Solve the problems in your exercise book. Write only the results here.

a) The temperature was 9°C. It fell by 6°C, then by 5°C, then it rose by 2°C and rose again by 5°C. What is the temperature now?

b) James had £100 in cash but owed £20. Then £10 of his debt was cancelled. What is his balance now?

c) Sue had £100 in cash but was £120 in debt. She spent another £40. What is her balance now?

d) The temperature is falling steadily by 2°C every hour. It is now 0°C.
