Do the calculations for b) and c) in your exercise book.

a) How many unit cubes does this cube contain? . . . . .

b) How many unit cubes would 1176 of these cubes contain?

c) How many of these large cubes could be built from 9648 unit cubes?

In each diagram, mark
- right angles in red like this,
- angles smaller than a right angle in blue like this,
- angles larger than a right angle in green like this.

b) List the letters of the shapes for which each statement is true.

i) It is a square. . . . . . . . ii) It is a rectangle. . . . . . . . .

iii) It is a quadrilateral. . . . . . . . iv) It is a triangle. . . . . . . . .

v) It has at least one right angle.

vi) Every angle is a right angle.

vii) It has at least one angle smaller than a right angle.

viii) All its angles are smaller than a right angle.

ix) It has at least one angle larger than a right angle.

x) All its angles are larger than a right angle.

Two sides of a quadrilateral have been drawn. Complete the shape so that:

a) it has at least one right angle

b) 2 of its sides are parallel

c) it has 2 pairs of parallel sides.
1 The minute hand is pointing to 12.
Compare the angle it turns with a right angle.
Write in the missing signs. (<, >, =)

a) After 5 minutes it has turned through an angle ___ a right angle.
b) After 10 minutes it has turned through an angle ___ a right angle.
c) After 15 minutes it has turned through an angle ___ a right angle.
d) After 25 minutes it has turned through an angle ___ a right angle.
e) After 30 minutes it has turned through an angle ___ a right angle.

2 Complete the drawings and write how many right angles the arrow has turned if it:

a) turns to the right:
   i) from N to NE ii) from N to SE iii) from E to SE
   ___ right angle ___ right angles ___ right angle

b) turns to the left:
   i) from N to NW ii) from N to SW iii) from W to SW
   ___ right angle ___ right angles ___ right angle

3 Join up 4 of the 6 points to make a quadrilateral which has:
   a) only 1 pair of parallel sides b) 2 pairs of parallel sides c) 1 pair of parallel and 1 pair of perpendicular sides.
