| Y3 | R: Calculation up to 1000 C: Measurement of capacity: ℓ, cl, ml E: Numbers up to 2000 | Lesson Plan 81 |
|-----------|--|--|
| Activity | | Notes |
| 1 | Revision of capacity What is capacity? (How much liquid a container can hold) Who can tell me the standard units we use to measure capacity? (litre, cl, ml) Which is the biggest (smallest)? (litre, ml) Elicit that: 1 litre = 100 centilitres = 1000 millilitres (BB) Remind Ps that 'centi' means 1 hundredth and 'milli' means 1 thousandth. T has 4 containers on desk to show how much water is in 1 litre, 1 tenth, 1 hundredth (1 cl) and 1 thousandth (1 ml) of a litre. 1. 10 cm by 10 cm by 10 cm container (cube) Elicit that the volume of the space inside this container is 1000 cm cubes (1000cc). Demonstrate if necessary by filling with10 layers of 10 rows of 10 1 cm cubes stuck together or use '10' rods from Cuisennaire.) How much water do you think it can hold? (1 litre) T demonstrates by filling cube with water, then pouring into a measuring jug. 2. 10 cm by 10 cm by 1 cm container (1 layer) Elicit that volume of the space inside this container is 100 cm cubes (100 cc). How much water do you think it can hold? (1 tenth of a litre or 10 cl or 100 ml) Demonstrate with cubes and water if necessary. 3. 10 cm by 1 cm container (1 row or rod) 1 cl Elicit that volume of the space inside this container is 10 cm cubes (10 cc). How much water do you think it can hold? (1 hundredth of a litre or 1 cl or 10 ml) Demonstrate with cubes and water if necessary. 4. 1 cm by 1 cm container (1 cm cube) What is the volume of the space inside this container? (1 cc) How much water can do you think it can hold? (1 hundredth of a litre or 1 cl or 10 ml) Demonstrate with cubes and water if necessary. 4. 1 cm by 1 cm container (1 cm cube) What is the volume of the space inside this container? (1 cc) How much water can do you think it can hold? (1 hundredth of a litre or 1 ml) T says , e.g., 1 litre (10 cl, 1 cl, 1 ml) Ps select appropriate container. | Whole class activity T has items of different capacity on a table (e.g. litre bottles, cartons, measuring jugs, plastic medicine cups and spoons) Already prepared from laminated card or foil and/or draw diagrams on BB or use enlarged copy master (for reference only) (If possible, Ps have cubes and containers on desks too.) 1. $V = 10 \text{ cm} \times 10 \text{ cm} \times 10 \text{ cm}$ = 1000 cm cubes (cc) Capacity = 1 litre T shows litre bottle/carton 2. $V = 10 \text{ cm} \times 10 \text{ cm} \times 1 \text{ cm}$ = 100 cc = 1 tenth of 1000 cc Capacity = 1 tenth of a litre = 1 tenth of 100 cl = 10 cl T shows 10 cl medicine cup 3. $V = 10 \text{ cm} \times 1 \text{ cm} \times 1 \text{ cm}$ = 10 cc = 1 hundredth of 1000 cc Capacity = 1 hundredth of a litre = 1 cl = 10 ml T shows a 1 cl spoon 4. $V = 1 \text{ cm} \times 1 \text{ cm} \times 1 \text{ cm}$ = 1 cc = 1 thousandth of 1000 cc T shows a 1 ml spoon. Agreement, praising |
| 2 | 10 min | |
| 2 | Measuring capacity A recipe needs us to pour 20 cl of water into a pan. How could we measure this quantity? Ask several Ps for suggestions. e.g. Use the 10 cl (100 ml) measuring cup. Fill it to the 10 cl mark, then pour the water into the pan. Do the same again. Use the cl measuring jug and fill it to the 20 cl mark. How could we use this measuring jug? Elicit that scale is in ml and that 20 cl = 200 ml We can estimate the amount by filling the jug to just below the 250 ml mark. Repeat for other quantities, using available containers. Find <u>approximate</u> capacities of a cup, glass , bottle, etc. by filling with water, pouring into a measuring jug and reading the nearest mark on the scale. | Whole class activity Ps come to T's desk to choose an appropriate measuring item, e.g. 100 ml $100 ml50 cl$ $100 ml100 ml50 cl$ $100 ml100 ml$ |
| | 20 min | |

_____ 20 min __

| Lesson Plan |
|-------------|
|-------------|

| Y3 | | Lesson Plan 81 |
|-----------|--|---|
| Activity | | Notes |
| 3 | Sequences T says first 3 terms of a sequence. Ps continue it in <i>Ex. Bks</i> . | Individual work, monitored (helped) |
| | a) 5 cl. 20 cl. 35 cl. (50 cl. 65 cl. 80 cl. 95 cl. 110 cl. 125 cl) | T sets time limit for each |
| | b) 1200 ml, 1150 cl, 1100 ml, (1050 ml, 1000 ml, 950 ml,) c) 30 cl, 350 ml, 40 cl, (450 ml, 50 cl, 550 ml, 60 cl, 650 ml,) | Discussion at BB or SB or OHP |
| | T asks for the rule after each one. a) $+ 15$ cl, b) $- 40$ ml, c) $+ 50$ ml, but units given first in cl, then in ml, then in cl, etc. | Agreement, self-correction, praising |
| | Underline all the quantities which are more than one 1 litre. Review orally round class. Ps change the units for each into litres and cl or litres and ml. e.g. $110 \text{ cl} = 1 \ell 10 \text{ cl}$; $1200 \text{ ml} = 1 \ell 200 \text{ ml}$ Mistakes discussed and corrected. | a) <u>110 cl</u>, <u>125 cl</u>, b) <u>1200 ml</u>,, <u>1050 ml</u> c) <u>1050 ml</u>, |
| | 25 min | |
| 4 | PbY3b, page 81 Q.1 Read: Change the quantities. Flicit that : 1 cl = 10 ml Image: the set of the set | Individual work monitored, helped |
| | Execution that : $1 \text{ cl} = 10 \text{ mi}$ $1 \text{ mi} = 1 \text{ tenth of a cl}$ $10 \text{ cl} = 100 \text{ ml}$ $100 \text{ cl} = 1000 \text{ ml} = 1 \ell$ Review orally with whole class. Mistakes discussed and corrected. Which are more than 1 litra? In what other way available or gravitational states and corrected. | Agreement, self-correction, praising |
| | Solution: | e.g. $105 \text{ cl} = 1 \ell 5 \text{ cl}$ |
| | a) $3 \text{ cl} = 30 \text{ ml}$ b) $40 \text{ ml} = 4 \text{ cl}$ | $(= 1 \ \ell \ 50 \text{ ml})$ |
| | 7 cl = 70 ml $320 ml = 32 cl$ $12 cl = 120 ml$ $400 ml = 40 cl$ $20 cl = 200 ml$ $1000 ml = 100 cl$ | $1540 \text{ m} = 1 \ell 540 \text{ m}$ $(= 1 \ell 54 \text{ cl})$ Feedback for T |
| | 105 cl = 1050 ml $1540 ml = 154 cl$ | |
| 5 | 29 mm | |
| 3 | Q.2 Read: Follow the example. Fill in the missing quantities. Do one part at a time. Who can explain the example in a)? (e.g. $10 \text{ ml} = 1 \text{ cl}$; $45 \text{ ml} = 4 \times 10 \text{ ml} + 5 \text{ ml} = 4 \text{ cl} + 5 \text{ ml}$) Review at BB with whole class. Mistakes discussed and corrected. | Individual work, monitored, helped T has BB already prepared Discussion, agreement, |
| Extension | Ask Ps to find quantities which can be expressed in other ways. e.g. $1999 \text{ ml} = 199 \text{ cl } 9 \text{ ml} = 1 \ \ell \ 99 \text{ cl } 9 \text{ ml}, \text{ or } 1999 \text{ ml} < 2 \ \ell \ 1 \text{ ml}$ a) $45 \text{ ml} = 4 \text{ cl } 5 \text{ ml}$ b) $1009 \text{ ml} = 100 \text{ cl } 9 \text{ ml}$ $145 \text{ ml} = 14 \text{ cl } 5 \text{ ml}$ $1009 \text{ ml} = 120 \text{ cl } 9 \text{ ml}$ $76 \text{ ml} = 7 \text{ cl } 6 \text{ ml}$ $1054 \text{ ml} = 105 \text{ cl } 4 \text{ ml}$ $376 \text{ ml} = 37 \text{ cl } 6 \text{ ml}$ $1230 \text{ ml} = 123 \text{ cl}$ $999 \text{ ml} = 99 \text{ cl } 9 \text{ ml}$ $1999 \text{ ml} = 199 \text{ cl } 9 \text{ ml}$ | self-correction, praising Whole class activity Ps choose a quantity and suggest alternative ways to express it. Class agrees/ disagrees. Praising, encouragement only |
| 6 | PbY3b, page 81, Q.3 Read: An adult needs about 2 litres of water per day. Half of this amount is contained in food and other liquids. T shows class a 2 litre bottle of water. Elicit that <u>1 litre</u> (half of 2 ℓ) is contained in other food/drink. Discuss what food and drink might contain water (e.g. milk, orange juice, tea, coffee, custard, sauces, gravy, stews, casseroles, etc.) | Whole class discussion involving several Ps Ask Ps to think of what they eat and drink in a day T gives hints if Ps cannot think of any. |

|------------|---|--|
| | | |
| Activity | | Notes |
| | Listen to the questions. Work out the answer in your <i>Pbs</i> books, then show me the result when I say. Remember to write the units too! | Individual work in <i>Pbs</i> Responses shown on scrap |
| | a) Read: If a man drinks the same amount of water 4 times per day to make up the extra, how much water should he drink each time? | paper or plastic 'slates' T or P reads question. Another P repeats in own words. |
| | Show me your answer now! (25 cl or 250 ml or 1 quarter of a ℓ) | In unison |
| | A , explain to us how you worked out the answer. Who agrees? Who did it a different way? etc. Mistakes discussed and corrected. | Reasoning, agreement, self- correcting, praising |
| | BB: Half of 2 litres: 1 litre Litres remaining: 1 litre | or $1 \ell \div 4 = 1$ quarter of a ℓ |
| | Amount in each drink: $1 \ell \div 4 = 100 \text{ cl} \div 4 = \underline{25 \text{ cl}}$ | or $1000 \text{ ml} \div 4 = 250 \text{ ml}$ |
| | b) Read: <i>How much water should he drink each time if he drinks</i> 5 times per day? | T or P reads question. Another P repeats it. |
| | Show me your answer now! (20 cl or 200 ml or 1 fifth of a ℓ) | In unison |
| | B , explain to us how you worked out the answer. Who agrees? Who did it a different way? etc. Mistakes discussed and corrected. | Reasoning, agreement, self- correcting, praising |
| | BB: Amount in each drink: $1 \ell \div 5 = 100 \text{ cl} \div 5 = \underline{20 \text{ cl}}$ | or $1 \ell \div 5 = 1$ fifth of $a \ell$ or 1000 ml ÷ 5 = 200 ml |
| 7 | PhY3h page 81, 0.4 | |
| | Read: Sue and Jane share 2 litres of orange juice between them. | Whole class activity |
| | Complete the table. | Drawn on BB or use enlarged |
| | Who can explain what the table means? (Top row is amount of juice that Sue drinks, bottom row is amount that Jane drinks.) | copy master or OHP Discussion, reasoning, |
| | Ps come out to choose a column and fill in the missing quantitity, explaining reasoning. Class agrees/disagrees. | agreement, praising |
| | Which column in the table shows how they shared the juice <u>equally</u> ? (<i>S</i> : 1 litre, <i>J</i> : 1 litre) | na u good pace |
| | Who can write the rule? Who agrees? Who can write it another way? <i>Solution</i> : | (Or done as individual work, reviewed with whole class) |
| | <i>S</i> 1 litre half a litre 130 cl 70 ml 1170 ml 115 cl 600 ml 0 cl | |
| | J 1 litre 1 and a half litres 70 cl 1930 ml 830 ml 85 cl 1400 ml 200 cl | |
| | <i>Rule</i> : $S = 2$ litres $-J$, $J = 2$ litres $-S$, $S+J = 2$ litres | |
| Extension | Think of other ways to express the quantities in each column. | Ps could also suggest other |
| | (e.g. 50 cl + 150 cl, 7 cl + 193 cl, 1 ℓ 17 cl + 83 cl, 2 litres + 0, etc.) | columns to add to table. |
| | 42 min | |
| 8 | Rounding quantities | Whole class activity |
| | a) T says a quantity in cl. Ps round it to the nearest litre. | At speed round close |
| | (e.g. T: 180 cl, P: 2 litres; T: 225 cl, P: 2 litres, etc.) | At speed round class |
| | b) T says a quantity in ml. Ps round it to the nearest cl. | Ps can suggest quantities to be rounded too. |
| | (e.g. T: 1577 ml, P: 158 cl; T: 121 ml, P: 12 cl, etc.) | Praising, encouragement only |
| | If problems, write on BB as, e.g., $2 \text{ litres} < 225 \text{ cl} < 3 \text{ litres}$ so 225 cl is nearer 2 litres than 3 litres. | In good humour! |
| | 45 min | |

| Y3 | R: Mental calculationC: Estimating, changing, rounding measures of capacity | Lesson Plan |
|-----------|---|--|
| | E: Numbers up to 2000. Decimal notation. | 82 |
| Activity | | Notes |
| 1 | Estimating capacity T has various containers on desk at front of class. (e.g. cups, glasses, jugs, vases, etc.), a bucket of water and measuring cups, jugs, etc. for 1 litre, 10 cl, 1 cl (1 pint, half a pint). Ps come to front of class to choose a container, estimate its capacity, then choose an appropriate unit to measure it (with T's help). 5 min | Whole class activity At a good pace Show that 1 pint < 1 litre Class applauds close estimates. |
| 2 | Decimal notationT has a 1 and a half litre bottle to show to class. A, come and write on the BB the capacity written on the bottle.We read it as 'one point five litres'. Who knows what it means?(It means 1 litre and 5 tenths of a litre.) Let's show it in a place value table. Ps suggest where the digits should be written.BB:TensUnitstenthshundredths15(It means 1 litre and 5 tenths of a litre.) Let's show it in a place value table. Ps suggest where the digits should be written.BB:TensUnitstenthshundredths115(0) | Whole class activity BB: 1.5 ℓ Class repeats after T Agreement, praising Table drawn on BB or OHT |
| | Elicit or explain that: $1.5 \ \ell = 1 \ \ell$ and $5 \ \underline{\text{tenths}}$ of a litre $= 15 \ \text{tenths of a litre} = 150 \ \text{cl}$ It can also be shown as: $1.5 \ \ell = 1 \ \ell$ and $50 \ \underline{\text{hundredths}}$ of a litre $= 150 \ \underline{\text{hundredths}}$ of a litre $= 150 \ \text{cl}$ Let's change these quantities from litres to centilitres. T writes on BB as litres and Ps come out to write as cl. Class agrees/disagrees. BB:. $3 \ \ell = 300 \ \text{cl}$, $3.5 \ \ell = 350 \ \text{cl}$, $3.2 \ \ell = 320 \ \text{cl}$ $0.5 \ \ell = 50 \ \text{cl}$, $0.2 \ \ell = 20 \ \text{cl}$, $0.25 \ \ell = 25 \ \text{cl}$ (half a litre) (1 quarter of a litre) Point out that 0.25 is read as 'nought point two five', not 'twenty-five' What is this quanitity? T writes on BB: $2.5 \ \text{cl}$. Let's read it together. (two point five centilitres) What does it mean? (It means 2 \ \text{cl} and 5 \ \text{tenths} of a cl.) Elicit that $2.5 \ \text{cl} = 25 \ \text{ml}$. Let's change these quantities into cl. Ps suggest to T what to write. BB: $37 \ \text{ml} = 3.7 \ \text{cl}$, $142 \ \text{ml} = 14.2 \ \text{cl}$, $3.2 \ \ell = 320 \ \text{cl}$ T elicits what is happening. (As $10 \ \text{ml} = 1 \ \text{cl}$, then to change ml to cl you must divide by 10). Show on a place value table. The dot separating whole units from parts of units is called the <u>decimal</u> | BB: 1 tenth of a litre = 10 cl 1 hundredth of a litre = 1 cl Show on place value table. BB: $H T U t h$ 3 (0) (0) In $3 2 (0)$ 0 5 (0) 0 2 (0) 1 cl = 10 ml Agreement, praising e.g. $H T U t h$ 1 4 2 - + 10 = 14.2 BB: $142 \div 10 = 14.2$ 14 2 is a decimal number |
| | <u>point</u> . The number is called a <u>decimal</u> number. <i>10 min</i> | 14.2 is a <u>deemiai</u> humber. |
| 3 | Comparing capacitiesWhich is more? How many more? Ps come out to write in missing signs, explaining reasoning. Elicit that it is easier to change the litres into cl to calculate how much more one side is. Ps change each value to cl and write difference. Show decimals in a place value table.BB:a) $5 \ \ell \ 35 \ cl$ \subseteq $5.35 \ \ell$ (535 cl) $H \ T \ U \ t \ h$ b) $2.15 \ \ell \ (\leq) \ 3 \ \ell$ (215 cl) $3 \ \ell$ (300 cl)litresc) $7 \ \ell \ (\geq) \ 6.85 \ \ell$ $6.85 \ \ell$ | Whole class activity T has BB (or SB or OHT) already prepared BB: 1 cl = 1 hundredth of a litre 10 cl = 1 tenth of a litre Let Ps suggest what to do. If problems show that, e.g. $7 \ell > 6.85 \ell > 6 \ell$ |

|-----------|--|--|
| Activity | | Notes |
| 7 7 | PbY3b, page 82Q.3Read: Complete the table.Study the table carefully. Who can explain it? (A quantity is shown in ml (top row), cl (2nd row), 10 cl (3rd row and litres (bottom row).How do the numbers change? (divided by 10 each time) Review at BB with whole class. Ps come out to fill in the | Individual work, monitored, helped (Or as whole class activity) Drawn on BB or use enlarged copy master or OHP Discussion, reasoning, agreement, self-correction, praising If no P has used decimals, T suggests that shortest way to write bottom row is to use decimal numbers. |
| | $\begin{array}{c c c c c c c c c c c c c c c c c c c $ | Ps dictate what they should |
| | $D = \frac{12}{12} + \frac{12}{20} + \frac{12}{3} + \frac{12}{3} + \frac{13}{19} + \frac{13}{3} + \frac{13}{19} + \frac{13}{3} + \frac$ | be. |
| Extension | Let's label the rows <i>A</i> , <i>B</i> , <i>C</i> and <i>D</i> . Who can write equations about the numbers in the rows? Who agrees? Who can write another one? etc. (e.g. $A = 10 \times B = 100 \times C = 1000 \times D$; | Whole class activity Reasoning, agreement, |
| | $B = 10 \times C = 100 \times D = 1 \text{ tenth of } A;$ $C = 10 \times D = 1 \text{ tenth of } B = 1 \text{ hundredth of } A;$ D = 1 tenth of C = 1 hundredth of B = 1 thousandth of A; 36 min | Extra praise if Ps suggest the fractions without help. |
| 8 | PbY3b, page 82Q.4Read: Elephant drank 4 more litres of water than Rhino. Complete the table.As there is not much room in the table, T should encourage Ps to think of short ways to write the missing values (or to write very small on two lines inside the space).Review at BB with whole class. Ps come out to fill in the missing numbers, explaining reasoning. Class agrees/disagrees. Ask for values in litres (decimals) and also in cl. Mistakes discussed and corrected.Solution: $(33.5 t)$ $(33.5 t)$ $(32.2 t)$ $(23.3 t)$ $(23.3 t)$ $(33.5 t)$ $(32.2 t)$ $(23.3 t)$ $(23.3 t)$ $(33.5 t)$ $(32.2 t)$ $(23.3 t)$ $(23.3 t)$ $(32.5 t)$ $(23.2 t)$ $(23.3 t)$ $(23.3 t)$ $(33.5 t)$ $(23.5 t)$ $(23.5 t)$ $(23.2 t)$ $(23.3 t)$ $(23.3 t)$ $(33.5 t)$ $(23.5 t)$ $(23.5 t)$ $(23.2 t)$ $(23.2 t)$ $(13.3 t)$ $(23.2 t)$ $(13.3 t)$ $(23.5 t)$ $(23.5 t)$ $(23.2 t)$ $(23.2 t)$ $(13.3 t)$ $(23.5 t)$ $(23.5 t)$ $(23.5 t)$ $(23.5 t)$ $(23.2 t)$ $(13.5 t)$ $(23.5 t)$ $(23.2 t)$ $(13.5 t)$ $(23.5 t)$ $(23.5 t)$ $(23.5 t)$ $(23.5 t)$ $(23.2 t)$ $(13.5 t)$ $(13.5 t)$ $(23.5 t)$ | Individual work, monitored, helped Drawn on BB or use enlarged copy master or OHP Discussion, reasoning, agreement, self-correction, praising e.g. 35 litres = 3500 cl 32 ℓ 20 cl = 3220 cl N.B. The last column in the table is to see what Ps do!) Feedback for T |
| Extension | Think of other values which could be added to the table. | Orally or in <i>Ex. Bks.</i> |
| 9 | PbY3b, page 82, Q.5 Read: Write the rule and complete the table. Let Ps discuss in pairs for a couple of minutes to find the rule. Ask Ps what they think, then check with values in table. If no P knows, then T gives the rule. Ps fill in missing values in table. Rule: The number in B is the number in A rounded to the nearest 10. (any unit) | Individual or paired trial first Drawn on BB or use enlarged copy master or OHP Ps dicate numbers to T or come out to BB. Agreement, praising |

Week 17

| Y3 | R: Mental calculation C: Money problems. Changing units. Decimal notation for £. E: Calculation up to 2000 | Lesson Plan 83 |
|-----------|---|---|
| Activity | | Notes |
| 1 | Units of measure What different measures are there? (e.g. length, mass, capacity, money, time, (temperature). a) What are the standard units of length? Let's write them in increasing order. BB: 1 mm < 1 cm < 1 m < 1 km | Whole class activity Praise all contributions. Ps dictate to T or come to BB to write in order. Agreement, praising |
| | $\times 10$ $\times 100$ $\times 1000$ What must we multiply 1 mm by to get 1 cm? (1 cm by to get 1 m?1 m by to get 1 km?) ($\times 10$, $\times 100$, $\times 1000$)Explain that: BB:1 millimetre = 1 thousandth of a metre1 centimetre = 1 hundredth of a metre1 kilometre = 1000 metres | T writes responses on BB Discuss meanings of 'milli', 'centi' and 'kilo' [T could mention 'deci' meaning 'I tenth' but unit only used abroad, e.g. <u>deci</u> metre (dm)] |
| | b) What are the standard units of capacity? Let's write them in increasing order. What must we multiply 1 ml by to get 1 cl? (1 cl by to get 1 litre?) T writes responses on BB. Elicit that: BB: 1 millilitre = 1 thousandth of a litre 1 centilitre = 1 hundredth of a litre | At a good pace throughout BB: $1 \text{ ml } < 1 \text{ cl } < 1 \ell$ $\times 10 \times 100$ |
| | c) What are the standard units of mass? Let's write them in increasing order. What must we multiply 1 g by to get 1 kg? Elicit that: BB: 1 kilogram = 1000 grams d) What are the standard units of money? (£ and pence). What must we multiply 1 p by to get £1? (100) Elicit that: BB: 1 p = 1 hundredth of £1 | BB: $1 g < 1 kg$ $\times 1000$ BB: $1 p < \pounds 1$ $\times 100$ |
| 2 | Sequences Continue these sequences. a) The first term is 321 cl and the sequence is decreasing by 20 cl. (321 cl, 301 cl, 281 cl, 261 cl, 241 cl, 221 cl, 201 cl, 181 cl,) b) The first 4 terms are: 1 mm, 2 mm, 4 mm, 8 mm, (16 mm, 32 mm, 64 mm,) What is the rule? (Every following term is twice the previous one.) c) The first 3 terms are: kg 27 g, 1 kg 127 g, 1 kg 227 g, (1 kg 327 g, 1 kg 427 g,) What is the rule? (Every term is 100 g more than the previous one.) | Whole class activityAt speed round class.If a P makes a mistake, the next P corrects it.T helps with part b)Agreement on the rulesPraising, encouragement onlyIn good humour! |
| 3 | Writing quantities T writes a quantity on BB. Ps write it in different ways in their <i>Ex. Bks.</i> Review orally with whole class. Mistakes corrected. e.g. a) $125 \text{ cl} = (1250 \text{ ml} = 1 \ \ell \ 250 \text{ ml} = 1 \ \ell \ 25 \text{ cl} = 1.25 \ \ell)$ b) $18 \text{ cm} \ 2 \text{ mm} = (182 \text{ mm} = 18.2 \text{ cm})$ c) $1245 \text{ mm} = (1 \text{ m} \ 245 \text{ mm} = 1 \text{ m} \ 24 \text{ cm} \ 5 \text{ mm} = 124 \text{ cm} \ 5 \text{ mm} = 124 \text{ cm} \ 5 \text{ mm} = 124.5 \text{ cm} = 1.245 \text{ m})$ d) $71 \text{ kg} \ 600 \text{ g} = (71.6 \text{ kg}) \text{ e}) \ \pounds 49 \ 70 \text{ p} = (\pounds 49.70 = 4970 \text{ p})$ Let's write some in the place value table. Ps choose the units. | Individual work first, then whole class filling in of table. Draw on BB or use copy master BB: e.g. $\begin{array}{c c c c c c c c c c c c c c c c c c c $ |

| | e) $1400(p) = 14(p)$ f) $150(p) = 15(p)$ | could be done as a whole class activity using response 'slates' |
| | 45 min | |

| Y3 | R: Mental calculation C: Calculating with quantities E: Numbers up to 2000 | Lesson Plan 84 | |
|-----------|---|---|--|
| Activity | | Notes | |
| 1 | Writing numbers T says a number; Ps write it in <i>Ex. Bks.</i> in different ways. Review at BB with whole class. Discuss all cases. Class agrees/disagrees. e.g. Nine hundred and sixty eight = (968 = 900 + 60 + 8 = 9 × 100 + 6 × 10 + 8 × 1 = 9H + 6T + 8U) | Individual work, monitored. T has SB or BB or OHT already prepared with the numbers written in words Agreement, self-correction, praising | |
| | Repeat for: Seven hundred and ninety three = Six hundred and seven = One thousand, two hundred and thirty = One thousand, nine hundred and fifty four = One thousand and seventy six = One thousand and three = | $BB: \begin{array}{c cccc} Th & H & T & U \\ \hline 9 & 6 & 8 \\ \hline 6 & 0 & 7 \\ 1 & 2 & 3 & 0 \\ 1 & 9 & 5 & 4 \\ 1 & 0 & 7 & 6 \\ 1 & 0 & 0 & 3 \\ \end{array}$ | |
| | As each number is reviewed, Ps write it in a place value table on BB. | Agreement, praising | |
| | 6 min | | |
| 2 | Competition T divides class into 3 or 4 teams (of roughly equal ability). Each team chooses a 3-digit number. T writes them on different parts of the BB (or on SB, flip charts, or large sheets of paper stuck to wall). I will give you 3 minutes to write as many different ways as you can to describe your number. You must start and stop when I say. Start now! Ps from each team come to BB one after another to write different descriptions. Rest of team correct their team-mates' errors, point out repetitions and note ideas from other teams Stop! Review each team's descriptions. The team with most correct statements is the winner. If two teams have the same number of statements, the class chooses the team with the most creative descriptions as the winner. <i>Il min</i> | Whole class activity At a good pace e.g. 160 80×2 70 + 90 $320 \div 2$ 1H + 6T 1 tenth of 1600 200 - 40 etc. Class applauds the winners | |
| 3 | Secret quantity I am thinking of a quantity. You must ask me questions to find out what it is. I can answer only Yes or No. e.g. <u>1420 cm</u> : Is it a capacity? (No), Is it a length? (Yes) Is it in km? (No), Is it in m? (No), Is it in cm? (Yes) Is it more than 100 cm? (Yes), Is it less than 1000 cm? (No), Is it more than 2000 cm? (No), Is it less than 1500 cm? (Yes), Is its hundreds digit even? (Yes) Is its hundreds digit 2? (No), Is it more than 1450 cm? (No) Is it a whole ten? (Yes) Is its tens digit even? (Yes) Is its tens digit 2? (Yes) It is 1420 cm. Yes! <u>16 min</u> | Whole class activity Ps can make notes in <i>Ex. Bks</i> Encourage Ps to ask logical questions and to keep in mind clues already given Involve majority of class Praise clever questions Ps say when questions are not very good and why. | |
| 4 | PbY3b, page 84 Q.1 Read: Fill in the missing values. Deal with one part at a time. Review at BB with whole class. Solution: a) $+280\ell$ $+80\ell$ $+80\ell$ $+280\ell$ $+640\ell$ $+280\ell$ $+640\ell$ $+200\ell$ $+200\ell$ $+280\ell$ $+640\ell$ $+200\ell$ | Individual work, monitored, helped Use enlarged copy master/ OHP Reasoning, agreement, self- correction, praising Discuss whether Ps think it is easier to add the tens or the hundreds first. | |

| 84 |
|----|
| |

| Y3 | | Lesson Plan 84 |
|-----------|--|---|
| Activity | | Notes |
| 5 | Inequalities | Whole class activity |
| | T has BB already prepared. Which is more? How much more? Ps come to BB to fill in the missing sign and to write the difference | Written on BB or use enlarged copy master or OHP |
| | below it, explaining reasoning. Class agrees/disagrees. BB: a) 300 cl + 400 cl < 300 cl + 500 cl | Reasoning, agreement, praising |
| | 700 cl 100 cl 800 cl | Extra praise if a P reasons |
| | b) $600 \text{ g} + 700 \text{ g}$ \geq $500 \text{ g} + 700 \text{ g}$ 1300 g $100 g$ $1200 g$ | without needing to work out each side of the inequality |
| | c) $400 \text{ m} + 800 \text{ m}$ = $500 \text{ m} + 700 \text{ m}$ 1200 m 1200 m | Which quantities could be written in another way? |
| | $\begin{array}{c ccccccccccccccccccccccccccccccccccc$ | e.g. $300 \text{ cl} = 3 \ell$, |
| | e) $1300 \text{ cm} - 600 \text{ cm} = 1400 \text{ cm} - 700 \text{ cm}$ | 700 g = 0.7 kg, |
| | f) $1500 \ \ell$ 800 ℓ $\sum 1400 \ \ell$ 900 ℓ | 1400 cm = 14 m, etc. |
| | $\begin{array}{c ccccccccccccccccccccccccccccccccccc$ | Agreement, praising |
| 6 | PhV3h page 84 | |
| U | Q.2 Read: Fill in the missing quantities to make the equations | Individual work, monitored, helped |
| | <i>correct.</i> Let's see how many of these you can do in 2 minutes! | Written on BB or use enlarged copy master or OHP |
| | Review at BB with whole class. Mistakes discussed and corrected. Ps explain how they worked out the answers (with or without calculation, e.g. 360 cm is 10 cm <u>more</u> than 350 cm, so missing value must be 10 cm <u>less</u> than 260 cm, i.e. 250 cm). <i>Solution</i> : a) 260 cm + 350 cm = 360 cm + 250 cm (260 cm - 10 cm) | Calculations can be done at side of <i>Pb</i> or in <i>Ex. Bks</i> – but Ps should be encouraged to notice whether it can be solved without working out the value of the given side. |
| | b) $190 g + 470 g = 480 g + 180 g$ (470 g + 10 g) | (only part d) needs to be |
| | c) $470 \text{ ml} + 280 \text{ ml} = 480 \text{ ml} + 270 \text{ ml}$ (280 ml - 10 ml) | calculated) |
| | d) $260 \text{ m} + 340 \text{ m} = \frac{431 \text{ m}}{100 \text{ m}} + 169 \text{ m} (600 \text{ m} - 100 \text{ m} - 60 \text{ m} - 9 \text{ m})$ | Reasoning, agreement, self- correction, praising |
| | e) $750 \ \ell \ -160 \ \ell \ = \ 740 \ \ell \ - \ \underline{150} \ \ell \ (160 \ \text{litres} - 10 \ \text{litres})$ | Discuss other ways the values could have been written, e.g. |
| | f) $630 \text{ mm} - 470 \text{ mm} = 640 \text{ mm} - 480 \text{ mm} (630 \text{ mm} + 10 \text{ mm})$ | 630 mm = 63 cm |
| | 31 min | |
| 7 | PbY3b, page 84 | Individual work, monitored, |
| | Q.3 Read: Bella's piece of ribbon is 800 cm longer than Anne's. What length of ribbon could they each have? | helped |
| | Complete the table and write the rule. | Drawn on BB or use enlarged |
| | Agree on one form of the rule. Ps complete the table. | Discussion, reasoning. |
| | Review at BB with whole class. Mistakes corrected. Ps come | agreement, self-correction, |
| | out to write the rule in different ways. Class agrees/disagrees. | praising |
| | Agree that using metres would have made the task easier. | e.g. $1 \text{ m} + \underline{8 \text{ m}} = 9 \text{ m}$ |
| | Solution | Feedback for T |
| | A 100 cm 200 cm 300 cm 600 cm 500 cm 1100 cm 0 cm 1200 cm 700 cm | |
| | <i>B</i> 900 cm 1000 cm 1100 cm 1400 cm 1300 cm 1900 cm 800 cm 2000 cm 1500 cm | |
| | <i>Rule</i> : $A = B - 800$ cm, $B = A + 800$ cm, 800 cm $= B - A$ | |
| | 36 min | |

| Lesson | Plan | 84 |
|--------|------|----|
| | | |

| Y3 | | Lesson Plan 84 |
|-----------|--|---|
| Activity | | Notes |
| 8 | Mental practice A and B have saved up £800 pounds altogether. How much could they each have? Ps stand up in pairs to be A and B. P ₁ says how much he/she has and P ₂ says the amount which makes it up to £800 (e.g. P ₁ : £500, P ₂ : £300; P ₃ : £750, P ₄ : £50; P ₅ : £794, P ₆ : £6, etc. Class points out errors or repetitions. Who can tell me the rule? Who agrees? Who can think of another way to write it? etc. (<i>Rule</i> : $A + B = £800$; $A = £800 - B$; $B = £800 - A$) <u>40 min</u> | Whole class activityAt speed. Involve all Ps.Agreement, praisingEncourage creativityExtra praise if Ps use £s and pence!If time, repeat for other total amounts |
| 9 | PbY3b, page 84 Q.4 Read: Write the calculations and underline the answer. Ps read the problems on their own and work out the answers. Review one part at a time. Ps show answers on command. Ps who responded correctly explain to Ps who did not. Mistakes corrected. Solution: a) E: £700, F: £500; E + F: £700 + £500 = £1200 b) i) G: £700, H: G - £500 = £700 - 500 = £200 ii) G + H = £700 + £200 = £900 | Individual work, monitored, helped Written on scrap paper or on plastic response'slates' Reasoning, agreement, self- correction, praising |
| Extension | Listen carefully and think about how you would work out the answer to this problem. Steve and Tom have £800 altogether in their bank accounts. Steve has £300 more than Tom. How much does Tom have? X, how would you work it out? Who agrees? Who thinks another way? etc. Most logical solution: First take off Steve's extra £300: £800 – £300 = £500 Steve and Tom will have equal amounts of the £500: £500 ÷ 2 = £250 So Tom has £250 and Steve has £250 + £300 = £550. 45 min | Whole class activity T repeats slowly Give Ps time to think and discuss with their neighbours Reasoning, agreement, praising Or on one line: $\pounds 500$ $(\pounds 800 - \pounds 300) \div 2 = \pounds 250$ Check: $\pounds 250 + \pounds 550 = \pounds 800$ |

| Y3 | R: Mental calculation C: Estimation of sums E: Numbers up to 2000 | Lesson Plan 86 |
|-----------|---|--|
| Activity | | Notes |
| 1 | Methods of Estimation 1Look at this diagram. How could we estimate the sum?BB:AB | Whole class activity Drawn on BB or use model coins stuck to BB. |
| | $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$ | Ps suggest how to estimate Class agrees/disagrees. |
| | a) Estimate by rounding to the nearest hundred: BB: A \approx 400, B \approx 200, A + B \approx 400 + 200 = <u>600</u> A < 400 and B < 200, so A + B < 600 | T confirms these 3 methods Reasoning, agreement, praising |
| | b) Estimate by rounding to the nearest ten: BB: A \approx 360, B \approx 150, A + B \approx 360 + 150 = <u>510</u> A > 360 and B > 150, so A + B > 510 | Ps copy into <i>Ex. Bks</i> . |
| | c) BB: $360 < A < 370$ 150 < B < 160 so $510 < A + B < 530$ | |
| | What is the <u>exact</u> sum? (BB: $A + B = 361 + 152 = 513$) Which method do you think is best? (rounding to the nearest 10) | (510 + 1 + 2) Discussion, agreement, praising |
| 2 | Methods of Estimation 2 | Whole close activity |
| | Listen carefully and think how you could estimate the sum. In a shop window there is a dinosaur for £3 21 p and a teddy bear for £2 15 p. Estimate how much we would need to save if we wanted to buy both of them. | T could have soft toys to show if possible, with price tags attached |
| | What could we do to make it easier for us? (Change the \pm s and pence into pence.) BB: D = 321 p and T = 215 p | Ps keep in mind what they did in Activity 1. |
| | a) Estimation after rounding to the nearest 100 p (£): BB: D ≈ 300 p (= £3), T ≈ 200 p (= £2), D + T ≈ 300 p + 200 p = <u>500 p</u> (= £5) | Discussion, reasoning, agreement, praising |
| | D > 300 p and T > 200 p, so D + T > 500 p | Feedback for T |
| | b) Estimation after rounding to the nearest 10 p: BB: $D \approx 320 \text{ p}, T \approx 220 \text{ p}, D + T \approx 320 \text{ p} + 220 \text{ p} = 540 \text{ p}$ D > 320 p but $T < 220 p$, so we can't add them. | Ps copy into <i>Ex. Bks.</i> |
| | c) Estimation using inequalities: BB: $320 p < D < 330 p$ 210 p < T < 220 p | |
| | so $530 p < D + T < 550 p$ | (A place then the estimate in h) |
| | What is the <u>exact</u> sum? (BB: $D + T = 321 p + 215 p = 536 p$ = £5 36 p) | (4 p less than the estimate in b) Agree that method b) is closest |
| | 10 min | |

| Lesson | Plan | 86 |

| Y3 | | Lesson Plan 86 |
|-----------|--|---|
| Activity | | Notes |
| 3 | Estimation by rounding to the nearest 100 | Whole class activity |
| | Let's estimate these sums by rounding to the nearest hundred: BB: a) $213 + 342 \approx (200 + 300 = 500)$ b) $148 + 567 \approx (100 + 600 = 700)$ | T has BB (SB or OHT or flipchart) already prepared |
| | c) $527 + 261 \approx (500 + 300 = 800)$ d) $354 + 369 \approx (400 + 400 = 800)$ Ps come out to BB, explaining reasoning. Class points out errors. Which estimate is more (less) than the exact sum? a) $500 < 213 + 342$, as both numbers have been rounded down d) $800 > 354 + 369$, as both numbers have been rounded up. 13 min | At a good pace Reasoning, agreement, praising Agreee that in b) and c), one number has been rounded <u>up</u> and the other number has been rounded <u>down</u> |
| 4 | Estimation by rounding to the nearest 10 | Whole class activity |
| | Let's estimate the same sums by rounding to the nearest ten: BB: a) $213 + 342 \approx (210 + 340 = 550)$ (both rounded <u>down</u>) b) $148 + 567 \approx (150 + 570 = 720)$ (both rounded <u>up</u>) c) $527 + 261 \approx (530 + 260 = 790)$ (One <u>up</u> , one <u>down</u>) | T has copy of previous activity's sums on another SB or flipchart or OHT At a good pace |
| | d) $354 + 369 \approx (350 + 370 = 720)$ (One <u>down</u> , one <u>up</u>) Ps come out to BB explaining reasoning. Class points out errors | Reasoning, agreement, praising |
| | Which estimates are more (less) than the exact sum? a) $213 + 342 > 550$ b) $148 + 567 < 720$ | c) and d): one <u>up</u> and one <u>down</u> , so not easy to compare |
| 5 | 10 min | |
| 3 | Let's estimate the same sums by writing inequalities: | Whole class activity |
| | BB: a) $210 < 213 < 220$ b) $140 < 148 < 150$ $340 < 342 < 350$ $560 < 567 < 570$ $550 < 213 + 342 < 570$ $700 < 148 + 567 < 720$ c) $520 < 527 < 530$ d) $350 < 354 < 360$ $260 < 261 < 270$ $360 < 369 < 370$ $780 < 527 + 261 < 800$ $710 < 354 + 369 < 730$ Ps come out to BB, explaining reasoning. Class points out errors. $20 min$ | At a good pace Reasoning, agreement, praising Rest of class write inequalities in <i>Ex. Bks</i> |
| 6 | Pby3b, page 86 | Individual work monitored |
| | Q.1 Read: a) Circle in red the 3-digit numbers in the 2nd row. b) Circle in green the 3-digit even numbers in the 3rd column from the left. c) Circle in yellow the 2 digit odd numbers in the 3rd | Drawn on BB or use enlarged copy master or OHP (Practice in following |
| | c) Circle in years ine 2-argui out numbers in the Star row from the bottom. d) Circle in blue the odd numbers in the 6th column | instructions and even/odd) Agreement, self-correction, |
| | from the right. | praising Feedback for T |
| | Review at BB with whole class. Mistakes discussed and corrected. Solution: a) 100, 111, 126, 135 b) 160 | What other questions could you ask about the numbers in the grid? |
| | c) 11, 37 , 59 d) 11, 157 | Praise creativity |

| 6 | PbY3b, page 87 | |
| Ū | Q.3 Read: How can the butterfly get to the flower? Calculate the length of possible routes. | Individual work, monitored, helped |
| | Elicit the units used (m, cm) and that $100 \text{ cm} = 1 \text{ m}$ (BB). | Drawn on BB or use enlarged copy master or OHP |
| | Talk about the fact that the diagram is not drawn to scale, so the lengths cannot be measured, only calculated. | Discussion, agreement, |
| | Ps do calculations in <i>Pbs</i> (using m, $m + cm$ or cm as the units). | Demonstration |
| | How long is the shortest (longest) route. Show me now! (7 m 72 cm, 9 m 54 cm) | Written on scrap paper or |
| | Ps explain how they got their answers. Mistakes discussed | 'slates'. Shown in unison Reasoning, agreement, self- |
| | Solution: e.g. using cm | correction, praising |
| | 1. $532 \text{ cm} + 240 \text{ cm} = 772 \text{ cm} = 7 \text{ m} 72 \text{ cm}$ | |
| | 2. $532 \text{ cm} + 111 \text{ cm} + 212 \text{ cm} = 855 \text{ cm} = 8 \text{ m} 55 \text{ cm}$ | (A many ible menter) |
| | 3. $603 \text{ cm} + 212 \text{ cm} = 8 \text{ m} 15 \text{ cm}$ | (4 possible routes) |
| | 4. $603 \text{ cm} + 111 \text{ cm} + 240 \text{ cm} = 9 \text{ m} 54 \text{ cm}$ | |
| | 40 min | |
| 7 | Problem | Whole class activity |
| | Listen carefully, do the calculation in your <i>Ex. Bks</i> if you need to, then show me the answer when I say. | T repeats slowly and Ps |
| | Emma has £125 and Diane has £352. How much money do they have altogether? | Written on scrap paper/slates |
| | Show me now! (£477) X , explain to us how you worked it out. | In unison. |
| | then tens, then units; or adding units first, then tens, then hundreds) | Show in a place value table. |
| | 45 min | Price value motor |

Week 18

| Y3 | R: Mental calculation. Quantities C: Addition. Pencil and paper methods. HTU + (H)TU E: Numbers up to 2000 | Lesson Plan 88 |
|-----------|---|---|
| Activity | | Notes |
| 1 | Puzzle Study this puzzle. The \longrightarrow arrow means – 200 and the \implies arrow means + 500. What are the missing numbers? What do the \longrightarrow and \longrightarrow arrows mean? BB: 500^{+300} 1100^{+300} 1400 $+500^{+500}$ $+500^{-1}$ | Whole class activity Drawn on BB or use enlarged copy master or OHP Reasoning, agreement, praising Feedback for T |
| | $\begin{array}{c ccccccccccccccccccccccccccccccccccc$ | Extension If all the arrows pointed in the opposite direction, what would the arrows mean? |
| 2 | Competition T divides class into 3 or 4 teams (of roughly equal ability). T writes a number for each team on different parts of the BB (or on SB, flip chart, or large sheets of paper stuck to wall). I will give you 3 minutes to write as many different ways as you can to describe your number. You must start and stop when I say. Start now! Ps from each team come to BB one after another to write different descriptions. Rest of team correct their team-mates' errors, point out repetitions and note ideas from other teams Stop! Review each team's descriptions. The team with most correct statements is the winner. If two teams have the same number of statements, the class chooses the team with the most creative descriptions as the winner. | Whole class activity At a good pace e.g. 342 300 + 42 $100 + 121 \times 2$ 171×2 3H + 4T + 2U $684 \div 2$ 150 + 192 etc. Class applauds the winners |
| 3 | Written exercises Do these calculations in your <i>Ex. Bks.</i> T dictates the numbers. a) $140 + 30 = (170)$ b) $57 + 62 = (119)$ 110 - 50 = (60) $84 + 57 = (141)500 + 800 = (1300)$ $62 - 40 = (22)900 - 400 = (500)$ $91 - 37 = (54)c) 670 + 220 = (890) d) 6 \times 300 = (1800)330 + 670 = (1000) 7 \times 200 = (1400)1000 - 280 = (720) 70 \times 8 = (560)1400 - 680 = (720) 1200 \div 3 = (400)Review after each part with the whole class. Ps explain how they didthe calculations. Mistakes discussed and corrected.Write details of difficult calculations on the BB.e.g. 57 + 62 = 57 + 60 + 2 = 117 + 2 = 119, or(50 + 50 + 10) + (7 + 2) = 110 + 9 = 11991 - 37 = 91 - 30 - 7 = 61 - 1 - 6 = 54$, or 91 - 37 = 91 - 31 - 6 = 60 - 6 = 54 1400 - 680 = 1400 - 600 - 80 = 800 - 80 = 720, or 1400 - 680 = 1400 - 700 + 20 = 700 + 20 = 720 | Individual work T could have SB or OHT already prepared in case of difficulties Reasoning, agreement, self- correction, praising Ps explain how they did the calculations. Elicit that there are 4 × 4 = 16 operations. Who had 16 correct? Who had more than 12 (less than 10) correct? What were your mistakes? etc. T notes Ps having difficulties Stars, stickers, etc awarded. |

| Y3 | | Lesson Plan 88 |
|---------------|--|--|
| Activity 4 | Vertical addition Let's add two 3-digit numbers, 321 and 513. First let's estimate the sum | <i>Notes</i> Whole class activity Tables and grids drawn on BB |
| | estimate? (By rounding each number to the nearest 10) BB: $321 + 513 \approx 320 + 510 = \underline{830}$ Let's show the numbers in this diagram BB: T shows first number. Ps come out to draw the correct number of hundreds, tens and units for the 2nd number. Then they draw the total amount, explaining reasoning. Class agrees/disagrees. Elicit that the total is $8H + 3T + 4U$. Let's write it in a place value table. Ps come out to write the digits. Class agrees/disagrees. T explains how to add vertically. 1. First we add the units. 1 Unit + 3 Units = 4 Units 2. Then we add the tens BB: $H T U$ 3 2 1 | or use enlarged copy master or OHP T demonstrates/explains by drawing or sticking coins on BB At a good pace T helps Ps where necessary Reasoning, agreement, praising With T's help if ncesssary T explains and asks whether |
| | 2 Tens + 1 Ten = 3 Tens 3. Then we add the hundreds 3 Hundreds + 5 Hundreds = 8 Hundreds Let's read the sum: 'eight hundred and thirty four'. Agree that 834 \approx 830, so answer is probably correct. We can write the table in a shorter way like this. Does it matter whether we add up or down? (No because in addition the order does not matter.) We can check it by adding in the <u>opposite</u> direction. $3 \frac{2}{8} \frac{1}{3}$ $3 \frac{2}{3} \frac{1}{4}$ | anyone does not understand. In unison Discussion, agreement e.g. Calculation ↓ Check ↑ |
| 5 | PbY3b, page 88, Q.1Read: How much money do the two children have altogether? Complete the drawing, then estimate, calculate and check the answer.Work through solution as in previous activity. Ps come out to BB to draw, write and explain (with T's guidance) and class points out errors. Rest of pupils write in Pbs.BB: Alice:More that the section of the two the section of the two the section of the two the two the two the two the two the section of two the two | Whole class activityDrawn on BB or use enlarged copy master or OHPAt a good paceReasoning, agreement, praisingWhole class reading of vertical addition (down):'2 Units + 6 Units = 8 Units''7 Tens + 1 Ten = 8 Tens''4 Hundreds + 2 Hundreds = 6 Hundreds'Agree that 688 \approx 690, so answer is probably correct <i>Check</i> further by adding <u>up.</u> Elicit the short way to write the table.Note that no unit of money is given. What could it be? (p) |

Y3

Addition 2

Here is another sum. What numbers are being added? (618 + 471)What should we do first? (Estimate the sum). Ps come out to write estimate by rounding the terms to the nearest 10. Class agrees/disagrees. BB: $618 + 471 \approx 620 + 470 = 600 + 400 + 20 + 70 = 1000 + 90 = 1090$

Let's see if you can do this addition by yourselves. (T can guide Ps through it if necessary and review after each step: drawing, estimation, place value table, short form in grid.) If all done as individual work, review at BB with whole class. Ps dictate to T or come to BB (or T could have solution already prepared and uncover each part as it is dealt with).

Checks done. Mistakes discussed and corrected.

Solution:

(If necessary, show interim step in diagram and place value table as in *Activity 3.*)

22 min _

Notes

Whole class activity

Tables and grid drawn on BB or use enlarged copy master or OHP (or use model money)

Reasoning, agreement, praising At a good pace

Ps suggest what should be done (with T's help).

Encourage Ps to say clearly what they are doing, e.g.

'8 units + 1 unit = 9 units, so I write 9 in the units column;

1 ten + 7 tens = 8 tens, so Iwrite 8 in the tens column;

6 hundreds + 4 hundreds = 10 hundreds, but 10 hundreds = 1 thousand, so I write zero in the hundreds column and 1 in the thousands column.'

Ps write short form in Ex. Bks

Individual trial, monitored, helped

(or whole class activity if T thinks Ps are still unsure)

Drawn on BB or use enlarged copy master or OHP

Discussion, reasoning, checking, agreement, selfcorrection, praising

Discuss why sum is more than estimate (both terms were rounded <u>down</u>)

T encourages Ps to read out additions in detail:

'2U + 3U = 5U, so I write 5 in the units column;

4T + 5T = 9T, so I write 9 in the tens column;

3H + 7H = 10H = 1Th + 0T, so I write 0 in the tens column and 1 in the thousands column.' Feedback for T

| | 5 | 7 ₁ ← | <u>(</u>)3 | | 5 | 8 | 3 |
| | 5 | 8 | 3 | | | | |

Elciti that: 13 units = 1 ten + 3 units

_ 26 min _

PbY3b, page 91

6

Q.2 Read: Complete the drawing. Round the numbers to the nearest whole ten. Estimate, then calculate the sum.

Let's see if you can do this addition by yourselves. (T can guide Ps through it if necessary and reviews after each step: drawing, estimation, place value table, short form in grid.) If all done as individual work, review at BB with whole class. Ps dictate to T or come to BB (or T could have solution already prepared and uncover each part as it is dealt with).

Checks done. Mistakes discussed and corrected.

Solution:

 $537 + 259 \approx 540 + 260 = 800$

. 31 min __

Notes

Whole class activity

Tables and grid drawn on BB or use enlarged copy master or OHP (or model money)

Reasoning, agreement, praising

Allow Ps to suggest what to do throughout and encourage other Ps to point out errors.

Encourage Ps to say clearly what they are doing, e.g.

"6U + 7U = 13 U, but 13 U = 1T + 3U, so I write 3 in the units column in the answer and add 1 to the tens column;

1T + 3T + 4T = 8T, so I write 8 in the tens column in the answer;

2H + 3H = 5H, so I write 5 in the hundreds column in the answer. The sum is 583.

Ps write short form in *Ex.Bks*.

Individual trial, monitored,

(or whole class activity if T

Drawn on BB or use enlarged

thinks Ps are still unsure)

copy master or OHP

Discussion, reasoning,

checking, agreement, selfcorrection, praising

Ps read addition aloud in

1T + 3T + 5T = 9T

5H + 2H = 7H

The sum is 796.

Feedback for T

7U + 9U = 16U = 1T + 6U

Agree that 796 \approx 800, so

sum is probably correct

helped

detail.

Answer:

books altogether.

Q.4 Read: Round these numbers to the nearest a) 10, b) 100. Review orally with whole class. Mistakes corrected. If time, additional numbers for each part can be done orally.

_ 45 min _

| | R: Mental calculation. Vertical addition | Lesson Plan | | | | |
|------------|--|--|--|--|--|--|
| Y 3 | C: Problems in context (addition) | 92 | | | | |
| | E: Numbers up to 2000 | 12 | | | | |
| Activity | | Notes | | | | |
| 1 | Sequences | Whole class activity | | | | |
| | T says first 3 terms of a sequence. Ps continue it and then give the rule. | T chooses Ps at random | | | | |
| | a) 867, 878, 889, (900, 911, 922, 933, 944, 955,) Rule: +11 | At difficult steps, T suggests | | | | |
| | b) 432, 543, 654, (765, 876, 987, 1098, 1209,) Rule: +111 | Bks. using vertical addition. | | | | |
| | c) 333, 456, 579, (702, 825, 948, 1071, 1194,) Rule: +123 | Praising, encouragement only | | | | |
| | 10 min | | | | | |
| 2 | Analysis of addition | | | | | |
| | Let's do these additions. Ps come to BB to do calculations, explaining | Whole class activity | | | | |
| | reasoning. Study the additions and the diagram. What do you notice? | Drawn on BB or use enlarged copy master or OHP | | | | |
| | a) 4 5 3 | Reasoning, agreement, | | | | |
| | + 2 7 5 453 275 | praising | | | | |
| | $\frac{1}{2} \frac{1}{2} \frac{1}$ | | | | | |
| | 3 5 3 + 3 7 5 353 + 375 | Ps can copy into <i>Ex. Bks</i> too | | | | |
| | | | | | | |
| | c) 5 5 3 | | | | | |
| | + 1 7 5 553 175 | | | | | |
| | | | | | | |
| | Elicit that, e.g.: | Discussion, agreement, | | | | |
| | a) \rightarrow b): The first number decreased by 100, but the 2nd number increased by 100 so the sums are the same | praising | | | | |
| | b) \rightarrow c): The first number increased by 200 but the 2nd number | Feedback for T | | | | |
| | decreased by 200, so the sums are the same. etc. | | | | | |
| | 15 min | | | | | |
| 3 | Problem 1 | | | | | |
| | Listen carefully and think how you would solve the problem. | Whole class activity | | | | |
| | Ally, Betty and Cindy Squirrel collected acorns for their winter store. | T repeats slowly and Ps make a note of the data | | | | |
| | Ally collected 325 acorns, Betty collected 231 acorns and Cindy collected 516 acorns. How many acorns did they collect altogether? | a note of the data. | | | | |
| | What should we do first? Who agrees? What should we do next? etc. | Discussion, reasoning, | | | | |
| | Ps come to BB to write data, plan, estimate, calculation in place value | agreement, checking, praising | | | | |
| | table and in short form in grid. Check by comparing with the estimate | Calculate \downarrow and check \uparrow | | | | |
| | BB' e g | or vice versa | | | | |
| | Data: A: 325 B: 231 C: 516 Plan: $A + B + C = 325 + 231 + 516$ | Agree that 1072 ≈ 1080 | | | | |
| | E: 330 + 230 + 520 = 300 + 200 + 500 + 30 + 30 + 20 - 1000 + 80 | Ps write short form in <i>Ex. Bks</i> | | | | |
| | = 1080 | T points out that it would have | | | | |
| | $\begin{array}{c c c c c c c c c c c c c c c c c c c $ | rounding to the nearest 100: | | | | |
| | $\begin{array}{c ccccccccccccccccccccccccccccccccccc$ | $E: \ 300 + 200 + 500 = \ 1000$ | | | | |
| | $+ \frac{5}{00} \frac{16}{600} + \frac{5}{100} \frac{16}{100} + \frac{5}{100} \frac{16}{100} \frac{16}{1$ | but that rounding to the | | | | |
| | $\frac{e_{UU} + e_{UU}}{1 + 0} = \frac{1}{7} + \frac{1}{2} = \frac{1}{2$ | nearest 10 is closer. | | | | |
| | Anguar They collected 1072 accorns altogether | Ps say answer in unison. | | | | |
| | Answer: They conected 10/2 acoms anogener. | | | | | |
| | 20 min | | | | | |

| Y3 | | Lesson Plan 92 |
|-----------|--|---|
| Activity | | Notes |
| 4 | Missing digits | Whole class activity |
| | What digits do you think are missing from this addition? | BB: 1 2 9 |
| | Ps come out to fill in the digits, explaining reasoning. Class agrees/ disagrees Let's check it (by doing calculation again) | + 4 3 8 |
| | Who can make other additions from these digits which also have sum | 5 6 7 |
| | 567? T writes what Ps dictate. Ps explain their reasoning. Class checks it by mentally calculating in opposite direction. | Agreement, praising |
| | BB: e.g. $4 2 9 4 2 8 2 1 9$ etc. + 1 3 8 + 1 3 9 + 3 4 8 | (or individual work in <i>Ex. Bks</i> if Ps wish) |
| | 567 567 567 | Feedback for T |
| | 25 min | |
| 5 | PbY3b, page 92 | |
| | Q.1 Read: Estimate, then calculate the sums. Write the estimates in detail. | Individual work, monitored, helped |
| | Deal with one part at a time. Review at BB with whole class. | T suggests to Ps who have |
| | Solution: | being carried over in their head |
| | a) $513 + 521 \approx 510 + 520 = 1030 < \frac{1513}{1034}$ | to write the number (in a smaller size) above or below the column |
| | b) $634 + 723 \approx 630 + 720 = 1350 < \frac{\begin{array}{r} 1 & 6 & 3 & 4 \\ + & 7 & 2 & 3 \\ \hline 1 & 3 & 5 & 7 \end{array}}{1 & 3 & 5 & 7 \end{array}$ | T reminds Ps about checking sums by comparing with |
| | c) $358 + 411 \approx 360 + 410 = 770$ $+ \frac{358}{411} + \frac{411}{769}$ | estimates. Discussion, reasoning, |
| | d) $476 + 218 \approx 480 + 220 = 700 > + 218$ | checking, agreement, self- correcting, praising |
| | $\frac{\overline{694}}{563}$ | Encourage Ps to say the calculations in detail. |
| | e) $563 + 295 \approx 560 + 300 = 860 + \frac{295}{858}$ | Who had all 5 sums correct? |
| | Which addition is different from the others? (Part c) does not | Stars/stickers etc. awarded |
| | involve crossing tens.) | |
| 6 | Problem 2 | |
| - | Listen carefully, write the data in your <i>Ex. Bks</i> , do the calculation, check it and show me the answer when I say. | Individual (or paired) work, monitored, helped |
| | I am making a birthday cake from these ingredients. | T repeats slowly once of twice |
| | 250 g of sugar, 190 g of butter, 300 g of flour, 100 g of raisins, | while Ps make a note of data. |
| | 50 g of shelled walnuts, 50 g of chocolate, 100 g of cherries, 2 eggs. What will the total weight of the cake be if each egg weighs 60 g? | Give Ps time to do calculation |
| | Show me the answer now! (1160 g) | Reasoning checking |
| | Ps with correct response explain to the rest of the class. Who agrees? Who did it a different way? etc. Mistakes discussed and corrected. | agreement, self-correction, praising |
| | <i>Data</i> : S: 250 g, B: 190 g, F: 300 g, R: 100 g, W: 50 g, Cho: 50 g, Che: 100 g, 2 E: 2×60 g = 120 g | <i>Calculation</i> : vertical, |
| | <i>Plan</i> : (250 + 190 + 300 + 100 + 50 + 50 + 100 + 120) g | hundreds first, then tens) |
| | Answer: The total weight of the cake will be 1160 g. (= 1 kg 160 g) | T can check with a calculator. |

| Y 3 | | Lesson Plan 92 |
|---------------|---|---|
| Activity | | Notes |
| Activity 7 | PbY3b, page 92 Q.2 Read: Mum wants to make matching dresses for herself and her daughter, Julia. She needs 2 m 35 cm for her own dress and 1 m 25 cm for Julia's dress. How much material will she need to buy altogether? Ps write the data, make a plan, estimate the sum, do the calculation, check it and write the answer as a sentence. Review at BB with whole class. Ps can show result on scrap paper or 'slates' on command. Ps who answered correctly explain to Ps who did not (wih T's help). Mistakes discussed and corrected. Solution: Data: M: 2 m 35 cm = 235 cm, J: 1 m 25 cm = 125 cm Plan: M + J: 235 cm + 125 cm Estimate: 235 cm + 125 cm ≈ 240 cm + 130 cm = 370 cm Calculation: $2\frac{3}{5}$ ↓ ↑ $Check: 360 \approx 370$ $+\frac{125}{2}$ ↓ ↑ or 2 m 35 cm + 1 m 25 cm | NotesIndividual work, monitored, helpedPs may use $Ex. Bks$ if there is not enough room in Pbs .Ps do calculation in whichever way they wish, using which- ever unit they prefer.Results shown in unison Reasoning, checking, agreement, self-correction, praisingT shows vertical addition in place value table, giving details of the additionsBB: $H T U$ $2 3 5$ $1 2 5$ |
| | $\frac{3 60}{3 \text{ m} + 60 \text{ cm}} = 2 \text{ m} + 1 \text{ m} + 35 \text{ cm} + 25 \text{ cm}$ $= 3 \text{ m} + 60 \text{ cm} = 3 \text{ m} 60 \text{ cm}$ Answer: Mum will need to buy 360 cm (= 3 m 60 cm) of material. 40 min | $\begin{array}{c} 3 & 5 \leftarrow 0 \\ \hline 3 & 6 & 0 \end{array}$ |
| 8 | PB13b, page 92 Q.3 Ps read problems themselves and solve them. Set a time limit. Review at BB with whole class. Ps explain method of solution and discuss and correct mistakes. a) Kate used a 23 cm 5 mm piece of ribbon to tie up her hair. Linda used a piece 12 cm 5 mm less than Kate's. What length was Linda's ribbon? Solution: Data: K: 23 cm 5 mm = 235 mm, L: K – 125 mm Plan: 235 mm – 125 mm ≈ 240 mm – 130 mm = 110 mm Check: Calculated difference = estimate Answer: The length of Linda's ribbon was 110 mm. (= 11 cm) b) Dad bought a piece of wood and cut it into two pieces, one 2 m 35 cm and the other 3 m15 cm long. What length of wood did Dad buy? Data: 2 m 35 cm + 315 cm | Individual work, monitored, helped Differentiation by time limit Reasoning, checking, agreement, self-correction, praising $Calculation: -\frac{2}{1} \frac{2}{2} \frac{5}{5} \frac{5}{1} \frac{1}{10}$ or 23 cm 5 mm - 12 cm 5 mm = 11 cm 0 mm = 11 cm $Calculation: -\frac{2}{3} \frac{3}{5} \frac{5}{5} \frac{1}{5} \frac{5}{5} $ |
| | <i>Estimate</i> : 235 cm + 315 cm \approx 240 cm + 320 cm = 560 cm <i>Check</i> : 550 cm \approx 560 cm (less because both rounded up) <i>Answer</i> : The length of wood Dad bought was 560 cm (= 5 m 50 cm) 45 min | or 2 m 35 cm + 3 m 15 cm = 2 m + 3 m + 35 cm + 15 cm = 5 m + 50 cm = 5 m 50 cm |
| Y3 | R: Mental calculation C: Addition E: Numbers up to 2000 | Lesson Plan 93 |
|-----------|---|---|
| Activity | | Notes |
| 1 | Rounding practiceStudy this table and think what the rule is. Ps come out to choose a column and fill in missing numbers. Class agrees/disagrees.BB:A6183441923961557436082225559991206B60030020040020070060020060010001200C62034019040016074061022056010001210Elicit that:B is A rounded to the nearest 100 C is A rounded to the nearest 100 (B is also C rounded to the nearest 100) | Whole class activity Table drawn on BB or use enlarged copy master or OHP Bold numbers are given At a good pace Reasoning, agreement, praising Feedback for T |
| 2 | Sequences T says first few terms of a sequence. Ps continue it and then give the rule. a) 920, 870, 820, (770, 720, 670, 620, 570, 520,) Rule: - 50 b) 327, 368, 409, (450, 491, 532, 573, 614, 655,) Rule: + 41 c) 2, 3, 5, 8, 12, 17, (23, 30, 38, 47, 57, 68, 80, 93, 107,) (1 2 3 4 5 6 7 8 9 10 11 12 13 14) Rule: The difference is increasing by 1. | Whole class activitya) and b) done orally roundclass. If a P makes a mistake,the next P corrects it.c) Ps come to BB to writeeach term (or dictate to T)Discussion on the rule.Agreement, praising |
| 3 | Addition practice Let's estimate these sums by rounding the terms to the nearest 10, then do the calculation. Ps check by comparing with estimate and by doing the calculation in reverse order. Show in place value table if necessary. BB: a) $328 + 17 + 114 ~(\approx 330 + 20 + 110 = 460)$ $+ 114 \\ \frac{459}{1326}$ b) $1326 + 9 + 35 ~(\approx 1330 + 10 + 40 = 1380)$ $> 9 \\ + \frac{35}{1370} \\ \frac{1}{34}$ c) $34 + 128 + 1416 ~(\approx 30 + 130 + 1420 = 1580)$ $\frac{128}{+ \frac{1416}{1578}}$ | Whole class activity T chooses Ps to work at BB and rest of class work in <i>Ex. Bks</i> (or on squared paper) Reasoning, agreement, checking, praising Ps explain additions in detail: a) '8U + 7U + 4U = 19U = 1T + 9U', so I write 9 in the units column and add 1T to the tens column', etc. Stress the importance of writing the digits in the correct column. T can check with a calculator. |
| | 15 min | |

| Lesson | Plan | 93 |
|--------|------|----|
|--------|------|----|

| Y3 | | Lesson Plan 93 |
|-----------|--|---|
| Activity | | Notes |
| 4 | Problem | Whole class activity |
| | Listen carefully, write the data in your <i>Ex. Bks.</i> and think how you would solve it. Draw a rough picture of each toy if you want to. <i>Molly wants to buy some toys.</i> Shc can choose from a teddy bear at <u>£6 41 p</u>, a game at <u>£7 16 p</u>, a doll at <u>£6 24 p</u>, a ball at <u>£3 28 p</u> and a boat at <u>£4 56 p</u>. If she bought any 2 of them, she would have some money left, but not enough to buy 3 of the toys. How much money could Molly have? T asks several Ps what they think and class agrees on a method of solution. T writes what Ps dictate on BB and Ps write in <i>Ex. Bks.</i> | T could have drawings or pictures cut out of magazines stuck to BB with price labels beneath each one. T repeats slowly Give Ps time to think and discuss with their neighbours. Reasoning, agreement, checking, praising |
| | 1) Molly has more money than the total cost of the 2 most expensive toys. BB: $M > \pounds 7 \ 16 \ p + \pounds 6 \ 41 \ p + \frac{641}{1357}$ | (or $\pounds 7 + \pounds 6 + 16 p + 41 p$) |
| | 2) Molly has <u>less</u> money than the total cost of the 3 cheapest toys. BB: $M < \pounds 3 \ 28 \ p + \pounds 4 \ 56 \ p + \pounds 6 \ 24 \ p$ $M > \pounds 14 \ 08 \ p$ So Molly has more than £13 57 p, but less than £14 \ 08 p. | (or $\pounds 3 + \pounds 4 + \pounds 6 + 28 \text{ p} + 56 \text{ p}$ + 24 p = $\pounds 13 + 108 \text{ p}$ = $\pounds 14 08 \text{ p}$) BB: $\pounds 13 57 \text{ p} < \text{M} < \pounds 14 08 \text{ p}$ |
| | Who can write it mathematically? Who can write it in £s only? | $\pounds 13.57 < M < \pounds 14.08$ |
| 5 | Analysing mistakes Harry Harum-Scarum has done his homework. Let's see if he has done it well. Ps come to BB to estimate the sums first and tick or cross out the answers, explaining reasoning. Class agrees/disagrees. | Whole class activity in analysing mistakes T has BB or SB or OHT |
| Extension | Lets see if you can do the additions correctly in your <i>Ex. Bks.</i> Review quickly at BB with whole class. Mistakes corrected. BB: a) 385 b) 2 7 c) 946 d) 563 e) 56 | already prepared Reasoning, agreement, praising Individual work in finding |

| | e) 412, 5, 331, f) 8, 325, 39, g) 25, 671, 60, f) 853, 4, 211, 41 430 251 20 | (Ps can write Th, H, T, U above their columns if they need to.) |
| | $\begin{array}{cccccccccccccccccccccccccccccccccccc$ | T asks Ps how many they had correct out of 8. |
| | 331 39 60 $211+ 41 + 430 + 251 + 20$ | Class applauds excellent work |
| | $\frac{1}{789} \qquad \frac{1}{802} \qquad \frac{1}{1007} \qquad \frac{1}{1088}$ | Feedback for T |
| | 28 min | |
| 5 | PbY3b, page 94, Q.2 | |
| | Read: In how many different ways can Jenny choose from these treats? | Whole class activity |
| | alk about the pictures first. Let's label them A, B, C and D so that we do not have to write their names each time. (Ps label in <i>Pbs</i> too.) | Pictures drawn on BB or use |
| | ^{BB:} A B C D | (or cut out of magazines and stuck to BB) |
| | Toffees | Stress that in maths, we try to use short ways to express things whenever we can. |
| | T asks several Ps what they would choose if they could buy only 1 thing (2 things). Why? | Discussion. Ps give reasons for their choice. |
| | a) Read: Write how much she would pay if she bought at most two things. | |
| | Elicit that Jenny could buy either (1) thing or (2) things and relate to letters, numbers and missing amounts in <i>Pbs</i> . | Discussion, reasoning, checking, agreement, praising |
| | Ps come to BB to fill in the amounts, explaining reasoning. Details of calculations can be done at the side of the BB (or Ps can work in <i>Ex. Bks.</i>). Class points out errors. | Rest of Ps write in <i>Pbs</i> too. |
| | (1) A: £ 1 62 p or B: £1 36 p or C: £5.45 p or D: £4 94 p | Agree that there are 4 cases |
| | (2) $A + B$: £2 98 p, or $A + C = $ £7 07 p, or $A + D = $ £6 56 p. | Ps suggest the missing cases. |
| | $B + C = \pounds 6 \$1 p, \text{ or } B + D = \pounds 6 \$0 p, \text{ or } C + D = \pounds 10 \$9 p$ | Agree that there are |
| | (Details of additions can be written horizontally or vertically.) | $1 \times 3 \times 2 = \underline{6}$ cases |
| | | |

| | Lesson Plan 94 |
|---|--|
| | Notes |
| b) Read: <i>Write how much she would pay if she bought at least 3 things.</i> Elicit that Jenny could buy either (3) things or (4) things and relate to letters, numbers and missing amounts in <i>Pbs.</i> | Discussion, reasoning, checking, agreement, praising |
| Ps come to BB to fill in the amounts, explaining reasoning. Details of calculations can be done at the side of the BB (or Ps can work in <i>Ex. Bks.</i>). Class points out errors. BB: | Rest of Ps work in Pbs. |
| (3) $A + B + C = \pounds 843 \text{ p, or } A + B + D = \pounds 792 \text{ p, or}$ | Ps suggest missing cases. |
| $A + C + D = \pounds 12 \ 01 \ p$, or $B + C + D = \pounds 11 \ 75 \ p$ (4 cases) | (Experience of combinations) |
| (4) $A + B + B + C + D = \text{\pounds}13\ 37\ p$ (1 case) | |
| Who can write the prices in £s only? (£1.62, £1.36, £5.45, £4.94) | P come to BB or dictate to T Agreement, praising |
| | |
| Q.3 Do part a) then exercise your brains on part b)! T explains each part first. a) Read: <i>Fill in the missing digits</i> . Make sure that Ps realise that they should write digits only in the grid squares which have 'dashes' and that they should check by doing the additions again in their heads. Review quickly at BB with whole class. Mistakes corrected. <i>Solution:</i> a) i) ii) ii) ii) ii) iii) iii) iii) ii | a) Individual work, monitored helped Written on BB or use enlarged copy master/OHP Discussion, reasoning, checking, agreement, self- correction, praising Parts iv) and v) have several solutions – accept any correct answer. Feedback for T |
| b) Read: Write an addition which uses each of the digits from 0 to 9 once only. Try out different solutions. Use your exercise books if you need to. Make sure that Ps realise that each addition has 10 boxes (including the answer) and that there are 10 digits from 0 to 9. As soon as a P solves it, he/she shows solution to class. Class decides whether or not solution is valid. Possible solutions: 289 4764 053 | b) Individual or paired work, monitored This is a very challenging problem! Ps can manipulate number cards on desks, or use <i>Ex. Bks</i> to practice in and only write concrete solutions in <i>Pbs</i>. Extra praise if a P solves it during the lesson. Otherwise Ps can try to solve it at home if they wish. |
| | b) Read: Write how much she would pay if she bought at least 3 things. Elicit that Jenny could buy either (3) things or (4) things and relate to letters, numbers and missing amounts in <i>Pbs</i> . Ps come to BB to fill in the amounts, explaining reasoning. Details of calculations can be done at the side of the BB (or Ps can work in <i>Ex. Bks</i> .). Class points out errors. BB: (3) $A + B + C = \pounds 843 \text{ p}$, or $A + B + D = \pounds 792 \text{ p}$, or $A + C + D = \pounds 1201 \text{ p}$, or $B + C + D = \pounds 1175 \text{ p}$ (4 cases) (4) $A + B + B + C + D = \pounds 1337 \text{ p}$ (1 case) Who can write the prices in £s only? (£1.62, £1.36, £5.45, £4.94) 7bY3b, page 94 Q.3 Do part a) then exercise your brains on part b)! T explains each part first. a) Read: <i>Fill in the missing digits</i> . Make sure that Ps realise that they should write digits only in the grid squares which have 'dashes' and that they should check by doing the additions again in their heads. Review quickly at BB with whole class. Mistakes corrected. <i>Solution:</i> a) $\frac{1}{1568}$ $\frac{1}{191048}$ $\frac{1}{13340}$ $\frac{1}{1589}$ $\frac{1}{1589}$ $\frac{1}{1589}$ $\frac{1}{1336}$ b) Read: <i>Write an addition which uses each of the digits from</i> 0 to 9 once only. Try out different solutions. <i>Use your exercise books if you need to</i> . Make sure that Ps realise that each addition has 10 boxes (including the answer) and that there are 10 digits from 0 to 9. |-----------|---|--|
| Activity | | Notes |
| 1 | Rounding to the nearest 100 | Whole class activity |
| | Join up the numbers to the matching values if rounded to the nearest 100. Ps come out to join up the numbers, explaining reasoning. Class agrees/disagrees. Elicit that 50 rounds up to next 100. BB: $ \begin{array}{c} 200 & 400 & 700 & 600 & 800 \\ \hline 679 & 356 & 823 & 175 & 791 \\ \end{array} $ | Drawn on BB or use enlarged copy master or OHP (or shapes cut out and stuck to BB and Ps rearrange them into 'mushrooms') At a good pace Agreement, praising |
| | Which mushroom head does not have a matching stalk? (600) Which mushroom head belongs to more than one stalk? (800) | Ps think of values for a stalk Which is closer to 800? (791) |
| | T points to a number and Ps round it to the nearest 10. | At speed round class |
| 2 | Subtraction 1 What is the difference if I subtract from 950: a) 150 (950 - 150 = 800) b) 250 (950 - 250 = 700) b) 250 (950 - 250 = 600) b) 650 (950 - 250 = 700) | Whole class activity Ps come to BB to write subtractions (or dictate to T) |
| | c) 350 (950 - 350 = 600) d) 650 (950 - 650 = 300) e) 50? (950 - 50 = 900) What do you notice about how the differences change? Elicit that: If I subtract 100 more from the same amount, then the difference will be 100 less. If I subtract 100 less from the same amount, then the difference | Class points out errors Discussion, agreement, praising |
| | will be 100 more. 9 min | |
| 3 | Subtraction 2 What is the difference if I subtract 450 from: a) 850 (850 - 450 = 400) b) 950 (950 - 450 = 500) c) 750 (750 - 450 = 300) d) 650 (650 - 450 = 200) e) 500? (500 - 450 = 50) What do you notice about how the differences change? Elicit that: • If I subtract the same amount from a number which is 100 more, then the difference will be 100 more. • If I subtract the same amount from a number which is 100 less, then the difference will be 100 less. | Whole class activity Ps come to BB to write subtractions (or dictate to T) Class points out errors Discussion, agreement, praising |
| 4 | Problem Listen carefully and think how you would work out the answer. Two brothers had £674 in their bank accounts altogether. They bought a television set for £253. How much money did they have left ? Ps tell T what to do and dictate what to write on BB. Ps copy in Ex. Bks. BB: Data: Had: £674, Spent: £253, Plan: Have left: £674 - £253 E: £670 - £250 = £420 C: £674 - £253 = £421 Answer: They had £421 left. | Whole class activity (T could have a picture of a TV and price stuck to BB) Discuss rounding: to nearest 100 is easier but to nearest 10 is closer. Show money model on BB: 100 100 100 20 0 10 |

— 17 min –

| Y3 | | Lesson Plan 96 |
|-----------|--|--|
| Activity | | Notes |
| 5 | Estimation Let's estimate the difference by rounding to the nearest 100, then calculate it exactly. Ps come out to BB or dictate to T. BB: a) Had: 5 Spent: 5 Difference: (Too rough) 100 20 20 20 Estimation: $200 - 100 = 100$ | Whole class activity Use enlarged copy master or OHP or model money stuck to BB. Reasoning, agreement, praising Ps can do the calculations in |
| | 100 20 $5 \ge 100$ Exact amount: $245 - 55 = 190$ 245 ≈ 200 55 ≈ 100 Exact amount: $245 - 55 = 190$ b) Had: 5 Spent: 100 20 100 5 100 20 20 20 100 10 5 Estimation: $400 - 100 = 300$ 100 10 Exact amount: $355 - 145 = 210$ | their <i>Ex. Bks</i> . |
| | c) Had: 5 Spent: Difference: (o.k) 100 50 100 Estimation: $500 - 300 = 200$ 100 100 50 Exact amount: $465 - 250 = 215$ $465 \approx 500$ $250 \approx 300$ | Involve several Ps in discussion about the estimates. |
| | d) Had: 5 Spent: Difference: (o.k.) 100 100 20 100 \downarrow 100 100 20 20 Estimation: $600 - 100 = 500$ 100 100 20 5 Exact amount: $649 - 125 = 524$ $649 \approx 600$ 125 ≈ 100 125 ≈ 100 125 ≈ 100 | Agreement that care must be taken when estimating in subtractions; it is better to use more accurate estimates (e.g. to nearest 10). |
| | Do you think the estimates are close enough to the exact amount?a) Number being subtracted from (reductant) has been rounded down and number being subtracted (subtrahend) has been rounded up, i.e. more is being subtracted from less. The estimate is too small. | Ps do the estimates again orally by rounding to the nearest 10. a) <i>E</i> : 250 – 60 = 190 |
| | b) Number being subtracted from (reductant) has been rounded up and number being subtracted (subtrahend) has been rounded down, i.e. less is being subtracted from more. The estimate is too big.c) Both numbers have been rounded up, so estimate is quite close. | b) E: $360 - 150 = 210$ c) E: $470 - 250 = 220$ d) E: $650 - 130 = 520$ |
| | d) Both numbers have been rounded down, so estimate is quite close. | previous estimates) |
| 6 | PbY3b, page 96 Q.1 Read: Change the prices of the soft toys to pence. By rounding the prices to the nearest 10 p, estimate the difference between: a) the bear and the cat b) the elephant and the tortoise c) the elephant and the cat | Individual work, monitored, helped Drawn on BB or use enlarged copy master or OHP Reasoning, agreement, self- correcting, praising BB: (in pence) |
| Extension | a) the fortoise and the bear. Prices in pence reviewed orally before Ps do parts a) to d). Review at BB with whole class. Mistakes corrected. Ask Ps to give estimates orally as £s and pence. Calculate the <u>exact</u> costs. (T can check with a calculator.) | a) $B - C \approx 550 - 360 = 190$ b) $E - T \approx 870 - 650 = 220$ c) $E - C \approx 870 - 360 = 510$ d) $T - B \approx 650 - 550 = 100$ |

Y3

Differences

What is the difference between the amounts of money in the 2 wallets? Ps come out to BB to point to the bigger amount, then to estimate mentally and write a subtraction about it, saying each step loudly and clearly. Class checks with mental addition. (e.g. 2U + 4U = 6U, 4T + U5T = 9T, 3H + 1H = 4H, etc.) Show part c) in a place-value table. BB:

| | E: 500 - 150 = 350 | ······ | | | |
|----|--------------------|-------------------------------|---|-----|-----------------|
| a) | | <u>4</u> 9 6 350 ≈ 342 | | | |
| u) | £496 @ £154 @ | $-154 \uparrow Check:$ | | | |
| | | 3 4 2 | | | |
| | E: 590 - 330 = 260 | ······ | | | |
| b) | | 5 8 5 260 ≈ 253 | | | |
| 0) | £332 @ £585 @ | $-332 \uparrow Check:$ | | | |
| | | 2 5 3 | | | |
| | E: 800 - 680 = 120 | | Н | Т | U |
| c) | | $7 \ 9 \ 8 \ 120 \approx 119$ | 7 | 89- | ¹⁰ 8 |
| | £798 @ £679 @ | -679 \uparrow Check: $-$ | 6 | 7 | 9 |
| | | 1 1 9 | 1 | 1 | 9 |

Discuss other methods of checking. (horizontal subtraction, calculator) e.g. 798 - 679 = 798 - 600 - 79 = 198 - 80 + 1 = 118 + 1 = 119

__ 18 min __

Also explain part c) with model

money stuck to BB if necessary

Equal values

5

Extension

Let's join up the differences to their value rounded to the nearest 10. Ps come to BB to choose a subtraction, do the calculation (explaining reasoning in detail) and join it to its nearest 10 (or rearrange 'roofs' and 'walls'). Class checks with mental addition. If problems, show reasoning in place-value tables.

| BB: | 230 | 540 | 410 | 270 | L | |
|-----|---------------------|----------------------------|----------------------------|----------------------------|---------|-----|
| | 628 - 214 414 | 574 - 341 233 | 845 - 573 272 | 837 - 299 538 | ↑ Check | (+) |

Discuss the different rounded values when rounding is done before calculation (in estimating) and after calculation (as here).

```
(e.g. E: 628 - 214 \approx 630 - 210 = 420 but 628 - 214 = 414 \approx 410
     E: 845 - 573 \approx 850 - 570 = 280 <u>but</u> 845 - 573 = 272 \approx 270
```

Why is that? (e.g. 628 is rounded up and 214 is rounded down so the estimated difference is much more than the calculated difference.)

Who can think of other quick ways we could check the subtractions? T gives hints if nobody can think of any.

___ 24 min __

Drawn on BB or use enlarged copy master or OHP (or the 'roofs' and 'walls' enlarged, cut out and stuck separately to BB for Ps to make 'houses') Ps write the operations in their Ex. Bks. first. At a good pace Discussion, explanation, reasoning, checking, agreement, praising

Other quick checks: e.g. 628 - 214 = 628 - 228 + 14= 400 + 14 = 414837 - 299 = 837 - 300 + 1= 537 + 1 = 538Extra praise if Ps suggest it.

|--------|------|----|
| | | |

| Y 3 | | Lesson Plan 99 |
|------------|--|---|
| Activity | | Notes |
| 8 | PbY3b, page 99 Q.3 Read: Estimate the difference by rounding the numbers to the nearest whole ten. Do the calculation, then check it in your head with an addition. Elicit that there are 2×10 subtractions. Let's see how many you can do in 3 minutes! Start now! Stop! Review at BB with whole class. Ps explain reasoning in detail. Class agrees/disagrees. Mistakes discussed and corrected. Solution: a) i) ii) iii) iv) v) $-\frac{9}{6}$ $\frac{2}{1}$ $\frac{5}{5}$ $\frac{4}{10}$ $-\frac{1}{1}$ $\frac{8}{6}$ $\frac{4}{1}$ $\frac{1}{10}$ a) i) ii) iii) iv) v) $\frac{1}{2}$ $\frac{1}{2}$ $\frac{1}{5}$ $\frac{1}{4}$ $\frac{1}{2}$ $\frac{1}{2}$ $\frac{1}{5}$ $\frac{1}{2}$ $\frac{1}{$ | Individual work, monitored helped (Or part b) done as whole class activity if T prefers) Written on BB or use enlarged copy master or OHP Differentiation by time limit Reasoning, checking, agreement, self-correction, praising How did you check your answers? e.g. mentally by adding bottom 2 rows in subtraction to make the top row, or doing subtraction again horizontally, e.g. 872 - 356 = 872 - 300 - 56 = 572 - 50 - 6 = 522 - 6 = 516 |
| 0 | 40 min | |
| 9 | Listen carefully, write the data, do the calculation and check the result in your <i>Ex. Bks.</i> Show me the answer when I say. Sam and Rosie were on holiday at the seaside. They collected 342 shells altogether. If Sam collected 127 shells, how many did Rosie collect? Show me now! (215) X , explain to us how you got your answer. Who agres? Who did it a different way? Who made a mistake? What was your mistake? etc. BB: Data: S + R: 342, S: 127 Plan: R: 342 – 127 E: 342 – 127 \approx 340 – 130 = 210 C: $3 \frac{4}{2} \frac{2}{127} + Check (+) \frac{3}{215} + Check (+) \frac{3}{215} + Check (+) \frac{3}{25} + Check $ | Whole class activity T repeats slowly and P repeats in own words. Give Ps time to think/calculate In unison (on scrap paper or 'slates') Reasoning, checking with estimate, agreement, self-correcting, praising Accept any method which gives the correct answer. Explain calculation in a place-value table if necessary. Further checks can be done mentally, in <i>Ex. Bks</i>, or with a calculator |

|-----------|--|--|
| Activity | | Notes |
| 1 | Number snake | Whole class activity |
| | Which numbers do you think are missing from the snake? Ps come out to fill in the missing terms, explaining reasoning. What is the rule? (Decreasing by 40, or -40) | Drawn on BB or use enlarged copy master or OHP |
| | BB: | At a good pace |
| | 730 690 650 610 570 530 490 450 410 370 330 290 250 • | Bold numbers are given. |
| | 3 min | |
| 2 | Analysing mistakes <i>Tommy Turtle</i> did these subtractions for homework. Let's estimate to see whether he is correct or not and find what mistakes he has made. Ps come to BB or OHP to estimate, cross out wrong answers, explain the mistakes and do the calculations again correctly. | Whole class activity Written on BB or use enlarged copy master or OHP At a good pace |
| | BB: a) 1648 E: $1650 - 130 = 1520$ 1648 1648 $-\frac{132}{398}$ $-\frac{132}{1516}$ or $-\frac{1320}{328}$ | Reasoning, agreement, checking, praising Feedback for T |
| | b) $1679 E: \ 1680 - 60 = 1620 \qquad - \frac{1510}{56} \qquad - \frac{560}{1623} \qquad - \frac{560}{1119}$ | Show part c) in a place value table, giving the steps of the calculation in detail. \downarrow |
| | c) 725 E: 730 - 470 = 260 725 258 -467 -467 -467 $+467258$ Correction: 258 Check: 725 | $\begin{array}{c ccccccccccccccccccccccccccccccccccc$ |
| | d) 845 E: $850 - 330 = 520$ 845 520 -325 Correction: -325 $+325How can we check that the new answer is correct? (Compare with$ | T introduces another way of doing subtraction (adding 10U to the reductant and 1T to the subtrahend) Agree that if the same amount is added to each |
| | estimate, then addition or horizontal subtraction*, or use a calculator) * e.g. a) $1648 - 132 = 1648 - 100 - 32 = 1548 - 32 = 1516$ 10 min | number, the difference will be the same. e.g. $7-5 = 17-15$ T explains the steps in detail. |
| 3 | 10 min Missing numbers | Whole class activity |
| | Let's fill in the missing numbers to make the statements true. BB: a) 845 945 -672 -672 1076 976 -491 -591100 $-385c) 856 -756 -145 -583 -385611$ $= 611$ -583 -383334 $= 334Ps come to BB to do calculations on LHS, explaining reasoning. Then they write the answer in the RHS and find the missing number by$ | Written on BB or use enlarged copy master or OHP Ps suggest where to start and how to continue. Discussion, reasoning, checking, agreement, praising Extra praise if Ps reason how to find the missing numbers <u>without</u> calculation e.g. in a): same number is subtracted so |
| | doing an addition. Class points out errors. | reductant <u>must</u> be 100 more. |

_____ 15 min __

| Lesson I | Plan | 101 |
|----------|------|-----|
|----------|------|-----|

| Y3 | | Lesson Plan 101 |
|-----------|--|--|
| Activity | | Notes |
| 4 | How does it work? I saw another interesting way to do subtraction This is it. Can anyone explain how it works? BB: a) 476 b) 345 | Whole class activity Written on BB or use enlarged copy master or OHP |
| | $-\frac{345}{\underline{131}} \qquad -\frac{138}{\underline{213}} \rightarrow 210 - 3 = \underline{207}$ | Give Ps time to discuss it with their neighbours. |
| | c) $539 \\ - 294 \\ 365 \\ \hline 305 \\ - 60 = 245 $ d) $- 643 \\ - 389 \\ \overline{346} \\ \hline 300 \\ - 46 = 254 $ | |
| | Give several Ps the chance to explain what they think. If no P is on the right track T can give hints. Then T explains step by step. e.g. in: | Discussion, explanation, agreement, praising |
| | b) In all columns, subtract the bigger digit from the smaller digit. Only the units column was wrong, so ignore the 3U in the answer, | i.e. we have only subtracted 130 from 340 so far. |
| | Beaving 2H and $11 = 210$. But 80 is 30 more than 50, so another 30 must be taken away from 210: $210 - 3 = 207$. | Ps check it is correct using another method. |
| | c) In all columns, subtract the bigger digit from the smaller digit. The tens and units columns were wrong, so ignore the 4T and the 6U in the answer, leaving $3H = 300$. But 8T is $4T$ more than 4T | i.e. we have only subtracted 300 from 600 so far. |
| | and 9U is <u>6U</u> more than 3U, so $4T + 6U (= 46)$ must be taken away from 300: $300 - 40 - 6 = 260 - 6 = 254$. | Extra praise if Ps realise what is happening by themselves! |
| - | 20 min | |
| 5 | Q.1 Read: Fill in the missing numbers. Continue the pattern once more. | Individual work, monitored, helped |
| | T explains task. (The answer to the first subtraction is the top number in the 2nd, the answer to the 2nd subtraction is the top number in the 3rd, etc. Ps make up a 6th subtraction, using | Drawn on BB or use enlarged copy master or OHP |
| | the answer from the 5th as the reductant.) | checking, self-correction |
| | agrees/disagrees. Mistakes discussed and corrected. | Praise each correct subtraction. |
| | Ask Ps for methods of calculating 302 – 149: e.g.horizontal subtraction: | difficult calculation correctly and for creating a new one |
| | 302 - 149 = 202 - 49 = 162 - 2 - 7 = 160 - 7 = 153, or 302 - 149 = 300 - 147 = 200 - 47 = 160 - 7 = 153, etc. | e.g. BB. H T U |
| | • using new method from Activity 2: $-\frac{1}{1}4_{1}9$ 153 T explains steps in detail. Use a place-value table if necessary. | $ \begin{array}{c} 3 + 10 \\ - 1 + 1 \\ 1 \\ 5 \\ 3 \\ - 1 \\ - 1 \\ 5 \\ 3 \\ -$ |
| | • using method from Activity 4: $-\frac{302}{149}$ T explains steps (with Ps' help) $2(47) \rightarrow 200 - 47 = 153$ | T tells Ps not to worry if they do not understand all the |
| | Solution: | methods of calculation as we will do them again in another |
| | $\begin{array}{c ccccccccccccccccccccccccccccccccccc$ | iesson. You have all been very clever! |
| | 26 min | |

| Y3 | | Lesson Plan 101 |
|-----------|--|--|
| Activity | | Notes |
| 6 | PbY3b, page 101Q.2Read: One of these statements is not correct. Circle its sign.Ps read statements themselves and do any calculations in theirEx. Bks.Review with whole class. Ps can draw large sign on scrappaper or 'slates' and show on command. (A)Ps with correct responses explain to Ps who were wrong.Mistakes discussed and corrected.Solution:*The difference between 597 and 389 is 208.389 + 200 + 8 = 589 + 8 = 597*The difference between 589 and 397 is less than one thousand. (Difference < 589 < 1000) | Individual work, monitored, helped Ps can use any method they wish to deduce the answer. In unison T could have statements written on BB or SB or OHT to make discussion easier. Discussion, reasoning, agreement, self-correcting, praising |
| | The difference between 687 and 265 is an odd number. 7U - 5U = 2U, so number must be even, not odd. 30 min | Extra praise if Ps used reasoning, not calculation, to work out the correct answer. |
| 7 | PbY3b, page 101 | Individual work monitored |
| | Q.3 Read: Write down the data. Make a plan. Estimate, calculate and check the answer. Deal with one part at a time. Ps read problem themselves and solve it. Review at BB with whole class. (Ps can show solutions on scrap paper or 'slates' on command.) Ps explain method of solution and discuss and correct mistakes. a) There are 857 fruit trees in an orchard. 614 are apple trees and the rest are plum trees. How many plum trees are in the orchard? Data: T: 857, A: 614. Plan: P: T - A = 857 - 614 Estimation: 857 - 614 ≈ 860 - 610 = 250 Answer: There are 243 plum trees in the orchard. | helped T reminds Ps to use initial letters for names to save time. In unison Discussion, reasoning, checking, agreement, self- correcting, praising $\frac{Calculation}{-614} + \frac{Check}{857}$ $\frac{243}{+614} + \frac{614}{857}$ $243 \approx 250$ Check by comparing with |
| | b) Mary and Jane are collecting buttons. Mary has 857 buttons. Jane has 641 fewer buttons than Mary. How many buttons does Jane have? Data: M: 857, J: M – 641 (or $J_{641} \le M$) Plan: J: 857 – 641 Estimation: 857 – 641 \approx 860 – 640 = 220 Answer: Jane has 216 buttons. | estimate and then by doing addition, $\begin{array}{r rrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrr$ |

| Activity | | Notes |
| 8 | PbY3b, page 97 Q.4 a) Read: Alan and Barry have 945 stamps altogether. Complete the table to show how many stamps they could each have. Let's see how many columns you can complete in 2 minutes! Ps do any calculations in <i>Ex. Bks.</i> then write the missing numbers in <i>Pbs.</i> Review at BB with whole class. Ps come to BB or dictate to T, explaining their reasoning. Class agrees/disagrees. Mistakes discussed and corrected. X, come and write the rule in a mathematical way. Who agrees? Who can think of another way? etc. Solution: A 321 430 238 536 372 264 537 222 73 27 | Individual work, monitored, helped Table drawn on BB or use enlarged copy master or OHP Differentiation by time limit Reasoning, agreement, self- correcting, praising Whole class discussion on the rule. Involve several Ps. Agreement, praising |
| Extension | B 624 515 707 409 573 681 408 723 872 918 $A = 945 - B$ $B = 945 - A$ $A + B = 945$ How many stamps would Barry have if Alan had 946 stamps? (-1 mathematically but not possible in real life!)b)Read:Cindy and Diana are collecting 1 p coins. Cindy has 345 more coins than Diana. Complete the table to show how many coins they could each have.Again, set a time limit.Ps do any calculations in Ex. Bks. then write the missing numbers in Pbs.Review at BB with whole class.Ps come to BB or dictate to T, explain their reasoning. Class agrees/disagrees. Mistakes discussed and corrected.Vcome and write the rule in a mathematical way. | Discussion, agreement In good humour! Individual work, monitored, helped Table drawn on BB or use enlarged copy master or OHP Differentiation by time limit Reasoning, agreement, self- correcting, praising |
| Extension | Who agrees? Who can think of another way? etc. Solution: $C 756 468 876 754 909 662 1058 1068 1567 1628$ $D 411 123 531 409 564 317 713 723 1222 1283$ $C = D + 345 \qquad D = C - 345 \qquad C - D = 345$ How much money could they each have collected? • T (or a P) points to a number in the table and Ps say it in £s and p, e.g. $468 \text{ p} = \text{\pounds}4 \ 68 \text{ p}.$ • T (or a P) points to a number in the table and Ps say it in £s, e.g. $564 \text{ p} = \text{\pounds}5.64 (\text{five point six four pounds'}),$ Elicit that, e.g. $\text{\pounds}5.64 = \text{\pounds}5 + 64$ hundredths of a £. $-45 \text{ min} - \frac{45 \text{ min}}{2}$ | Whole class discussion on the rule. Involve several Ps. Agreement, praising At speed orally round class Class points out errors. Praising, encouragement only |

| Y3 | R: Mental calculation C: Problems in context: addition and subtraction E: Numbers up to 2000 | Lesson Plan 102 |
|-----------|---|--|
| Activity | | Notes |
| 1 | Sequences competition a) I will describe a sequence and I will give you 1 minute to continue it as far as you can in your <i>Ex. Bks.</i> The first term is 217 and it is decreasing by 16. Start now! Stop! Everyone stand up. Ps say terms in order round class. (217, 201, 185, 169, 153, 137, 121, 105, 89, 73, 57, 41, 25, 9, -7, -23,) Ps left standing are the winners. Let's give them a round of applause! b) T says first 3 terms of a sequence. Ps continue it. What is the rule? 128, 142, 156, (170, 184, 198, 212, 226, 240, 254, 268,) <i>Rule:</i> Increasing by 14 (+14) | Individual work in <i>Ex. Bks.</i> Keep to time limit At speed Ps sit down if they have made a mistake or reached the end of their written terms. Whole class activity At speed round class If a P makes a mistake, next P corrects it. Praising |
| 2 | Problems Listen carefully, think how you can solve the problem and write a plan in your <i>Ex. Bks.</i> Choosing the correct operation is more important but you may do the calculation too if you have time. a) <i>A family went on a 2-day trip. They spent £345 on the 1st day. On the second day they spent £169 less. How much did they spend on the second day?</i> A, what is your plan? Who wrote the same? Who did it another way? etc. Who did the calculation quickly on the BB (or dictated by Ps). BB: <i>Plan:</i> £345 – £169 or £(345 – 169) (= £176) What other question could we ask about this problem? (How much money did the family spend altogether?) (£345 + £176) b) <i>A school football team reached the final. The match was watched by 314 boys and 96 fewer girls. How many girls were at the match?</i> B, what is your plan? Who wrote the same? Who did it another way? etc. Who did the calculation? (If so, P explains answer, otherwise T does calculation quickly on the BB (or dictated by Ps). BB: <i>Plan:</i> G: 314 – 96 (= 218) What other question could we ask about this problem? (How many boys and girls watched the match altogether?) (314 + 218) c) <i>In a cinema, there were 314 children. If 96 of them were girls, how many boys were there?</i> C, what is your plan? Who wrote the same? Who did it another way? etc. Elicit that the calculation is the same as for b). BB: <i>Plan:</i> B: 314 – 96 (= 218) What other question could we ask about this problem? (How many boys were there?) C, what is your plan? Who wrote the same? Who did it another way? etc. Elicit that the calculation is the same as for b). BB: <i>Plan:</i> B: 314 – 96 (= 218) | Individual work, monitored Deal with one problem at a time. T repeats slowly Set a short time limit Quick discussion, agreement, self-correction, praising N.B. Aim of activity is for Ps to write the correct operation. Discussion, agreement on correct operation, praising T repeats slowly Set a short time limit Quick discussion, agreement, self-correction, praising T repeats slowly Set a short time limit Quick discussion, agreement, self-correction, praising T repeats slowly Set a short time limit Quick discussion, agreement on correct operation, praising T repeats slowly Set a short time limit Quick discussion, agreement on correct operation, praising Discussion, agreement on correct operation, praising Discussion, agreement, self-correction, praising Discussion, agreement, self-correction, praising Discussion, agreement on correct operation, praising |
| 3 | Puzzle 1 The same shape stands for the same number. The number in each shape is the sum of the two numbers directly below it. What are the missing numbers? 100 100 100 100 100 100 | Whole class activity Drawn on BB or use enlarged copy master or OHP Ps come to BB to write/explain. Class agrees/disagrees. At a good pace. Praising |

| Y3 | | Lesson Plan 102 |
|-----------|--|---|
| Activity | | Notes |
| 4 | Puzzle 2Write in the missing numbers BB: and signs so that the equations are correct horizontally and vertically.Ps come to BB to write and explain reasoning. Class agrees/disagrees. 555 444 $=$ 999 $ 333$ $+$ 111 $=$ 444 $=$ $=$ $=$ $=$ 222 $+$ 333 $=$ 555 | Whole class activity Drawn on BB or use enlarged copy master or OHP At a good pace. Agreement, praising. Bold numbers given Feedback for T |
| 5 | Making subtractionsListen carefully and write possible subtractions in your Ex. Bks.What can the difference be if you subtract from 1001:a) a 3-digit number less than 110,b) a 2-digit number more than 96,c) a 3-digit number more than 995?Deal with one part at a time. Review at BB with the whole class.T writes what Ps dictate (or Ps come to BB). Class agrees/dsagrees.Elicit that only the first subtraction in each part needs to be calculated as other differences can be obtained by adding on (subtracting) 1U.In c), agree that 005 = 5,004 = 4, etc. so leading zeros are not needed, but a zero after or between numbers are very important!T chooses 1 or 2 subtractions for Ps (with T's help) or T to explain in detail in a place-value table. $e.g.$ $25 min$ | Individual work in writing subtractions BB: 1001 – T repeats slowly Reasoning, agreement, praising BB: a) $1001 \ 1001 \ -\frac{100}{992} - \frac{108}{893} \ \cdots \ -\frac{100}{901}$ b) $1001 \ 1001 \ 1001 \ -\frac{097}{904} - \frac{98}{903} - \frac{99}{902}$ c) $1001 \ 1001 \ 1001 \ 1001 \ 1001 \ -\frac{996}{905} - \frac{997}{904} - \frac{998}{903} - \frac{999}{902}$ |
| 6 | PbY3b, page 102 Q.1 Read: Write down the data. Make a plan. Estimate, calculate and check the answer. Ps read problems themselves and solve them. Set a time limit. Review at BB with whole class. (Ps can show solutions on scrap paper or 'slates' on command.) Ps explain method of solution and discuss and correct mistakes. a) A large barrel can hold 578 litres and a small barrel can hold 256 litres. How much more liquid can the large barrel hold than the small one? Data: L: 578 litres, S: 256 litres Plan: L - S = (578 - 256) litres Estimation: 578 - 256 ≈ 580 - 260 = 320 (litres) Answer: The large barrel holds 322 litres more. b) The length of Molly's bedroom is 4 m 32 cm, which is 1 m 27 cm more than its width. What is the width of Molly's bedroom? Ps change units to cm (or calculate horizontally in m and cm). Data: L: 4 m 32 cm = 432 cm, W: L - 1 m 27 cm (127 cm) Plan: W: 432 cm - 127 cm (or 4 m 32 cm - 1 m 27 cm) Estimation: (432 - 127 ≈ 430 - 130 = 300) cm | Individual work, monitored, helpedDifferentiation by time limitIn unisonDiscussion, reasoning, checking, agreement, self- correcting, praising $Calculation$ $Check$ 5 7 2 5 2 3 2 2 2 5 3 2 2 3 2 2 2 3 2 2 2 3 2 2 2 3 2 2 2 3 2 2 2 3 $20 \approx 322$ Check by comparing with estimate, then by addition. $Calculation$ $Check$ 4 3 2 3 3 0 4 3 2 3 $300 \approx 305$ BB: 305 cm 305 cm |

| Y3 | R: Four operations C: Geometry: sorting 1–D, 2–D and 3–D shapes E: Drawing shapes | Lesson Plan 106 |
|-----------|--|--|
| Activity | | Notes |
| 1 | Sequences Let's continue these sequences for 3 terms in each direction. Ps come out to BB to write the terms. Class agrees on the rule. BB: Rule: a) (425, 465, 505), 545, 585, 625, (665, 705, 775) [+ 40] b) (305, 355, 505), 455, 505, 555, (605, 655, 705) [+ 50] c) (1374, 1254, 1134), 1014, 894, 774, (654, 534, 414) [- 120] | Whole class activity 3 bold terms already written on BB Discussion on the rule. At a good pace Reasoning, agreement, praising |
| 2 | Mental multiplication and division practice T says a multiplication or division. P says the result. e.g. a) 8 × 7, 4 × 9, 6 × 8, 7 × 3, etc.; 63 ÷ 7, 42 ÷ 6, 25 ÷ 5, etc. b) 7 × 1, 7 × 10, 7 × 100; 18 × 1, 18 × 10, 18 × 100; 19 × 10, 10 × 130, 100 × 15, etc.; c) 12 ÷ 2, 120 ÷ 2, 120 ÷ 20; 15 ÷ 5, 150 ÷ 5, 150 ÷ 50; 10 ÷ 10, 100 ÷ 10, 100 ÷ 100, etc.; d) 0 × 0, 1 × 1, 2 × 2, 3 × 3, 4 × 4, 5 × 5, 6 × 6, 7 × 7, 8 × 8, 9 × 9, 10 × 10, (11 × 11, 12 × 12) | Whole class activity T chooses Ps at random If a P makes a mistake, the next P corrects it, so all Ps should concentrate all the time! At speed. Praising Ps explain reasoning for: $11 \times 11 = 11 \times 10 + 11 = 121$ $12 \times 12 = 12 \times 10 + 12 \times 2$ = 120 + 24 = 142 |
| 3 | 10 min Written exercises T dictates operations. Ps write in Ex. Bks and do calculations. a) $130 + 12 \stackrel{6}{\div} 2 = (136)$ b) $712 - 40 \stackrel{280}{\times} 7 = (432)$ c) $90 \stackrel{450}{\times} 5 - 265 = (185)$ d) $140 \stackrel{20}{\div} 7 + 498 = (518)$ e) $380 - 60 \stackrel{15}{\div} 4 = (365)$ f) $(380 \stackrel{-60}{-} 60) \div 4 = (80)$ g) $240 \stackrel{40}{\div} 6 + 2 = (42)$ h) $240 \div (6 \stackrel{8}{+} 2) = (30)$ Deal with two at a time. Ps explain how they did the calculations. (Order of operations) Mistakes discussed and corrected. | Individual work, monitored (T walks round while reading out the questions) Questions and answers already prepared on BB or SB or OHT and T uncovers each one as it is reviewed. Reasoning, agreement, self- correction, praising Feedback for T |
| 4 | Shapes a) T has various real objects (e.g. tin, carton, brick, ball, randomly shaped objects) and geometrical <u>solids</u> (e.g. cube, cuboid, pyramid, etc.) on desk at front of class. How could we sort these things? Ps suggest various ways. (e.g. size; material; curved surface or flat (plane) faces or a mixture of the two; number of faces (edges, vertices); parallel or perpendicular edges or neither; etc.) Class discusses the various groupings. Agree that all items are 3-dimensional, i.e. have height, width and depth. b) T has various <u>plane</u> shapes stuck to (or drawn on) BB. (e.g. square, rectangle, circle, triangle, pentagon, semicircle, random shapes, etc.) How could we sort these shapes? Ps suggests ways. (e.g. curved or straight sides or mixed, number of sides (vertices), etc. Class discusses the various groupings. Agree that all are 2-dimensional. (width, height) c) T draws various (unclosed) line patterns on BB. What kind of shapes are these? Agree that they are not solids or plane shapes but only <u>lines</u>. How could we sort them? (e.g. curved or straight or mixed; length) Agree that lines can be thought of as being 1-dimensional. (length) | Whole class activity T decides on number and variety Discussion, demonstration, agreement, praising Encourage Ps to use correct geometrical names. BB: <u>3–D</u> Discussion, demonstration, agreement, praising. BB: <u>2–D</u> Extra praise if Ps mention perpendicular (parallel) sides, right angles, perimeter, etc. Discussion, demonstration, agreement, praising. BB: <u>1–D</u> Feedback for T |

|-----------|---|---|--|--|--|
| Activity | | Notes | | | |
| 5 | Building solids a) T and/or Ps have set of (wooden) building blocks on desks. e.g. Image: Construct various shapes. T chooses Ps to show their shapes to class and to describe them. Class suggests missed criteria (e.g. number of vertices, edges, faces, type of edges, faces) | Individual (or paired) work, monitored If Ps do not have own building blocks, they come out to select from large models on T's desk Naming/describing, agreement, praising Extra praise for creative shapes or good descriptions And/or paired discussion: Ps describe their shapes to their neighbours who agree/disagree or suggest missed criteria, as preparation for review with whole class | | | |
| | 25 min | whole class. | | | |
| 6 | PbY3b, page 106 Q.1 Read: Count the number of faces, vertices and edges of each solid and fill in the table. If possible, T has large models on desk. Otherwise T refers to BB or OHP. Make sure that Ps know what a face (vertex, edge) is. Ps come out to point to them on the diagrams or models. T explains that the dotted lines in the diagrams are edges which cannot be seen from the front, but must be included in counting. | Whole class discussion to start Drawn on BB or use enlarged copy master or OHP Agreement, praising | | | |
| | Review at BB with whole class. Ps come out to fill in columns or dictate to T. Class agrees/disagrees. If disagreement, T confirms on model. Mistakes corrected. When dealing with each shape, ask Ps to name the faces and to identify faces or edges which are parallel or perpendicular. <i>Solution:</i> | Individual work, monitored (helped) At a good pace Reasoning, checking, agreement, self-correcting, praising | | | |
| | Square-based pyramidTriangle-based prismCuboid prismCube prismHexagonal prismTriangle-based pyramidFaces556684Vertices5688124Edges891212186 | Ps could hold their <i>Pbs</i> or 'slates' parallel (perpendicular) to their desks to reinforce the concepts if needed. | | | |
| Extension | Who could write a rule for the table? Who agrees? Who could write it in another way? etc. BB: $E = F + V - 2$, $F = E - V + 2$, $V = E - F + 2$ (F + V = E + 2) | Whole class activity Reasoning, agreement, checking with values from table Praising | | | |

| Y3 | | Lesson Plan 106 | | | | |
|-----------|---|--|--|--|--|--|
| Activity | | Notes | | | | |
| 7 | <i>PbY3b, page 106, Q.2</i> a) Let's draw around all the sides of this cuboid. T demonstrates on BB, turning the solid over until all the sides have been drawn. This is called a <u>net</u> for a solid. This is what it looks like when it is cut out in one piece. T has the net already prepared and pre-folded. T asks a P to come out to front and fold the net around the solid. Does it fit? (Yes) T (or P) repeats with, e.g. a pyramid. b) T has 2 or 3 nets already prepared and pre-folded. T shows them to class and Ps try to work out what the solid is. Ask several Ps what they think before checking by folding. c) Read: <i>Join up the solids to the correct net</i>. First make sure that Ps know which are the solids (3–D) and which are the nets (2–D). Review at BB with whole class. Ps come out to join up matching pairs. Class agrees/disagrees. (T could have nets and shapes on hand in case of disagreement.) | Whole class demonstration to start Solid BB: Net e.g. Agreement Whole class activity In good humour! Agreement, checking, praising Individual work, monitored (helped) Drawn on BB or use enlarged copy master or OHP Reasoning, checking, agreement, self-correcting, praising Ps might notice that the net for the cuboid is different from the one above. T could show by manipulation how other nets are possible for some solids. | | | | |
| | 35 min | | | | | |
| 8 | PbY3b, page 106 Q.3 Read: Colour the plane shapes which are bordered by an unbroken line. Tick any circle with red, any rectangles with blue and any triangles with green. Agree that all plane shapes are bordered by an unbroken line. Who remembers the name of this line? (perimeter) Ps colour plane shapes in Pbs. Review at BB with whole class. Ps come out to point to plane shapes and to describe them. (e.g. curved or straight sides, number of sides and vertices; parallel and perpendicular lines, right angles) Ps point out the circle, 2 rectangles and 2 triangles. What is this shape called? mailto: What are the shapes which are not coloured? (lines) Solution: | Individual work, monitored, helpedDrawn on BB or use enlarged copy master or OHPBB: perimeterDiscussion, explanation, agreement, praising Class suggests missed criteria Agreement, praisingBB: pentagon regular irregular | | | | |

|-----------|---|--|
| Activity | | Notes |
| 1 | Multiplication and division practice T says a multiplication or division. P says the result. Listen carefully, because if the P before you makes a mistake, you must correct it! 4 min | Whole class activity At speed. T chooses Ps at random Praising, encouragement only |
| 2 | Mental calculation practice T says mixed operations. Ps write only the result in their Ex. Bks. e.g. a) $10 \times 23 + 300 = (530)$ b) $250 - 8 \times 5 = (210)$ c) $630 + 370 = (1000)$ d) $1000 \div 10 - 35 = (65)$ e) $990 \div 9 + 140 = (250)$ f) $320 \div 8 \times 2 = (80)$ g) $450 \div 5 + 10 = (100)$ h) $854 + 123 - 77 = (900)$ i) $1500 - 25 \times 2 = (1450)$ j) $789 - 11 \times 10 = (679)$ Review orally with whole class. Ps change pencils to mark own work. Ps give the answers and explain reasoning. Mistakes dicussed/ corrected. Who had all correct? Who had 1 mistake (2, 3, 4, 5 or more) mistakes? | Individual work, monitored T walks round class while reading the questions T can substitute other operations according to needs and ability of class Reasoning, agreement, self- correction, praising Stars, stickers, etc. awarded |
| 3 | InequalitiesLet's find the numbers which make these statements true.Class reads statement in unison. Ps come to BB to do calculations and to write possible numbers, explaining reasoning. Rest of class helps where necessary, points out errors or suggests easier ways to calculate.BB:998a) $648 + 50 \times a = 998$, $50 \times a = 998 - 648 = 350$ $- \frac{648}{350}$ $648 + 50 \times b < 998$, $b < 7$ $(6, 5, 4, \ldots)$ $648 + 50 \times c \ge 998$, $c \ge 7$ $(7, 8, 9, \ldots)$ | Whole class activity T has BB or SB or OHT already prepared an uncovers each as it is dealt with. Allow Ps to suggest what to do first and how to continue. T gives hints if necessary. Reasoning, agreement, checking, praising Check by replacing the letters |
| | b) $200 \times d - 126 = 674$, $200 \times d = 674 + 126 = 800$ 674 $d = 800 \div 200 = 8 \div 2 = 4$ $+\frac{12.6}{80.0}$ $200 \times e - 126 > 674$, $e > 4$ $(5, 6, 7,)$ $200 \times f - 126 \le 674$, $f \le 4$ $(4, 3, 2,)$ c) $1234 - 90 \times g = 604$, $90 \times g = 1234 - 604 = 630$ $g = 630 \div 90 = 63 \div 9 = 7$ $-\frac{60.4}{6.04}$ $1234 - 90 \times h \le 604$, $h \ge 7$ $(7, 8,)$ $1234 - 90 \times i > 604$, $i < 7$ $(6, 5,)$ d) $j \div 3 + 567 = 867$, $j \div 3 = 867 - 567 = 300$ $j = 300 \times 3 = 900$ $k \div 3 + 567 \le 867$, $k \le 900$ $(900, 899,)$ $l \div 3 + 567 \ge 867$, $l \le 900$ $(900, 901, 902,)$ | with 1 or 2 possible numbers. Expect only whole positive numbers but give extra praise if Ps suggest fractions and negative numbers too. In part c), Ps might have difficulty understanding why the signs are reversed. Show that, e.g. $h = 6$ and i = 8 do not make the statements true. Also show on appropriate segments of the number line if possible. In part d), use multiples of 3 to check k (e.g. 900, 936) |
| | 18 min | anu <i>i</i> (0.g. 200, 230). |

Y3

Activity 4

Perimeter

Ps each have the same copies of shapes on desk cut from coloured paper (e.g. rectangles, square, right-angled triangle) and rulers or measuring grids (parts of 1 cm or 0.5 cm grids copied onto A4 transparencies and cut into smaller pieces) on desks.

We want to find out what the <u>perimeter</u> of each shape is. Elicit that perimeter means 'all the the way round the outside'. How could we do it? (Measure each side, then add them up). T reminds Ps that, e.g. 3 and a half cm can be written as 3.5 cm.

Ps measure one shape at a time in pairs, one measures and the other notes the data. Both do the necessary calculations in their *Ex. Bks.* Review at BB with whole class. Discuss different ways to do the

calcualtions.

| e.g. 3 cm | |
|-----------|--|
| 2 cm | P = 2 cm + 3 cm + 2 cm + 3 cm = 10 cm, or |
| | $P = 2 \times (2 \text{ cm} + 3 \text{ cm}) = 2 \times 5 \text{ cm} = 10 \text{ cm}$ |
| B | P = 2 cm + 3.5 cm + 2 cm + 3.5 cm = 11 cm, or |
| 2 cm | $P = 2 \times (2 \text{ cm} + 3.5 \text{ cm}) = 2 \times 5.5 \text{ cm} = 11 \text{ cm}$ |
| 2.5 cm | |
| С | P = 2.5 cm + 2.5 cm + 2.5 cm = 10 cm |
| | or |
| | $P = 4 \times 2.5 \text{ cm} = 8 \text{ cm} + 2 \text{ cm} = 10 \text{ cm}$ |
| | " |
| ≈ 3.6 cm | P = 2 cm + 3 cm + 3.6 cm = 8.6 cm, or |
| | P = 20 mm + 30 mm + 36 mm = 86 mm |
| 3 cm | 25 min |

PbY3b, page107

Q.1

5

Read: How long is the perimeter of this shape? First draw the perimeter as one horizontal line. Draw each side in letter order and label it.

Ps draw in *Pbs*, then count the total number of grid squares. (24) Review at BB with whole class. Mistakes corrected. Elicit that the side of each grid square measures half a cm (0.5 cm or 50 mm). *Solution:*

| | a | b | c | d | | e | | | f | | - | |
|------------------|-------------------------------|-----------------------------------|------------------------|---------|----------|------|------|-----|------|------------|-----|---|
| 7+3+2+2+5+5 = 24 | | | | | | | | | | | | |
| Deal w | vith parts | a), b) an | d c) or | ne at a | a time. | | | | | | | |
| a) If th uni | ne unit us ts? (<u>24</u> | <i>ed is ha</i> ļ units) | facm, | , then | Perin | nete | er : | = / | how | ma | ny | |
| b) If th ma | ne unit us ny units? | <i>ed is 2 h</i> (<u>12</u> u | <i>alf cm</i> nits) | (1 cn | n) , the | en l | Per | ime | eter | = <i>k</i> | iow | , |

c) If the unit used is 3 half cm (1 and a half cm), then Perimeter = how many units? (8 units)

ExtensionWhat is the <u>area</u> of the shape if we use the units in a), b) and c)?Ps come to BB to reason and demonstrate. Class agrees/disagrees.

_ 30 min _

Notes

Paired work in measuring and recording data.

Individual work in calculating

T can use copy master, copied on coloured paper and cut out

BB: Perimeter

Discussion on shapes such as : <u>square</u> (only need to measure 1 side as all sides are the same; <u>rectangle</u> (only need to measure 1 long and 1 short side, as other 2 sides are the same as these) Ps use rulers or measuring grids from *LP 106/9.2*. Reasoning, agreeement, praising

Accuracy of measurements will vary according to the ability of Ps.

Ps might give measurements involving fractions of a cm in decimals or in mm. Praise both ways.

Extension

Ps measures perimeter of faces on cubes and cuboids

Individual work, monitored, (helped)

Drawn on BB or use enlarged copy master or OHP

Ps use rulers to draw lines and measure grid squares.

Reasoning, agreement, self-correcting, praising

Reasoning, agreement, praising

Ps can check a) by counting. Rest can be done by calculation

 $24 \div 3 = 8$ units

Discussion, agreement, praising

 $A = 31 \square = 7\frac{3}{4} \square = 3\frac{4}{9} \square$

| | T has a similar plan of own classroom drawn on BB or SB or OHT (or with individual items cut out and stuck to BB) | If seats are in arcs instead of rows, adapt the terms to suit. |
| | a) T calls Ps out to point to certain rows, columns, or Ps. | At a good pace |
| | b) Ps come to BB to point to their own usual position in the class room and describe where it is. (e.g. Column 2, Row 3) | Agreement, praising |
| | c) Read: This is a plan of a classroom. Follow the instructions. | Individual work, monitored, |
| | T explains that the rows are counted from the front and columns are counted from the left. Elicit that, e.g., C2, R1 means Column 2, Row 1. | helped Drawn on BB or use enlarged copy master or OHP |
| | Ps tick or colour according to the instructions. | Agreement, self-correcting, |
| | Review at BB with whole class. Ps come out to BB to show their solutions. Class agrees/disagrees. Mistakes corrected. | praising |
| | d) T chooses Ps at random. They describe where they are relative to other Ps. e.g. 'I am behind A and in front of B C is on my left and D is on | Involve several Ps |
| | my right', or 'A is in front of me and B is behind me, I am on the right | Class points out errors. |
| | of C and on the left of D '. | Agreement, praising |
| Extension | Ps could be given copies of their own classroom plan and write the initials of their classmates in the correct positions. | Can be done at home If Ps wish. |
| 7 | | |
| / | O 3 Read: Follow the instructions and draw the nictures | Individual work monitored, |
| | Elicit that $R = Right$, $L = Left$, $D = Down$, $U = Up$, the starting | helped |
| | point is the black dot, the first move is in the direction of the arrow and that P = Perimeter and A = Area. | Diagrams drawn on BB or use enlarged copy master or OHP |
| | Deal with one part at a time. Ps complete the drawing according to the instructions, then count the units and write in the perimeter and area. Review at BB with whole class. Ps come out to show what | Initial whole class discussion on meaning of abbreviations |
| | they have done and class agrees/disagrees. Mistakes corrected. | Agreement, self-correction, praising |
| | Deal with one part at a time. Ps start at the dot and write | |
| | instructions at side of diagram in <i>Pbs</i> . Then they count the units and write in the perimeter and area. Review at BB with whole class. Ps dicatate to T and class agrees/disagrees. Mistakes corrected. | What do the drawings remind you of? Ask several Ps what they think. (In good humour!) |
| | Solution: | Instructions for: |
| | | c) R1, D1, R1, U1, R1, D1, R1, U1, R1, D2, L1, D2, R1, D1, L5, U1, R1, U2, L1, U2 |
| | P = 18 units $A = 8 square units$ $P = 28 units$ $A = 19 square units$ | d) U1, R1, U3, R1, D3, R3, U1, R1, D3, L1, U1, L3, |
| Extension | b) P = 16 units A = 10 square units P = 30 units A = 14 square units 45 min | Ps take grid sheets home, draw own shape and write instructions on how to draw it. Ps draw neighbour's shapes in <i>Lesson 110</i> . |

| Activity | | Notes |
| 1 | Mental multiplication and division practice T says a multiplication or division. P says the result. e.g. 7×6 , 3×8 , 5×7 , 6×4 , etc.; $48 \div 6$, $49 \div 7$, $63 \div 9$, etc.; 9×1 , 9×10 , 9×100 ; 17×1 , 17×10 , 17×100 , etc.; $24 \div 3$, $140 \div 7$, $160 \div 40$; $27 \div 9$, $270 \div 9$, $270 \div 90$, etc.; 0×100 , 10×21 , 2×50 , 3×33 , 4×25 , 5×50 , 8×51 , etc. | Whole class activity T chooses Ps at random If a P makes a mistake, the next P corrects it. At speed Praising, encouragement only |
| 2 | Missing numbersStudy this table and think about what the rule could be. Class agrees on one form of the rule. Ps come out to BB to choose a column and fill in the missing numbers, explaining reasoning. Ps write difficult calculations at side of BB or in <i>Ex. Bks</i> . Class agrees/disagrees.Who can write the rule in a mathematical way? Who agrees? Who can think of another way? etc.BB: a a 700 670 835 1365 1453 790 1629 1675 555 320 | Whole class activity Table drawn on BB or use enlarged copy master or OHP At a good pace Discussion, reasoning, agreement, praising BB: e.g. 415 518 1675 555 + 375 $+1111$ $-$ 455 $-$ 268 |
| | $\begin{array}{c ccccccccccccccccccccccccccccccccccc$ | 79016291220287Encourage Ps to use the words: 'reductant,' 'subtrahend' and 'difference' in their reasoning. |
| 3 | Problems Listen carefully, write the data and do the calculation in your <i>Ex. Bks.</i> Show me your answer when I say. a) After a sponsored run for charity, a school collected 196 £1 coins, 55 £2 coins and 23 £10 notes. How much money did the school collect altogether? Show me your answer now! (£536) A, tell us how you worked it out. Who agrees? Who did it a different way? B, what mistake did you make? etc. BB: 196 × £1 + 55 × £2 + 23 × £10 196 110 ± 230 ± £136 ± £136 ± £136 ± £136 ± £336 ± £336 ± £336 ± £336 ± £336 ± £336 ± £336 ± £336 ± £336 ± £336 ± £336 ± £536 ± £336 ± £336 ± £536 | Individual work, monitored T repeats slowly. In unison (on scrap paper or plastic 'slates') Reasoning, agreement, self- correction, praising Check by adding in opposite direction. Ps say answer as a sentence. T repeats slowly. In unison (on scrap paper or plastic 'slates') Reasoning, agreement, self- correction, praising Check by doing addition. Ps give answer in different ways: pence, £s and p, £s. |
| | Answer: She had $\pounds 6.67$ left. | Ps say answer as a sentence. |

| 3 | (Continued) c) Last month, Cilla saved up 198 1 p coins, 25 5 p coins and 40 2 p coins. This month she saved up another £8.96. How much money does Cilla have now? Show me your answer now! (£12.99) E, tell us how you worked it out. Who agrees? Who did it a different way? F, what mistake did you make? etc. BB: Last month: $198 \times 1 \text{ p} + 25 \times 5 \text{ p} + 40 \times 2 \text{ p}$ 125 e.g. = $198 \text{ p} + 125 \text{ p} + 80 \text{ p} = 403 \text{ p} + \frac{80}{403}$ This month: £8.96 = 896 p 40.3 Now has: $403 \text{ p} + 896 \text{ p} + \frac{89.6}{1299}$ Answer: Cilla now has £12.99. | T repeats slowly. Ps sit up with arms folded when ready. In unison (on scrap paper or plastic 'slates') Reasoning, agreement, self- correction, praising Or calculation done 125 as one addition: 80 $+ \frac{896}{1299}$ or 403 p = £4.03 £4.03 + £8.96 = £12.99 |
| 4 | 20 min | |
| | a) Everyone stand up and face North. Follow my instructions and tell me in which direction you end up facing when I say. Make a quarter turn to the left. Tell me now! (West) Make a half turn to your left. Tell me now! (East) Turn a right angle to your right. Tell me now! (South) (If a P does it correctly, allow P to explain. Otherwise T demonstrates that turning through a <u>right angle</u> is the same as a making a quarter turn.) Turn 2 right angles to your left. Tell me now! (North) Elicit that turning through 2 right angles is the same as making half a turn. b) T shows class a real compass. Who has seen a compass being used? Ps tell class their experiences. If nobody has, T talks about its uses. (e.g. orienteering, hiking, sailing, being lost on a moor or in the snow or at sea or in the desert (where there are no landmarks to guide you) etc, and how the sun rises in the East and sinks in the West, etc.) T draws a cross on BB. Ps dictate where T should write N, S, E, W. Who knows where North-West (South-East,) etc. would be? Ps come out to show them. Class agrees/disagrees. Elicit that, e.g. North-West is exactly half-way between North and West. Ps draw the compass points in their <i>Ex. Bks.</i> Lay your pencil on the arrow pointing towards North on the diagram. Turn it through a right angle to the right. Where is it pointing now? (East) Repeat with other similar instructions. Lay your pencil along the arrow pointing to North again. Now turn it so that it points NE. What kind of turn has it made? (half a right angle, or 1 eighth of a turn) T demonstrates on BB too. Now point the arrrow showing North in your <i>Ex. Bks</i> to the <u>real</u> direction North (towards 'N' on the wall). T checks quickly | Whole class activity 'N' still on classroom wall Ps shout out in unison In good humour! BB: <u>1 right angle turn</u> $E \qquad = 1$ quarter of a turn If possible, Ps have small compasses on desks. Discussion on the compass and compass points. BB: (NW) (NE) $W \qquad = E$ $(SW) \qquad (NE)$ Ps shout out in unison Ps can choose the compass points too. BB: <u>half a right angle turn</u> $N \qquad = 1$ eighth of a turn |
