	1  Th = 10  H = 100  T = 1000

Whole numbers ending in 0, 2, 4, 6, 8 are EVEN (and divisible by 2 with no remainder). Whole numbers ending in 1, 3, 5, 7, 9 are ODD (and have remainder 1 when divided by 2).

(Note that all squares are rectangles and all rectangles are quadrilaterals.)

## Divisor or Factor and Multiple

Any whole number that divides exactly into a whole number with no remainder is called a *divisor* or *factor* of the number.

For example, 1, 2, 3, 4, 6 and 12 are all divisors (or factors) of 12.

Any whole number that can be divided by a whole number with no remainder is called a *multiple* of the number.

For example, 5, 10, 15, 20, . . . are all multiples of 5.
