

8 Book 2, page 22
Q.4 Read: Each box holds 10 balls.
How many boxes will be needed?
Talk about possible methods of solution. (Counting all the balls, or drawing a circle around every 10 balls to show each full box.)
Ps draw circles and write in the missing numbers.
Review at BB with whole class. (Ps can show total number of balls with number cards.)

45 min

Notes
Whole class in unison

Whole class activity
Use coins from copy master
BB: 10 10 10 10 10 10 10 10 10 10 = 8
BB: 10 10 10 10 10 10 10 10 10 10 = 20 + 3 = 23
Praising
Ps also copy down at back of their books or in Exercise Books:
10 units = 1 ten
20 units = 2 tens
40 units = 4 tens
100 units = 10 tens
10 tens = 1 hundred
and recite them together.
Laying a solid foundation for the concept

Whole class activity
T (or Ps) repeat problem
Give Ps time to think/ draw
In unison
BB: Left Right

10 10 10 10 10 10 10 10 10 10

40 + 20 = 60
40 > 20, 40 – 20 = 20

Praising
Individual work, monitored
Use enlarged copy master/OHP
Discussion, reasoning, agreement on best method
BB:
4 times 10 + 2 = 40 + 2 = 42
Praising

### Activity

**Number cards**

1. **What number am I thinking of? Show me the number with number cards when I say.** (After each number has been agreed, T writes number on BB.)
   - The next nearest number greater than 24. (25)
   - The number which is greater than 40 and less than 42. (41)
   - The smallest 3-digit number. (100)
   - The largest 2-digit number. (99)
   - The number which is greater than 86, less than 89 and even. (88)
   - The next nearest number less than 37. (36)

Who can come and write these numbers in increasing (decreasing) order? Who agrees/disagrees?

Who can point to these numbers on the number line?

T covers up the number line. Tell me the next nearest numbers (whole tens) to the number I point to.

**Notes**

Whole class activity

Ps show each answer with number cards

Check on number line

BB: 25, 41, 100, 99, 88, 36

BB: 25, 36, 41, 88, 99, 100

Different P for each number

T points, class shouts out in unison. At a good pace!

---

**Book 2, page 23, Q.1**

T explains task.

a) Let’s all read the numbers on this segment of the number line. (18, 19, . . ., 30, 31)

Who can come and show us the segment on the class number line?

A, come and point to the number on this line segment which has a black dot. (25) Follow the arrow and tell us the next nearest whole ten less than 25. B points and says '20' Is B correct? B writes '20' on the LHS of the inequality. Ps write it in their books too.

C, follow the other arrow and tell us the next nearest whole ten greater than 25. C points to 30. Is C correct? C marks X and writes '30' on the RHS of the inequality. Ps also write in their books.

Let’s read the inequality from left to right (right to left).

b) and c) As above, with different Ps at BB.

**Notes**

Whole class activity

Drawn on BB or use enlarged copy master or OHP

Discussion, agreement

BB:

a) 20 < 25 < 30
b) 50 < 58 < 60
c) 90 < 92 < 100

In unison

---

**Book 2, page 23**

Q.2 Read: **Write down the next nearest whole tens.**

Ps may use number lines to help them. Review orally round the class. Encourage Ps to express their reasoning clearly.

e.g. 70 < 73 < 80: 73 is more than 70 and less than 80

Mistakes corrected at class number line and written on BB.

**Notes**

Individual work, closely monitored, helped

Discussion at BB and at class number line

Reasoning, agreement

Self-correction. Praising

Whole class in unison

---

4 **Interlude**

Action song

**Notes**

Whole class in unison

---

5 **Ordering 2-digit numbers**

T sticks houses containing numbers, e.g. 31, 42, 74, 85, 26, 60, 97, in random order on BB. Ps (one each number) come out to put them in increasing (decreasing) order. Which are the even (odd) numbers?

Which digit helps us most? (tens digits tell us which number is larger)

**Notes**

Whole class activity

Use copy master, enlarged and cut out

(Ps can put houses on 2 sides of a road – even and odd).
### Activity 6

**Book 2, page 23**

T asks Ps for a 2 digit number (e.g. 25) and writes on BB. Let's draw some dots to show how many tens and units it has.

T draws 2 vertical lines on BB and labels them ‘tens’ and ‘units’.

How many tens are there? (2)

T (or P) draws 2 dots on tens line.

How many units are there? (5)

T (or P) draws 5 dots on units line. T writes addition on BB

**Q.3 Read:** *Write in the missing numbers and complete the drawings.*

What do you think ‘t’ and ‘u’ mean? (tens and units)

T (or P) explains the diagram in a). Ps do parts b), c) and d).

Review at BB with whole class.

T goes through part e) with whole class. Ps do parts f) and g).

Review at BB with whole class.

Who can tell me the even (odd) numbers? Class agrees/disagrees

Who can come and write additions about each diagram?

--- 40 min ---

### Activity 7

**Number line**

a) T describes a number, e.g. ‘2 tens and 1 unit’, and Ps come out to class number line to point to it.

b) T says a number and Ps say how many tens and units it has.

--- 45 min ---

### Notes

Whole class introduction

(Or use wooden rods with discs or string beads on vertical wires or use an abacus)

Discussion, agreement

BB: \(20 + 5 = 25\)

Individual work, monitored, helped

Drawn on BB or use enlarged copy master or OHP

Reasoning, checking, agreement

BB: \(50 + 3 = 53, \ 30 + 5 = 35\) etc.

Whole class activity

At speed

Involve majority of Ps

Praising only

**Activity**

6

**Book 2, page 24**

Q.4 Read: *Colour in as much money as the number at the top of the column.*

T explains task using first example (13). Ps agree on a colour for the '10's (e.g. red) and '1's (e.g. yellow). Deal with each number orally first, (how many tens, units?) noting that '3' has no tens.

Make sure Ps realise that they colour in only the amount required!

Review at BB with whole class. Mistakes corrected.

- Who can come and write out the numbers in increasing order?
- Who can come and draw a circle around the odd numbers?

34 min

7

**Comparing**

T asks a P to come and draw (or stick) an amount of money on the BB, (e.g. 3 tens and 1 unit). T ask another 3 Ps for a different number. (e.g. 24, 15, 40) and T writes (or sticks them) spaced out on BB.

Let's compare them. Which is more? Ps come out to draw arrows pointing towards the bigger value, explaining reasoning. Class agrees/disagrees.

Could be repeated with other numbers and the arrows could point towards the smaller of 2 values.

8

**Roman numerals**

T writes on BB: 1 5 10 50 100

Who know the Roman way to write these numbers? I V X L C

Ps write what they know, T completes.

Revise the Roman numeral system (with help of Ps).

( VI = V + 1, IX = X – 1)

T writes Roman numerals on BB and Ps say the Arabic number.

(e.g.III, IX, XV, XXX, LX, XC: 3, 9, 15, 30, 60, 90)
