

Bk4	<p>R: Mental calculation</p> <p>C: Revision: numbers to 1000. Writing and ordering. Rounding</p> <p>E: <i>Numbers up to 2000</i></p>	<p><i>Lesson Plan</i></p> <p><i>1</i></p>
<p>Activity</p> <p>1</p>	<p>Combinatorics</p> <p>In how many different ways can we write the word 'ONE' if we can read the letters by taking one step to the right or 1 step down?</p> <p>Ps come to BB to show the different ways. Who agrees? Who can think of another way? etc. Agree that there are 4 ways.</p> <p>BB:</p> <p>a) ONE $\left[\begin{array}{cccc} \text{ONE} & \text{ON} & \text{O} & \text{O} \\ & \text{E} & \text{NE} & \text{N} \\ & & & \text{E} \end{array} \right]$ 4 different ways</p> <p>We can show them as one diagram like this. BB: $\begin{array}{c} \text{ONE} \\ \text{NE} \\ \text{E} \end{array}$</p> <p>Class checks that all the 4 possible ways are shown.</p> <p>Let's think of how many different ways we can get to each position. T points to each letter in turn and Ps say how many different ways they can get to it. T writes as numbers on BB. T circles the 'end' numbers and writes it as an addition.</p> <p>BB:</p> <p>$\begin{array}{ccc} \text{ONE} & 1 & 1 & 1 \\ \text{NE} & & 1 & 2 \\ \text{E} & & & 1 \end{array}$ $1 + 2 + 1 = 4$</p> <p>Repeat for 4-letter and 5-letter words, e.g.</p> <p>b) MORE $\begin{array}{cccc} & 1 & 1 & 1 & 1 \\ \text{ORE} & & 1 & 2 & 3 \\ \text{RE} & & & 1 & 3 \\ \text{E} & & & & 1 \end{array}$ $1 + 3 + 3 + 1 = 8$ (different ways)</p> <p>c) SUGAR $\begin{array}{ccccc} & 1 & 1 & 1 & 1 & 1 \\ \text{UGAR} & & 1 & 2 & 3 & 4 \\ \text{GAR} & & & 1 & 3 & 6 \\ \text{AR} & & & & 1 & 4 \\ \text{R} & & & & & 1 \end{array}$ $1 + 4 + 6 + 4 + 1 = 16$ (different ways)</p> <p style="text-align: right;">9 min</p>	<p>Notes</p> <p>Whole class activity</p> <p>Words written on BB or letters on cards stuck to BB.</p> <p>Agreement, praising</p> <p>Ps may notice the easiest way of calculation of the possible cases by themselves.</p> <p>The numbers show the number of routes to that place.</p> <p>Ps could suggest the words.</p>
<p>2</p>	<p>Problems</p> <p>Listen to the problem. Think about how you would work out the answer.</p> <p>a) <i>I divided 10 into two parts, then I divided one part by the other part. The quotient is 4. What are the two numbers?</i></p> <p>T asks several Ps what they think (or the numbers could be written on slates and shown in unison). P answering correctly explains method of solution to the others. Who did the same? Who did it a different way? etc. e.g.</p> <p>i) <i>Trial and error 1:</i> $10 = 7 + 3$ but $7 \div 3 \neq 4$ $= 8 + 2$ and $8 \div 2 = 4$ ✓</p> <p>ii) <i>Trial and error 2:</i> Rule: $b = 4 \times a$ $\begin{array}{c c c} a & 1 & 2 & 3 \\ \hline b & 4 & 8 & 12 \end{array}$ Check: $2 + 8 = 10$</p> <p>iii) <i>Equation:</i> $a + 4 \times a = 10$ $5a = 10$ $a = 2$ so one number is 2 and the other is $10 - 2 = 8$ (or $4 \times a = 8$)</p>	<p>Whole class activity (or individual trial first if Ps wish)</p> <p>Give Ps time to think.</p> <p>Discussion. Ps come to BB or dictate what T should write.</p> <p>Reasoning, agreement, praising</p> <p>Accept all correct methods but stress most logical method using an equation.</p> <p>T shows it if no P suggests it.</p>

Bk4		<i>Lesson Plan 1</i>						
Activity	<p>b) <i>I subtracted an even number from an odd number. Then I multiplied the difference by thirteen. Next I doubled the product. Was the result an even or an odd number?</i></p> <p>T asks several Ps what they think. Why do you think so? Who agrees? Who thinks something else? etc.</p> <p>(It must be even as any number multiplied by 2 has an even result. Only the last step (doubling) is important!)</p> <p>Ps may check it if they wish. e.g.</p> <p>BB: $9 - 6 = 3$, $3 \times 13 = 39$, $39 \times 2 = 78$, which is <u>even</u>.</p> <p style="text-align: right;">18 min</p>	Notes						
<p>3</p>	<p>Making 3-digit numbers</p> <p>a) Let's make 3-digit numbers from these number cards. BB: 3 9 2</p> <p>Let's write them in increasing order. Ps dictate to T:</p> <p>BB: $239 < 293 < 329 < 392 < 923 < 932$</p> <p>Agree that there are 3 possible hundreds digits, then for every hundreds digit there are 2 possible tens digits, then for every tens digit there is only one possible units digit, i.e. $3 \times 2 \times 1 = 6$ possible numbers.</p> <p>b) How many 3-digit numbers can we make from 3 digits if we can use a digit more than once? What kind of diagram can we draw to help us? (<u>Tree diagram</u>) Who remember how to draw it?</p> <p>BB:</p>  <p>Agree that there are <u>27</u> possible numbers. Could we have reasoned <u>without</u> drawing the tree diagram? (We had 3 possible choices for the hundreds digit, then 3 choices for the tens digit, then 3 choices for the units digit, i.e. $3 \times 3 \times 3 = 27$.) T shows in table on BB.</p> <p>Who can think of questions to ask about these numbers? e.g.</p> <ul style="list-style-type: none"> How many are even (odd)? (9, 18) What fraction of them are even (odd)? (1 third, 2 thirds) How many have all 3 digits the same? (3) <p>Discuss place value and real value. e.g. $222 = 200 + 20 + 2$</p> <ul style="list-style-type: none"> How many are divisible by 3 (4)? (8, 6) <p style="text-align: right;">24 min</p>	<p>Whole class activity</p> <p>Number cards stuck on BB</p> <p>(Ps could have the number cards on desk too.)</p> <p>Reasoning, agreement, praising</p> <p>Ps suggest strategy and draw it on BB and in <i>Ex. Bks.</i> with T's help if necessary.</p> <p>At a good pace</p> <p>Reasoning, agreement, praising</p> <p>BB: <table style="display: inline-table; border-collapse: collapse;"><tr><td style="border-right: 1px solid black; padding: 0 5px;">H</td><td style="border-right: 1px solid black; padding: 0 5px;">T</td><td style="padding: 0 5px;">U</td></tr><tr><td style="border-right: 1px solid black; padding: 0 5px; text-align: center;">3 ✕</td><td style="border-right: 1px solid black; padding: 0 5px; text-align: center;">3 ✕</td><td style="padding: 0 5px; text-align: center;">3</td></tr></table></p> <p>T gives hints if Ps cannot think of any.</p> <p>Praise all contributions.</p> <p>Extra praise for clever questions.</p>	H	T	U	3 ✕	3 ✕	3
H	T	U						
3 ✕	3 ✕	3						
<p>4</p>	<p>Book 4, page 1</p> <p>Q.1 Read: <i>Write the numbers in the place value table.</i></p> <p>Review at BB with whole class. Ps come out to write in the numbers, explaining reasoning. Who made a mistake? What kind of mistake? Deal with all cases.</p> <p>Lets read the numbers in increasing (decreasing) order.</p> <p style="text-align: right;">29 min</p>	<p>Individual work, monitored (helped)</p> <p>Use enlarged copy master/OHP</p> <p>Agreement, self-correction, praising</p> <p>In unison, at speed</p> <p>Feedback for T</p>						

Bk4		<i>Lesson Plan 1</i>																																																
Activity 5	<p>Book 4, page 1</p> <p>Q.2 Read: <i>Write these numbers as digits and list them in increasing order.</i></p> <p>T could choose a P to read each number aloud and Ps could write as digits above the words. Then Ps list in order.</p> <p>Review at BB with whole class. Ps dictate what T should write. Mistakes discussed and corrected</p> <p>BB: $98 < 560 < 605 < 777 < 1418$</p> <p>Extension</p> <p>Let's round the numbers to the nearest hundred (ten). T points to each number in turn and Ps say the rounded value.</p> <p style="text-align: right;">34 min</p>	<p>Notes</p> <p>Individual work, monitored, helped</p> <p>Agreement, self-correction, praising</p> <p>Ps chosen at random. At speed. Class points out errors.</p>																																																
6	<p>Book 4, page 1</p> <p>Q.3 Read: <i>Write these numbers in the correct sets.</i></p> <p>Deal with one part at a time. Set a time limit. Review at BB with whole class. Mistakes discussed and corrected.</p> <p><i>Solution:</i></p> <p>{6, 10, 54, 109, 468, 893, 1000, 1302, 1517, 1999}</p> <div style="display: flex; justify-content: space-around;"> <div style="border: 1px solid black; padding: 5px; margin: 5px;"> <p>a)</p> <table style="border-collapse: collapse;"> <tr><td style="padding: 2px 10px;">6</td><td style="padding: 2px 10px;">1000</td><td style="border-left: 1px solid black; padding: 2px 10px;">109</td></tr> <tr><td style="padding: 2px 10px;">10</td><td style="padding: 2px 10px;">1302</td><td style="border-left: 1px solid black; padding: 2px 10px;">893</td></tr> <tr><td style="padding: 2px 10px;">54</td><td></td><td style="border-left: 1px solid black; padding: 2px 10px;">1517</td></tr> <tr><td style="padding: 2px 10px;">468</td><td></td><td style="border-left: 1px solid black; padding: 2px 10px;">1999</td></tr> </table> <div style="position: absolute; top: 50%; left: 50%; transform: translate(-50%, -50%) rotate(45deg); font-size: 0.8em;"> Even numbers Odd numbers </div> </div> <div style="border: 1px solid black; padding: 5px; margin: 5px;"> <p>b)</p> <table style="border-collapse: collapse;"> <tr><td style="padding: 2px 10px;">1000</td><td style="border-left: 1px solid black; padding: 2px 10px;">6</td><td style="padding: 2px 10px;">109</td></tr> <tr><td style="padding: 2px 10px;">1302</td><td style="border-left: 1px solid black; padding: 2px 10px;">10</td><td style="padding: 2px 10px;">468</td></tr> <tr><td style="padding: 2px 10px;">1517</td><td style="border-left: 1px solid black; padding: 2px 10px;">54</td><td style="padding: 2px 10px;">893</td></tr> <tr><td style="padding: 2px 10px;">1999</td><td></td><td></td></tr> </table> <div style="position: absolute; top: 50%; left: 50%; transform: translate(-50%, -50%) rotate(45deg); font-size: 0.8em;"> 4-digits Not 4-digits </div> </div> </div> <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div style="border: 1px solid black; padding: 5px; margin: 5px;"> <p>c)</p> <table style="border-collapse: collapse;"> <tr><td style="padding: 2px 10px;">10</td><td style="padding: 2px 10px;">1999</td><td style="border-left: 1px solid black; padding: 2px 10px;">6</td></tr> <tr><td style="padding: 2px 10px;">1000</td><td style="padding: 2px 10px;">109</td><td style="border-left: 1px solid black; padding: 2px 10px;">54</td></tr> <tr><td style="padding: 2px 10px;">1302</td><td></td><td style="border-left: 1px solid black; padding: 2px 10px;">468</td></tr> <tr><td style="padding: 2px 10px;">1517</td><td></td><td style="border-left: 1px solid black; padding: 2px 10px;">893</td></tr> </table> <div style="position: absolute; top: 50%; left: 50%; transform: translate(-50%, -50%) rotate(45deg); font-size: 0.8em;"> Has the digit 1 Has no digit 1 </div> </div> <div style="border: 1px solid black; padding: 5px; margin: 5px;"> <p>d)</p> <table style="border-collapse: collapse;"> <tr><td style="padding: 2px 10px;">6</td><td style="padding: 2px 10px;">468</td><td style="border-left: 1px solid black; padding: 2px 10px;">1302</td></tr> <tr><td style="padding: 2px 10px;">10</td><td style="padding: 2px 10px;">893</td><td style="border-left: 1px solid black; padding: 2px 10px;">1517</td></tr> <tr><td style="padding: 2px 10px;">54</td><td></td><td style="border-left: 1px solid black; padding: 2px 10px;">1999</td></tr> <tr><td style="padding: 2px 10px;">109</td><td style="padding: 2px 10px;">1000</td><td></td></tr> </table> <div style="position: absolute; top: 50%; left: 50%; transform: translate(-50%, -50%) rotate(45deg); font-size: 0.8em;"> Not greater than 1000 Greater than 1000 </div> </div> </div> <p style="text-align: right;">40 min</p>	6	1000	109	10	1302	893	54		1517	468		1999	1000	6	109	1302	10	468	1517	54	893	1999			10	1999	6	1000	109	54	1302		468	1517		893	6	468	1302	10	893	1517	54		1999	109	1000		<p>Individual work, monitored, helped</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Discussion, agreement, self-correction</p> <p>Praising only for numbers beyond 1000.</p>

7	<p>Book 4, page 1, Q.4</p> <p>Read: <i>Study the numbers. Are the statements true or false? Write T or F in each box.</i></p> <p>T chooses a P to read statement aloud. Is it true or false? Show me . . . now! (on slates or scrap paper)</p> <p>a) There is at least one number which is odd. (T)</p> <p>b) All the numbers are even. (F)</p> <p>c) None of the numbers is more than 1500. (T)</p> <p>d) There are no whole tens. (F)</p> <p>e) Not every number is odd. (T)</p> <p>Who can think of another statement which means the same as (i.e. is <u>equivalent</u> to) this one? T points to each in turn. Ps suggest statements. Class decides whether it is equivalent.</p> <p>e.g. a) There is at least one number which is odd. (Not every number is even.)</p> <p style="text-align: right;">45 min</p>	<p>Whole class activity (or individual work if Ps wish)</p> <p>In unison. Ps give reasons for their answers.</p> <p>(e.g. 23 is odd) (e.g. 23 is not even) (the largest, $1499 < 1500$) (e.g. 1240 is a whole ten) (e.g. 802 is even)</p> <p>BB: <u>equivalent</u> (means the same)</p> <p>N.B. 0 is even and can be thought of as no whole ten.</p>																																																

Bk4	<p>R: Mental calculation</p> <p>C: Numbers up to 1000. Comparison. Rounding</p> <p>E: Numbers up to 2000. Roman numerals</p>	<p><i>Lesson Plan</i></p> <p>2</p>
<p>Activity</p> <p>1</p>	<p>Writing numbers</p> <p>a) T dictates numbers up to 1000 (2000) and Ps write them in <i>Ex. Bks.</i> Review at BB with whole class. Mistakes discussed and corrected.</p> <p>b) Ps dictate numbers and choose other Ps to write them as digits on the BB. Class agrees/disagrees.</p> <p>Extension</p> <p>T points to some of numbers on BB and Ps round to nearest 10 (100).</p> <p style="text-align: right;">8 min</p>	<p>Notes</p> <p>Individual writing but class kept together.</p> <p>T could have numbers already prepared on SB/OHT.</p> <p>Discussion, agreement, self-correcting, praising</p> <p>At a good pace!</p>
<p>2</p>	<p>Find the mistakes</p> <p><i>Birdy</i> has tried to write the same number in different ways but he has made a couple of mistakes. Let's help him to find and correct them.</p> <p>Ps come to BB to underline the mistake, say why it is wrong and then to write it again correctly. Class agrees/disagrees.</p> <p>BB:</p> <p style="text-align: center;">(7 × 100)</p> <p>a) 7 hundred + 1 thousand + 3 units; 1 × 1000 + 7 × 10 + 3 × 1; ✗ 17 hundreds + 3 units; ✓ one thousand seven hundred and 3; ✓ 1000 + 700 + 3; ✓ 1 thousand + 70 tens + 3 units ✓</p> <p>b) 1 × 1000 + 4 × 100 + 3 × 10 + 4 × 1; ✓ 143 tens + 4 units; ✓ one thousand, four hundred and thirty <u>one</u>; ✗ 1000 + 400 + 30 + 4; ✓ 14 hundreds + 34 ✓ (four)</p> <p style="text-align: right;">13 min</p>	<p>Whole class activity</p> <p>Written on BB or SB or OHT or use enlarged copy master</p> <p>At a good pace</p> <p>Reasoning, agreement, praising</p> <p>Feedback for T</p>
<p>3</p>	<p>Book 4, page 2</p> <p>Q.1 Read: <i>Fill in the missing numbers, then list them in decreasing order.</i></p> <p>Set a time limit. Ps write numbers in boxes first. Review with whole class. Mistakes discussed and corrected.</p> <p>BB:</p> <p>8 × 100 + 5 × 10 = <u>850</u> 3 × + 7 × 1 = <u>307</u> 8 × 100 + 5 × 1 = <u>805</u> 3 × 100 + 7 × 10 = <u>370</u> 1 × 1000 + 6 × 10 = <u>1060</u> 1 × 1000 + 8 × 100 = <u>1800</u> 1 × 1000 + 6 × 1 = <u>1006</u> 1 × 100 + 8 × 10 = <u>180</u></p> <p>Then Ps list in decreasing order in <i>Pbs.</i> Review at BB with whole class. Ps dictate to T or come to BB. Mistakes corrected.</p> <p>BB: 1800 > 1060 > 1006 > 850 > 805 > 370 > 307 > 180</p> <p style="text-align: right;">18 min</p>	<p>Individual work, monitored</p> <p>Differentiation by time limit</p> <p>Operations written on BB or SB or OHT</p> <p>Encourage Ps to say the whole equation.</p> <p>Make sure that mistakes are corrected before Ps order the numbers.</p> <p>Individual work, monitored</p> <p>Agreement, self-correction, praising</p>
<p>4</p>	<p>Book 4, page 2</p> <p>Q.2 Read: <i>Fill in the missing numbers, then list them in increasing order.</i></p> <p>Set a time limit. Ps write numbers in boxes first. Review with whole class. Mistakes discussed and corrected.</p> <p>BB:</p> <p>600 + 30 = <u>630</u> 1000 + 500 + 4 = <u>1504</u> 300 + 60 = <u>360</u> 1000 + 40 + 5 = <u>1045</u> 600 + 3 = <u>603</u> 1000 + 900 + 1 = <u>1901</u> 300 + 6 = <u>306</u> 1000 + 90 + 1 = <u>1091</u></p> <p>Then Ps list in decreasing order in <i>Pbs.</i> Review at BB with whole class. Ps dictate to T or come to BB. Mistakes corrected.</p> <p>BB: 306 < 360 < 603 < 630 < 1045 < 1091 < 1504 < 1901</p> <p style="text-align: right;">23 min</p>	<p>Individual work, monitored</p> <p>Differentiation by time limit</p> <p>Operations written on BB or SB or OHT</p> <p>Encourage Ps to say the whole equation.</p> <p>Make sure that mistakes are corrected before Ps order the numbers.</p> <p>Agreement, self-correction, praising</p>

Bk4		<i>Lesson Plan 2</i>
<p>Activity</p> <p>9</p>	<p>Book 4, page 2</p> <p>Q.5 Read: <i>Write the numbers which have:</i></p> <ul style="list-style-type: none"> a) <i>an even digit as their hundreds digit and 500 as their nearest ten.</i> b) <i>an odd digit as their hundreds digit and 500 as their nearest ten.</i> c) <i>the smallest even digit as their tens digit and 1010 as their nearest ten.</i> <p>Deal with one part at a time. Ps write numbers in <i>Pbs</i>. Review at BB with whole class. A, what numbers did you write? Who agrees? Who thinks another number? Let's check them! Mistakes corrected and omissions added.</p> <p><i>Solution:</i></p> <ul style="list-style-type: none"> a) 495, 496, 497, 498, 499 b) 500, 501, 502, 503, 504 c) 1005, 1006, 1007, 1008, 1009 <p>Extension</p> <p>Who could write the solution to each part as an inequality?</p> <p style="text-align: right;">45 min</p>	<p>Notes</p> <p>Individual trial first, monitored, helped (or whole class activity if time is short)</p> <p>Discussion, reasoning, agreement, self-correction, praising</p> <p>In part c) agree beforehand that 0 is the smallest even digit.</p> <p>e.g. a) $495 \leq n < 500$ Agreement, praising</p>

Bk4	<p>R: Mental calculation</p> <p>C: Numbers up to 1000. Comparison. Rounding. Sequences</p> <p>E: <i>Numbers up to 2000</i></p>	<p><i>Lesson Plan</i></p> <p>3</p>
<p>Activity</p> <p>1</p>	<p>Numbers with digit 1</p> <p>Let's list the numbers which have 1 as one of their digits. Let's list them in increasing order. Ps dictate numbers to T who writes on BB.</p> <p>BB: 1, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 21, 31, 41, 51, 61, 71, 81, 91, 100, 101, 102, 103, ...</p> <p>Extra praise when Ps realise that all numbers with 1 in the units, tens, hundreds and/or thousands columns will be included!</p> <p>5 min</p>	<p>Notes</p> <p>Whole class activity</p> <p>At speed round class</p> <p>Agreement, praising</p> <p>T decides when to stop!</p> <p>Discussion on general case.</p>
<p>2</p>	<p>Sequences</p> <p>T says first few terms of a sequence and Ps continue it. What is the rule?</p> <p>a) 777, 766, 755, (744, 733, 722, 711, 700, 689, 678, 667, ...) [Rule: - 11]</p> <p>b) 32, 182, 332, (482, 632, 782, 932, 1082, ...) [Rule: + 150]</p> <p>c) 1, 3, 7, 15, 31, (63, 127, 255, 511, 1023, 2047, ...) [Rule: 2 times the previous term plus 1]</p> <p>(For T only: $a_{n+1} = a_n \times 2 + 1$)</p> <p>12 min</p>	<p>Whole class activity</p> <p>At speed round class</p> <p>If a P makes a mistake, next P corrects it.</p> <p>Discussion/agreement on the rule.</p> <p>Ps can write terms in their <i>Ex. Bks.</i> if they cannot keep them in mind.</p> <p>Praising, encouragement only</p>
<p>3</p>	<p>Book 4, page 3</p> <p>Q.1 Read: <i>The rule for the next term in the sequence is: 3 times the previous term plus 2.</i></p> <p>a) Write the first six terms of the sequence if the first term is 2.</p> <p>b) Write the first six terms of the sequence if the first term is 3.</p> <p>Set a time limit. Ps can do calculations in <i>Ex. Bks</i> if necessary.</p> <p>Review at BB with whole class. Ps come to BB or dictate terms to T. Class agrees/disagrees. Mistakes corrected.</p> <p><i>Solution:</i></p> <p>a) 2, 8, 26, 80, 242, 728 (All terms are even numbers)</p> <p>b) 3, 11, 35, 107, 322, 971 (All terms are odd)</p> <p>18 min</p>	<p>Individual work, monitored, helped</p> <p>Differentiation by time limit</p> <p>Or if class is less able, deal with one part at a time.</p> <p>Discussion, agreement, self-correction, praising</p> <p>Details of calculations written on BB if problems, e.g.</p> $242 \times 3 = 600 + 120 + 6 = 726$ <p>What do you notice about the terms in each sequence?</p>
<p>4</p> <p>Extension</p>	<p>Which digits?</p> <p>T writes a string of digits on BB. Which 3 digits would you cross out so that the remaining digits make as great a number as possible without changing the order?</p> <p>Ps can try it in <i>Ex. Bks</i> first if they wish. X, come and show us which digits you think should be crossed out. What number is left? Class reads it in unison. Who agrees with X? Who thinks something else? etc. Repeat for other strings of digits. e.g.</p> <p>BB: a) 987987 → 987987 → 998 (Smallest: 787)</p> <p>b) 454532 → 454532 → 553 432</p> <p>c) 1100345 → 1100345 → 1345 1003)</p> <p>Which digits would you cross out if you wanted to make the smallest number possible?</p> <p>25 min</p>	<p>Whole class activity</p> <p>T could demonstrate on BB first if Ps do not understand what to do.</p> <p>Reasoning, agreement, praising</p> <p>Ps could dictate strings of digits too!</p> <p>Agreement, praising</p>

Bk4*Lesson Plan 3***Activity****5****Book 4, page 3**Q.2 Read: *Complete the tables.*

Do first 2 lines of each table with whole class first if necessary (or deal with one part at a time). Set a time limit.

Review at BB with whole class. Ps come to BB or dictate to T. Mistakes discussed and corrected. If problems, show on relevant part of number line (drawn on BB).

Solution:

a)

Number	Next 10		Rounded to nearest 10
	smaller	greater	
3	0	10	0
27	20	30	30
86	80	90	90
105	100	110	110
341	340	350	340
450	440	460	450
500	490	510	500
996	990	1000	1000

b)

Number	Next 100		Rounded to nearest 100
	smaller	greater	
3	0	100	0
27	0	100	0
86	0	100	100
105	100	200	100
341	300	400	300
450	400	500	500
500	400	600	500
996	900	1000	1000

35 min

Notes

Individual work, monitored (helped)

Tables drawn on BB or use enlarged copy master or OHP

Reasoning, agreement, self-correction, praising

Agree that:

5 is rounded up to nearest 10

50 is rounded up to nearest 100

Feedback for T

6**Book 4, page 3**Q.3 Read: *Mark the numbers with a dot and a letter on a suitable number line.*

Talk about each number line first. Elicit what the 'ticks' mean.

(e.g. *top number line*: 200 to 300, small tick at every 1;

middle number line: 400 to 500, small tick at every 5;

bottom number line: 600 to 1600, tick at every 100)

Make sure that Ps know to write only the letter above each dot and that some dots need only be approximate. Set a time limit.

Review at BB with whole class. Ps come to BB to draw dots and write letters, explaining reasoning. Class agrees/disagrees.

Who made a mistake? What was your mistake? Who did the same? etc. Mistakes corrected.

Solution:

$a = 205$ $b = 640$ $c = 432$ $d = 278$ $e = 486$ $f = 1005$
 $g = 490$ $h = 250$ $i = 1075$ $j = 500$ $k = 1200$ $l = 455$

40 min

Individual work, monitored, helped (or whole class activity if Ps prefer)

Drawn on BB or use enlarged copy master or OHP

Discussion on distance between 'ticks' on the number lines

Do *a* and *b* with whole class first if Ps are unsure.

Differentiation by time limit

At a good pace

Reasoning, agreement, self-correcting, praising

Extension

- T (or P) points to a tick on a number line and Ps say the number.
- T (or P) says a number and chooses a P to point to its position on a suitable number line.

In good humour!

Bk4*Lesson Plan 3***Activity****7*****Book 4, page 3, Q.4***Read: *Write the numbers in the set diagram.*

Elicit that 'divisible by 5' means that there is no remainder when that number is divided by 5. Let's see how quickly we can do this!

Ps come to BB to choose a number, cross it off the list and write it in correct set, explaining reasoning. Class agrees/disagrees.

Solution:

5, 100, 909,
0, 217, 1000,
13, 352, 1215,
60, 834, 1605,
78, 900, 1780

The number is	even	odd
divisible by 5	100 60 900 1000 0 1780	5 1215 1605
not divisible by 5	352 834 78	909 217 13

T (P) points to each set in turn and Ps think of other numbers which could belong in that set.

*45 min***Notes**

Whole class activity

Drawn on BB or use enlarged copy master or OHP

At a good pace

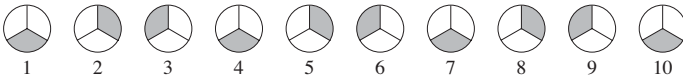

Reasoning, agreement, correcting, praising

Ps can write numbers in table in *Pbs* too.

(Or individual work if Ps prefer, reviewed at BB with whole class)

In good humour!
Praising only!

Bk4	<p>R: Calculation</p> <p>C: Numbers up to 1000</p> <p>E: <i>Numbers up to 2000</i></p>	<p><i>Lesson Plan</i></p> <p>4</p>
<p>Activity</p> <p>1</p>	<p>Reading and marking numbers</p> <p>T has numbers written as words on BB or SB or OHT. T chooses a P to read each number, then to come to BB to write it as digits and mark its position on the number line. Class agrees/disagrees.</p> <p>BB: e.g. forty five, one hundred and fifty, four hundred and eighty, three hundred and twenty, eight hundred and five, seven hundred and ninety, one thousand and ten, etc.</p>  <p style="text-align: right;">5 min</p>	<p>Notes</p> <p>Whole class activity</p> <p>T chooses Ps at random</p> <p>Number line drawn on BB or OHT or use enlarged copy master or OHP</p> <p>At a good pace</p> <p>Agreement, praising</p> <p>Ps can choose numbers too!</p> <p>Extension minus twenty (-20)</p>
<p>2</p>	<p>Divisibility by 5</p> <p>a) Let's list the 3-digit numbers which have 5 as the <u>sum</u> of their digits. First let's think of the possible 3-term additions. T writes on BB what Ps suggest. (e.g. BB: $1 + 4 + 0 = 5$, $1 + 3 + 1 = 5$, $1 + 2 + 2 = 5$, $2 + 3 + 0 = 5$, $5 + 0 + 0 = 5$)</p> <p>Now we can think of the possible numbers more easily. T writes on BB what Ps suggest.</p> <p>BB: 104, 140, 401, 410; 113, 131, 311; 122, 212, 221; 203, 230, 302, 320; 500</p> <p>Which of them are even numbers? Which of them are divisible by 5? Agree that any number which has 0 in the units column is divisible by 5.</p> <p>b) Lets list the 3-digit numbers which have 5 as the <u>product</u> of their digits. First let's think of the possible multiplications.</p> <p>What are the factors of 5? (only 1 and 5) T tells or elicits that numbers which have only 1 and the number itself as factors are called <u>prime numbers</u>. (BB)</p> <p>Elicit that the only possible multiplication is $1 \times 5 \times 1$ and that the order does not matter in multiplication.</p> <p>What 3-digit numbers have only 1, 1 and 5 as dgits? Ps come to BB to write them. Class agrees/ disagrees. BB: 115, 151, 511</p> <p>Which of them are divisible by 5? (115) Agree that all numbers which have either 5 or 0 in the units column are divisible by 5.</p> <p style="text-align: right;">10 min</p>	<p>Whole class activity</p> <p>Discussion on strategy</p> <p>Involve several Ps.</p> <p>Elicit that order in addition does not matter.</p> <p>Agreement, praising</p> <p>Elicit that none of the odd numbers are divisible by 5.</p> <p>Discussion on strategy</p> <p>Some Ps might remember this from previous years.</p> <p>BB: <u>Prime number</u></p> <p>factors: only 1 and itself</p> <p>Discussion, agreement, praising</p>

Bk4		<i>Lesson Plan 4</i>
Activity 3	<p>Book 4, page 4</p> <p>Q.1 Read: <i>Continue the pattern. Colour the correct part of the circles in the flow chart.</i></p> <p>Ps continue the pattern first, then try to understand what the flow diagram means. T explains ordinal numbers if necessary.</p> <p>Review at BB with whole class. Who can explain the flow chart to us? Who knows how to colour the circles? Who agrees? Who thinks something else?</p> <p>T leads the whole class through the flow chart, explaining clearly and relating to the 3 types of numbers.</p> <p>Solution:</p>  <pre> graph TD Start([Start]) --> Input[/Input ordinal number/] Input --> Divide[Divide it by 3] Divide --> Rem3{Is there a remainder?} Rem3 -- NO --> Circle1[Circle 1: bottom-left shaded] Rem3 -- YES --> Rem1{Is the remainder 1?} Rem1 -- YES --> Circle2[Circle 2: top-left shaded] Rem1 -- NO --> Circle3[Circle 3: top-right shaded] Circle1 --> End([End]) Circle2 --> End Circle3 --> End </pre> <p style="text-align: right;">16 min</p>	<p>Notes</p> <p>Individual work, monitored (or whole class activity)</p> <p>Drawn on BB or use enlarged copy master or OHP (position in an order)</p> <p>Discussion, agreement, checking, self-correction, praising</p> <p>Demonstration of, e.g. 15, 22, 29</p> <p>T says a number and Ps come to BB to show how its circle would be shaded.</p> <p>e.g. What would the 413th shape be?</p> $413 = 300 + 90 + 21 + \textcircled{2}$ <p style="text-align: center;">✓ ✓ ✓</p> <p>so shape would be </p>
4	<p>Roman numerals</p> <p>Who can write these Roman numerals as Arabic numbers?</p> <p>Ps come to BB to write numbers, explaining reasoning in detail. Class agrees/disagrees. Revise Roman numerals if necessary.</p> <p>BB: CCL = (250) CCLXXXI = (281) CCCLXIV = (364) CDVI = (406) DCCLIII = (753)</p> <p style="text-align: right;">20 min</p>	<p>Whole class activity</p> <p>Written on BB or SB or OHT</p> <p>At a good pace</p> <p>Details: e.g. CDVI = 500 – 100 + 5 + 1 = 400 + 6 = <u>406</u></p> <p>Agreement, praising</p>
5	<p>Book 4, page 4</p> <p>Q.2 Read: <i>Continue the sequences using Roman numerals.</i></p> <p>Set a time limit. Review at BB with whole class. Ps come to BB to write their sequence, explaining reasoning and rule.</p> <p>Who agrees? Who thinks something else? etc. All mistakes discussed and corrected.</p> <p>Solution:</p> <p>a) XLVII, LXVII, LXXXVII, (CVII, CXXVII, CXLVII, 47, 67, 87, 107, 127, 147, CLXVII, CLXXXVII, CCVII, ...) [Rule: + 20] 167, 187, 207</p> <p>b) CMI, DCCCI, DCCCI, (DCI, DI, CDI, CCCI, CCI, 901, 801, 701, 601, 501, 401, 301, 201, CI, I) [Rule: – 100] 101, 1</p> <p style="text-align: right;">25 min</p>	<p>Individual work, monitored, helped</p> <p>Differentiation by time limit</p> <p>Discussion on the rule, reasoning, agreement, self-correction, praising</p> <p>Feedback for T</p>

Bk4		Lesson Plan 4																																											
Activity		Notes																																											
6	<p>3-digit numbers</p> <p>T has numbers written (or stuck) on BB: 0, 1, 2, 3, 4, 5</p> <p>Choose from these numbers and make two 3-digit numbers so that:</p> <p>a) both are less than 300 Show me . . . now! (e.g. 250, 143)</p> <p>b) both are greater than 300 Show me . . . now! (e.g. 450, 321)</p> <p>c) both are even Show me . . . now! (e.g. 210, 534)</p> <p>d) the smaller number is odd and the greater number is even. Show me . . . now! (e.g. 341, 502)</p> <p>30 min</p>	<p>Whole class activity</p> <p>Ps could have number cards on desks too.</p> <p>Responses written on scrap paper or slates and shown in unison on command.</p> <p>T writes different correct solutions on BB.</p> <p>Agreement, praising only</p>																																											
7	<p>Specified numbers</p> <p>a) In your <i>Ex. Bks.</i> write all the numbers which have the greatest odd digit in their tens column and 1000 as their nearest 10.</p> <p>Ps dictate to T or come to BB. (995, 996, 997, 998, 999)</p> <p>b) Write the number which has 900 and 1000 as the next smaller and greater hundred and which is an equal distance from both.</p> <p>Ps could show on scrap paper or slates on command. (950)</p> <p>34 min</p>	<p>Whole class activity</p> <p>T repeats slowly and Ps repeat in own words.</p> <p>Give Ps time to think.</p> <p>Reasoning, agreement, praising</p>																																											
8	<p>Book 4, page 4</p> <p>Q.3 Read: <i>Round the numbers. Complete the table.</i></p> <p>Set a time limit. Review at BB with whole class. Ps come to BB or dictate to T. Mistakes discussed and corrected.</p> <p>Note the case of 1846, which rounds <u>up</u> to the nearest ten and nearest thousand but rounds <u>down</u> to the nearest hundred.</p> <p><i>Solution:</i></p> <table><tr><th rowspan="2">Number</th><th colspan="3">Rounded to the nearest:</th></tr><tr><th>ten</th><th>hundred</th><th>thousand</th></tr><tr><td>4</td><td>0</td><td>0</td><td>0</td></tr><tr><td>36</td><td>40</td><td>0</td><td>0</td></tr><tr><td>50</td><td>50</td><td>100</td><td>0</td></tr><tr><td>95</td><td>100</td><td>100</td><td>0</td></tr><tr><td>172</td><td>170</td><td>200</td><td>0</td></tr><tr><td>600</td><td>600</td><td>600</td><td>1000</td></tr><tr><td>999</td><td>1000</td><td>1000</td><td>1000</td></tr><tr><td>1050</td><td>1050</td><td>1100</td><td>1000</td></tr><tr><td>1846</td><td>1850</td><td>1800</td><td>2000</td></tr></table> <p>39 min</p>	Number	Rounded to the nearest:			ten	hundred	thousand	4	0	0	0	36	40	0	0	50	50	100	0	95	100	100	0	172	170	200	0	600	600	600	1000	999	1000	1000	1000	1050	1050	1100	1000	1846	1850	1800	2000	<p>Individual work, monitored, helped</p> <p>Table drawn on BB or use enlarged copy master or OHP</p> <p>Discussion, reasoning, agreement, self-correction, praising</p> <p>BB:</p> <p>5 rounds <u>up</u> to nearest 10</p> <p>50 rounds <u>up</u> to nearest 100</p> <p>500 rounds <u>up</u> to nearest 1000</p>

Bk4*Lesson Plan 4***Activity**

9

(Continued)

We could show the table in a different way using a Venn diagram.

BB:

A: 3-digit numbers

C: Even numbers

T explains that Natural numbers are all the positive, whole numbers (1, 2, 3, 4, 5, ...)

Who can explain where the different parts of the table are in the Venn diagram? What do A and C mean? Where are the numbers in D shown? Where would we put the 9 extra numbers? etc.

45 min

Notes

Whole class activity

Drawn on BB or use enlarged copy master or OHP

(If class is very able, construct the Venn diagram from scratch with Ps' help.)

Bold numbers are added.

e.g. 0, -6, 1 quarter, 3 and a half are not Natural numbers

Ps come to BB to explain, point and write.

Discussion, agreement, praising

Bk4

R: Calculation

C: Operations with numbers up to 1000. Addition, subtraction*E: Numbers up to 2000***Lesson Plan**
5**Activity****1****Mental practice**

T says an addition, P says sum. If a P makes a mistake, the next P must correct it. e.g.

20 + 90 (= 110), 31 + 50 (= 81), 150 + 400 (= 550), 7 + 16 (= 23),
45 + 47 (= 92), 132 + 68 (= 200), 435 + 435 (= 870), etc.

5 min

Notes

Whole class activity

In order round class

At speed

Ps can think of additions too!

Praising

2**Money models**

a) Let's calculate how much money these two people have altogether.

Ps come to BB to write amounts in the place value table, explaining reasoning. Class agrees/disagrees.

What should we do before we start the calculation? (Estimate)

Ps estimate the total mentally and come to BB to do the calculation, explaining reasoning in detail. Class agrees/disagrees.

BB:

Finlay:

100	100	10	10
100	100	10	

1	1	1
1	1	1

Glen:

100	10	10	10	10
100	100	10	10	10

8	4	0
5	6	0

 =

2	8	0
---	---	---

Horizontal method: $843 - 555 = 700 + 130 + 13 - 555$

e.g. $= 700 - 500 + 130 - 50 + 13 - 5$

$= 200 + 80 + 8 = \underline{288}$

or mentally: $843 - 555 = 843 - 543 - 12 = 300 - 12$

$= \underline{288}$

13 min

Whole class activity

Drawn or stuck on BB or use enlarged copy master or OHP

(Or T could have 2 purses already prepared and ask 2 Ps to come to front of class, open their purse and stick model money on BB. Names on BB would then be the Ps' names.)

Details: e.g.

$$6U + 7U = 13U = 1T + 3U$$

$$3T + 8T + 1T = 12T$$

$$= 1H + 2T$$

$$4H + 3H + 1H = 8H$$

Revision of mental and written procedures

Whole class activity

Drawn or stuck on BB or use enlarged copy master or OHP

(Or use name of a P in class)

Accept any correct reasoning

e.g. adding same amount to reductant and subtrahend, as in main diagram,

or changing 1H to 10T and 1T to 10U:

H	T	U
7 ⁸	¹⁰ 3 ⁴	¹⁰ 3
5	5	5
2	8	8

or

H	T	U
7	13	13
5	5	5
2	8	8

T stresses preferred method.

Bk4*Lesson Plan 5***Activity****3****Problems**

Listen carefully, write the data and do the calculations in your *Ex. Bks.* Show me the answer when I say.

Ps who respond correctly come to BB to explain reasoning. Who agrees? Who did it another way? Who made a mistake? What kind of mistake? etc.

- a) *Gina has £2.35 in her piggy bank and £4.59 in her purse.
How much money does she have altogether?*

BB:

$$£2.35 = 235 \text{ p}$$

$$£4.59 = 459 \text{ p}$$

+

H	T	U
2	3	5
4	5	9
6	9	4

1

Answer: Gina has £6.94 altogether.

- b) *How much money would Gina have if her father were to put another £2.00 in her piggy bank?*
Show me . . . now! (£8.94)
- c) *How much money would Gina have if she took £3.00 from her purse and spent it?*
Show me . . . now! (£3.94)
- d) *How much money would Gina have if she took £4.00 out of her purse and put it in her piggy bank?*
Show me . . . now! (£6.94)

21 min

Notes

Individual work in *Ex. Bks* but class kept together, then whole class review

Give Ps time to think and do calculations, then responses shown in unison.

Drawn on BB or use enlarged copy master or OHP

Reasoning, agreement, self-correction, praising

BB: 694 p = £6.94

BB: £6.94 + £2.00 = £8.94
(or £4.35 + £4.59 = £8.94)

BB: £6.94 – £3.00 = £3.94
(or £2.35 + £1.59 = £3.94)

There would be no change, as she only moved money from one place to the other.

4**Book 4, page 5**

Q.1 Read: *Write your estimation in detail. Calculate the exact sum.*
Deal with one part at a time. Review at BB with whole class.
Ps give details of calculation. Mistakes discussed and corrected.
Solution:

- a) **263 + 526**

$$E: 300 + 500 = 800, \text{ or } 260 + 530 = 790$$

C:

	2	6	3
+	5	2	6
	7	8	9

- b) **354 + 419**

$$E: 400 + 400 = 800, \text{ or } 350 + 420 = 770$$

C:

	3	5	4
+	4	1	9
	7	7	3

1

- c) **475 + 53 + 419**

$$E: 500 + 100 + 400 = 1000, \\ \text{or } 480 + 50 + 420 = 950$$

C:

	4	7	5
		5	3
+	4	1	9
	9	4	7

1 1

28 min

Individual work, monitored, helped

Written on BB or use enlarged copy master or OHP

Reasoning, agreement, self-correction, praising

Details: e.g.

$$c) 5U + 3U + 9U = 17U \\ = 1T + 7U$$

$$7T + 5T + 1T + 1T \\ = 14T = 1H + 4T$$

$$4H + 4H + 1H = 9H$$

Activity

5

Book 4, page 5

Q.2 Read: *How much money do we have left? Estimate, calculate and check the result.*

How much money did we have? (£645) How can we check our calculation? (addition and subtraction) Set a time limit.

Review at BB with whole class. Ps give details of calculations. Class agrees/disagrees. Mistakes discussed and corrected.

Solution:

£645

We had:

100	100	100	20
100	100	100	20

 $\textcircled{1} \textcircled{1} \textcircled{1}$ We bought: 

E:

6	5	0	-	2	3	0	=	4	2	0
---	---	---	---	---	---	---	---	---	---	---

C:

	6	4	5
-	2	3	2
	4	1	3

 Check:

	4	1	3
+	2	3	2
	6	4	5

	6	4	5
-	4	1	3
	2	3	2

 ✓

34 min

Notes

Individual work, monitored, helped

Drawn (or stuck) on BB or use enlarged copy master or OHP

Reasoning, agreement, self-correction, praising

Feedback for T

6

Book 4, page 5

Q.3 Read: *What is the difference between 743 and 558? Estimate, calculate and check the result.*

What kind of operation is it? (subtraction) How can we check it? (addition and subtraction)

Review at BB with whole class. Ps give details of calculations. Who did the same? Who calculated in a different way? Mistakes discussed and corrected.

Solution:

E:

7	0	0	-	6	0	0	=	1	0	0
---	---	---	---	---	---	---	---	---	---	---

or

7	4	0	-	5	6	0	=	1	8	0
---	---	---	---	---	---	---	---	---	---	---

C:

	7	¹⁰ 4	¹⁰ 3
-	5	₁ 5	₁ 8
	1	8	5

 Check:

	1	8	5
+	5	5	8
	7	4	3

	7	¹⁰ 4	¹⁰ 3
-	1	₁ 8	₁ 5
	5	5	8

e.g.

	7	¹⁰ 4	¹⁰ 3
-	5	₁ 5	₁ 8
	1	8	5

Who could write it as an inequality? Who agrees? etc.

38 min

Individual work, monitored, helped

Written on BB or use enlarged copy master or OHP

Reasoning, agreement, self-correction, praising

Details: e.g.

I cannot subtract 8U from 3U, so I add 10U to reductant and 1T to subtrahend:

$10U + 3U = 13U$

$13U - 8U = 5U$

$5T + 1T = 6T$, but I cannot subtract 6T from 4T, so I add 10T to reductant and 1H to subtrahend, etc

BB: $743 > 558$
185

7

Book 4, page 5, Q.4

Read: *Fill in the missing numbers and write above the dotted and dashed arrows what they mean if the solid arrow means + 180 and the double arrow means - 75.*

Ps come to BB to write the operations beside the arrows and to fill in the missing numbers. Ps explaining reasoning in detail. Rest of class check that they are correct.

Solution:

If the arrows pointed in the opposite direction, what would they mean?

45 min

Whole class activity

(or individual work if Ps wish)

Drawn on BB or use enlarged copy master or OHP

Involve several Ps.

At a good pace

Ps write solution in *Pbs* too.

Agree that both dotted and dashed arrows mean the same (+ 105) so only one arrow is necessary.

Agreement, praising

Bk4	<p>R: Calculation</p> <p>C: Operations with numbers up to 1000</p> <p>E: <i>Operations with numbers up to 2000</i></p>	<p><i>Lesson Plan</i></p> <p>6</p>

Lesson Plan 7

Activity

7

Book 4, page 7

Q.4 Read: *Underline the important data. Write a plan, estimate, calculate and check your result. Write the answer in a sentence. Do the work in your exercise book.*

Deal with one part at a time. Set a time limit. Ps read question themselves and solve it in *Ex. Bks.* Make sure that you do not miss a step! Ps sit up with arms folded when finished.

Review at BB with whole class. Ps come to BB to show solutions, explaining reasoning. Who agrees? Who did it a different way? Who made a mistake? What kind of mistake? etc.

Repeat for each of the other questions.

Solution:

- a) *There were 348 boys and 316 girls at a summer camp. How many children were at the camp altogether?*

Plan: $B + G = 348 + 316$ C:

3	4	8
3	1	6
6	6	4

 Check: $\downarrow \uparrow$
 Estimation: $300 + 300 = 600$ +
 or $350 + 320 = 670$

Answer: 664 children were at the camp.

- b) *417 children were taking part in a concert. If 188 of them were girls, how many boys were there?*

Plan: G: 188, B: $417 - 188$ C:

4	1	7
1	8	8
2	2	9

 Estimation: $400 - 200 = 200$
 or $420 - 190 = 230$

Answer: There were 229 boys.

- c) *In an obstacle race, the number of girls taking part was 43 less than the number of boys. If 227 boys took part, how many girls were in the race?*

Plan: B: 227, G: $227 - 43$ C:

2	2	7
	4	3
1	8	4

 Estimation: $230 - 40 = 190$

Answer: There were 184 girls in the race.

- d) *234 girls took part in a treasure hunt. Eve came second. The number of girls taking part was 109 less than the number of boys.*

How many boys took part? How many children took part altogether?

i) Plan: G: 234, B: $234 + 109$ C:

2	3	4
1	0	9
3	4	3

 Estimation: $230 + 110 = 340$

Answer: There were 343 boys.

ii) Plan: G + B: $234 + 343$ C:

2	3	4
3	4	3
5	7	7

 Estimation: $230 + 340 = 570$

Answer: 577 children took part.

Notes

Individual work, monitored, helped, but class kept together on questions

Discussion, reasoning, agreement, self-correction, praising

Keep up a good pace throughout

Feedback for T

or

BB: $348 + 316 = 664 + 16 = \underline{664}$

Check:

2	2	9
1	8	8
4	1	7

 ✓
 e.g. +

or use subtraction

or $G < B$
43

Check:

1	8	4
	4	3
2	2	7

 ✓
 e.g. +

or use subtraction

Agree that Eve coming second is not important.

or $G < B$
109

Check by adding in opposite direction.

or

2	3	4
2	3	4
1	0	9
5	7	7

 +

Lesson Plan 8

Activity

7

Book 4, page 8

Q.4 Read: *Underline the important data. Write a plan, estimate, calculate and check your result. Write the answer in a sentence. Do the work in your exercise book.*

Deal with one part at a time. Set a time limit. Ps read question themselves and solve it in *Ex. Bks.* Make sure that you do not miss a step! Ps sit up with arms folded when finished.

Review with the whole class. Ps come to BB to show solutions, explaining reasoning. Who agrees? Who did it a different way? Who made a mistake? What kind of mistake? etc.

Repeat for each of the other questions.

Solution:

- a) Ann has £716 and Barry has £285 less. How much money does Barry have? How much money do Ann and Barry have altogether?

i) Plan: A: £716, B: £716 – £285 C:

Estimation: e.g. 700 – 300 = 400

Answer: Barry has £431.

7	1	6
2	8	5
4	3	1

ii) Plan: A + B: £716 + £431 C:

Estimation: e.g. 720 + 430 = 1150

Answer: Ann and Barry have £1147 altogether.

7	1	6
4	3	1
1	1	4
7		

- b) Ann has £716 and Sarah has £285 more. How much money does Sarah have? How much money do Ann and Sarah have altogether?

i) Plan: A: £716, S: £716 + £285 C:

Estimation: e.g. 700 + 300 = 1000

Answer: Sarah has £1001.

7	1	6
2	8	5
1	0	0
1	1	1

ii) Plan: A + S: £716 + £1001 C:

Estimation: e.g. 720 + 1000 = 1720

Answer: Ann and Sarah have £1717 altogether.

7	1	6
1	0	0
1	7	1
7		

- c) Ann has £716, which is £285 less than Tom has. How much does Tom have? How much do Ann and Tom have altogether?

i) Plan: A: £716, T: £716 + £285 = £1001 (from b))

Answer: Tom has £1001.

ii) Plan: A + T: £716 + £1001 = £1717 (from b))

Answer: Ann and Tom have £1717 altogether.

- d) Ann has £716, which is £285 more than Suzy has. How much does Suzy have? How much do Ann and Suzy have altogether?

i) Plan: A: £716, S: £716 – £285 = £431 (from a))

Answer: Suzy has £431.

ii) Plan: A + S: £716 + £431 = £1147 (from a))

Answer: Ann and Suzy have £1147 altogether.

Notes

Individual work, monitored, helped. Class kept together for a) and b), then differentiation by time limit.

Only the most able Ps will have time to finish all the questions individually. If no P finishes in the set time, e) can be done at home if Ps wish and reviewed in *Lesson 9*, or done with the whole class.

Discussion, reasoning, agreement, self-correction, praising. Keep up a good pace throughout.

Check with addition or subtraction

or $716 \times 2 - 285 = 1432 - 285$

1	4	3	2
2	8	5	
1	1	4	7

Check with addition in opposite direction

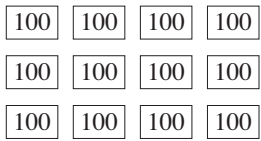

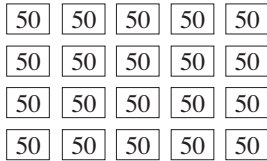

or
 $716 \times 2 + 285$

7	1	6
7	1	6
2	8	5
1	7	1
1		

Extra praise if Ps notice similarity to b)

Extra praise if Ps notice similarity to a)

Bk4		<i>Lesson Plan 8</i>

<p>Activity</p>		<p>Notes</p>
<p>1</p>	<p>Sequences</p> <p>T says the first few terms of a sequence and Ps continue it. What is the rule?</p> <p>a) 0, 7, 14, (21, 28, 35, 42, 49, 56, 63, 70, 77, 84, ...) <i>Rule:</i> + 7 (or multiples of 7 in increasing order)</p> <p>b) 0, -4, 4, -8, 8, -12, 12, (-16, 16, -20, 20, -24, 24, ...) <i>Rule:</i> Negative, then corresponding positive, multiples of 4.</p> <p>c) ..., -24, -16, -8, 0, 8, 16, (24, 32, 40, 48, 56, 64, 72, ...) <i>Rule:</i> + 8 (or whole multiples of 8 in increasing order)</p> <p>d) 11, 22, 33, (44, 55, 66, 77, 88, 99, 110, 121, 132, 143, ...) <i>Rule:</i> + 11 (or natural multiples of 11 in increasing order)</p> <p style="text-align: right;"><i>6 min</i></p>	<p>Whole class activity</p> <p>At speed in order round class</p> <p>Discussion on the rule.</p> <p>Talk about the different kinds of numbers:</p> <p><i>Natural numbers:</i> positive whole numbers (1, 2, 3, ...)</p> <p><i>Negative numbers:</i> $n < 0$</p> <p><i>Positive numbers:</i> $n > 0$</p> <p><i>Fraction:</i> part of 1 unit</p> <p>Praising, encouragement only</p>
<p>2</p>	<p>Multiplication table relay</p> <p>T says a multiplication, e.g. '3×4', P_1 says result ('= 12'), then says a multiplication for P_2, e.g. '7×6'; P_2 says result ('= 42'), then says a multiplication for P_3, e.g. '5×9', P_3 says result ('= 45'), etc.</p> <p>Ps may have multiplication table on desks if they wish. T notes the Ps who use it. Class points out errors if next P misses it.</p> <p style="text-align: right;"><i>11 min</i></p>	<p>Whole class activity</p> <p>At speed in order round class</p> <p>If a P makes a mistake, next P corrects it quickly and says the next multiplication.</p> <p>In good humour!</p>
<p>3</p>	<p>Division table relay</p> <p>T says a division, e.g. '$8 \div 4$', P_1 says result ('= 2'), then says a division for P_2, e.g. '$15 \div 5$'; P_2 says result ('= 3'), then says a division for P_3, e.g. '$28 \div 7$', P_3 says result ('= 4'), etc.</p> <p>If there is a remainder, Ps must solve it but T states that it was not a correct question. Class points out errors if next P misses it.</p> <p style="text-align: right;"><i>17 min</i></p>	<p>Whole class activity</p> <p>At speed in order round class</p> <p>If a P makes a mistake, next P corrects it quickly and says the next division.</p> <p>In good humour!</p>
<p>4</p>	<p>Writing operations</p> <p>Study the diagrams. Who can write additions or multiplications or divisions about them? Ps come to BB or dictate what T should write.</p> <p>BB:</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>a)</p>  </div> <div style="text-align: center;"> <p>b)</p>  </div> </div> <div style="display: flex; justify-content: space-between; margin-top: 10px;"> <div style="width: 45%;"> <p>e.g. $400 + 400 + 400 = 1200$ $300 + 300 + 300 + 300 = 1200$ $600 + 600 = 1200$ etc. $400 \times 3 = 1200$ $300 \times 4 = 1200$ $600 \times 2 = 1200$ etc. $1200 \div 100 = 12$ $1200 \div 200 = 6$ $1200 \div 300 = 4$ etc.</p> </div> <div style="width: 45%;"> <p>e.g. $250 + 250 + 250 + 250 = 1000$ $200 + 200 + 200 + 200 + 200 = 1000$ $500 + 500 = 1000$ etc. $250 \times 4 = 1000$ $200 \times 5 = 1000$ $500 \times 2 = 1000$ etc. $1000 \div 50 = 20$ $1000 \div 100 = 10$ $1000 \div 200 = 5$ etc.</p> </div> </div> <p style="text-align: right;"><i>23 min</i></p>	<p>Whole class activity</p> <p>Model money stuck or drawn on BB or use enlarged copy master or OHP</p> <p>At a good pace</p> <p>Agreement, praising</p> <p>Extra praise for unexpected operations, e.g.</p> <p>$50 \times 10 \times 2 = 1000$</p>

Bk4		<i>Lesson Plan 9</i>
Activity 5	<p>Book 4, page 9</p> <p>Q.1 Read: <i>Calculate the products. Look for relationships.</i> Set a time limit. Encourage mental calculation. Review at BB with whole class. Ps dictate results to T. Class agrees/disagrees. Mistakes discussed and corrected.</p> <p><i>Solution:</i></p> <p>a) $4 \times 5 = \underline{20}$ $40 \times 5 = \underline{200}$ $4 \times 50 = \underline{200}$ $4 \times 500 = \underline{2000}$ $40 \times 50 = \underline{2000}$</p> <p>b) $3 \times 6 = \underline{18}$ $30 \times 6 = \underline{180}$ $3 \times 60 = \underline{180}$ $3 \times 600 = \underline{1800}$ $30 \times 60 = \underline{1800}$</p> <p>c) $4 \times 4 = \underline{16}$ $40 \times 4 = \underline{160}$ $4 \times 40 = \underline{160}$ $4 \times 400 = \underline{1600}$ $40 \times 40 = \underline{1600}$</p> <p>Ps tell class what relationships they noticed. (e.g. if one of the factors increases by 10 times, the product increases by 10 times; if both factors increase by 10 times, the product increases by 10 \times 10 = 100 times, etc.)</p> <p style="text-align: right;">27 min</p>	<p>Notes</p> <p>Individual work, monitored, helped</p> <p>Written on BB or SB or OHT (or T has BB already prepared and uncovers results as they are dealt with)</p> <p>Reasoning, agreement, self-correction, praising</p> <p>Feedback for T</p> <p>Involve several Ps. T repeats Ps' reasoning in a clearer way if necessary. Praise all contributions.</p>
6	<p>Book 4, page 9</p> <p>Q.2 Read: <i>Calculate the quotients. Look for relationships.</i> Set a time limit. Encourage mental calculation. Review at BB with whole class. Ps dictate results to T. Class agrees/disagrees. Mistakes discussed and corrected.</p> <p><i>Solution:</i></p> <p>a) $12 \div 4 = \underline{3}$ $120 \div 40 = \underline{3}$ $120 \div 4 = \underline{30}$ $1200 \div 40 = \underline{30}$ $1200 \div 4 = \underline{300}$ $1200 \div 400 = \underline{3}$</p> <p>b) $20 \div 5 = \underline{4}$ $200 \div 5 = \underline{40}$ $200 \div 5 = \underline{40}$ $2000 \div 50 = \underline{40}$ $2000 \div 5 = \underline{400}$ $2000 \div 500 = \underline{4}$</p> <p>Ps tell class what relationships they noticed. (e.g. if the dividend increases by 10 times, the quotient also increases by 10 times; if the divisor increases by 10 times, the quotient decreases by 1 tenth, etc.)</p> <p style="text-align: right;">32 min</p>	<p>Individual work, monitored, helped</p> <p>Written on BB or SB or OHT (or T has BB already prepared and uncovers results as they are dealt with)</p> <p>Reasoning, agreement, self-correction, praising</p> <p>Feedback for T</p> <p>Involve several Ps. T repeats Ps' reasoning in a clearer way if necessary. Praise all contributions.</p>
7	<p>Book 4, page 9</p> <p>Q.3 Read: <i>Calculate the products. Look for relationships.</i> Set a time limit. Ps can write calculations in Ex. Bks if necessary. Review at BB with whole class. Ps come to BB to write results, explaining reasoning. Class agrees/disagrees. Mistakes discussed and corrected.</p> <p><i>Solution:</i></p> <p>a) $3 \times 100 = \underline{300}$ b) $100 \times 7 = \underline{700}$ c) $200 \times 4 = \underline{800}$ $3 \times 40 = \underline{120}$ $30 \times 7 = \underline{210}$ $80 \times 4 = \underline{320}$ $3 \times 140 = \underline{420}$ $130 \times 7 = \underline{910}$ $280 \times 4 = \underline{1120}$</p> <p>Use this idea to help you do some of the next multiplications.</p>	<p>Individual work, monitored, helped</p> <p>Written on BB or SB or OHT Do parts a), b) and c), then review before doing parts d), e) and f)</p> <p>Reasoning, agreement, self-correction, praising</p> <p>Ps relate what they notice. (Bottom row is the sum of the other two rows)</p>

Bk4		<i>Lesson Plan 9</i>
Activity		Notes
<p>7</p>	<p>(Continued)</p> <p>d) $3 \times 12 = \underline{36}$ e) $6 \times 13 = \underline{78}$ f) $7 \times 14 = \underline{98}$</p> <p>$3 \times 120 = \underline{360}$ $6 \times 130 = \underline{780}$ $7 \times 140 = \underline{980}$</p> <p>$30 \times 12 = \underline{360}$ $60 \times 13 = \underline{780}$ $70 \times 14 = \underline{980}$</p> <p>Ps tell what they notice. (e.g. $60 \times 13 = 6 \times 130$, etc.)</p> <p>37 min</p>	<p>If problems, write details on BB, e.g.</p> <p>$6 \times 13 = 6 \times 10 + 6 \times 3$ $= 60 + 18 = \underline{78}$</p> <p>$7 \times 140 = 7 \times 100 + 7 \times 40$ $= 700 + 280 = \underline{980}$</p> <p>Individual work, monitored, helped</p> <p>Discussion, reasoning, agreement, self-correction, praising</p> <p>Accept any correct method.</p> <p>e.g.</p> <p>a) $30 \times 28 = 3 \times 10 \times 28$ $= 3 \times 280 = 600 + 240$ $= \underline{840}$</p> <p>b) 8×190 $= 8 \times 200 - 8 \times 10$ $= 1600 - 80 = \underline{1520}$</p> <p>Feedback for T</p>
<p>8</p>	<p>Book 4, page 9</p> <p>Q.4 Read: <i>Underline the data. Write a plan. Estimate, calculate and check your result in your exercise book. Write the answer as a sentence.</i></p> <p>Set a time limit. Ps read questions themselves, write plans and solve them in <i>Ex. Bks</i>, then write the answers as sentences in <i>Pbs</i>.</p> <p>Review at BB with whole class. Ps come to BB to show solutions, explaining reasoning. Who agrees? Who did it a different way? Who made a mistake? What kind of mistake? etc.</p> <p><i>Solution:</i></p> <p>a) <i>A box of apples weighs about 28 kg. How much do 30 boxes of apples weigh?</i></p> <p><i>Plan:</i> 1 box: 28 kg, 30 boxes: 30×28 kg</p> <p><i>Estimation:</i> e.g. 30×30 kg = 900 kg</p> <p><i>C:</i> $30 \times 28 = 30 \times 20 + 30 \times 8 = 600 + 240 = \underline{840}$ (kg)</p> <p><i>Answer:</i> 30 boxes of apples weigh 840 kg.</p> <p>b) <i>How much is the cost of 8 kg of pears if 1 kg costs £1.90?</i></p> <p><i>Plan:</i> 1 kg: £1.90 = 190 p, 8 kg: 8×190 p</p> <p><i>Estimation:</i> e.g. 8×200 p = 1600 p</p> <p><i>C:</i> $8 \times 190 = 8 \times 100 + 8 \times 90 = 800 + 720 = \underline{1520}$ (p)</p> <p>1520 p = £15 20 p = £15.20</p> <p><i>Answer:</i> 8 kg of pears cost £15.20.</p> <p>42 min</p>	<p>Individual work in writing plans, but reviewed with whole class.</p> <p>Reasoning, agreement, self-correction in <i>Pbs</i>, praising</p> <p>Elicit that 120 kg is divided into 6 <u>equal</u> parts and that each child will get 1 sixth.</p> <p>It can be thought of as: 'How many 30 kg are in 900 kg? or 'How many times does 30 kg go into 900 kg?'</p>
<p>9</p>	<p>Book 4, page 9, Q.5</p> <p>Read: <i>Write a plan for each question.</i></p> <p>Deal with one part at a time. Set a time limit. Ps read question themselves, write their plan on slates or scrap paper and show on command. P who wrote correct plan explains to those who did not.</p> <p>Let's solve it. Ps come to BB or dictate what T should write.</p> <p><i>Solution:</i></p> <p>a) <i>6 children collected 120 kg of chestnuts. They share them equally. How many kg of chestnuts does each child get?</i></p> <p>Show me . . . now! $120 \text{ kg} \div 6 (= \underline{20 \text{ kg}})$</p> <p><i>Answer:</i> Each child gets 20 kg of chestnuts.</p> <p>b) <i>At the market, they are packing fruit into boxes, 30 kg per box. They have 900 kg of fruit. How many boxes will they need?</i></p> <p>Show me . . . now! $900 \text{ kg} \div 30 \text{ kg} (= \underline{30})$</p> <p><i>Answer:</i> They will need 30 boxes.</p> <p>45 min</p>	

Bk4		<i>Lesson Plan 10</i>
Activity 3	<p>Missing numbers</p> <p>Who can fill in the missing numbers? Ps come to BB to write and explain reasoning with inverse operation. e.g. '7 times 6 = 42, because 42 divided by 6 = 7'.</p> <p>BB:</p> <p>a) $\boxed{0} \times 5 = 0$ b) $10 \times \boxed{7} = 70$ c) $\boxed{7} \times 6 = 42$ d) $7 \times \boxed{8} = 56$</p> <p>e) $\boxed{8} \times 1 = 8$ f) $\boxed{1} \times 9 = 9$ g) $\boxed{7} \times 7 = 49$ h) $9 \times \boxed{8} = 72$</p> <p>i) $18 \div \boxed{3} = 6$ j) $\boxed{35} \div 5 = 7$ k) $25 \div \boxed{5} = 5$ l) $\boxed{0} \div 8 = 0$</p> <p>m) $\boxed{54} \div 9 = 6$ n) $48 \div \boxed{8} = 6$ o) $\boxed{27} \div 9 = 3$ p) $\boxed{\cancel{0}} \div 0 \neq 5$</p> <p style="text-align: right;">20 min</p>	<p>Notes</p> <p>Whole class activity Written on BB or use enlarged copy master or OHP At a good pace Reasoning, agreement, praising</p> <p>Agree that it is impossible to divide <u>any</u> number by zero.</p>
4	<p>Division practice</p> <p>Let's do these divisions. Ps come to BB in pairs, one P to write quotients and remainders and the other to check with multiplication and addition. Class points out errors.</p> <p>BB:</p> <p>a) $17 \div 4 = (4, r 1)$ $[4 \times 4 + 1 = 17] \checkmark$</p> <p>b) $23 \div 2 = (11, r 1)$ $[2 \times 11 + 1 = 23] \checkmark$</p> <p>c) $23 \div 5 = (4, r 3)$ $[4 \times 5 + 3 = 23] \checkmark$</p> <p>d) $27 \div 7 = (3, r 6)$ $[3 \times 7 + 6 = 27] \checkmark$</p> <p>e) $40 \div 6 = (6, r 4)$ $[6 \times 6 + 4 = 40] \checkmark$</p> <p>f) $28 \div 2 = (14) \text{ (no remainder)}$ $[14 \times 2 = 28] \checkmark$</p> <p>g) $85 \div 5 = (17) \text{ (no remainder)}$ $[17 \times 5 = 85] \checkmark$</p> <p>h) $75 \div 9 = (8, r 3)$ $[8 \times 9 + 3 = 75] \checkmark$</p> <p style="text-align: right;">25 min</p>	<p>Whole class activity (or individual work in <i>Ex. Bks</i> if Ps wish) Written on BB or SB or OHT At a good pace Reasoning, agreement, checking, praising Details written on BB if problems, e.g. $85 \div 5 = 50 \div 5 + 35 \div 5$ $= 10 + 7 = \underline{17}$</p> <p>Feedback for T</p>
5	<p>Book 4, page 10</p> <p>Q.2 Read: <i>Do the calculations in the correct order.</i></p> <p>Set a time limit. Ps write result above the first calculation to be done or keep it in mind before writing final result.</p> <p>Review at BB with whole class. Ps come to BB or dictate to T. Mistakes discussed and corrected.</p> <p>What did you notice? e.g. $(60 + 20) \times 2 = 60 \times 2 + 20 \times 2$</p> <p>Solution:</p> <p>a) $60 + 20 \overset{40}{\times} 2 = \underline{100}$ b) $15 + 30 \overset{10}{\div} 3 = \underline{25}$</p> <p>$\overset{80}{(60 + 20)} \times 2 = \underline{160}^*$ $\overset{45}{(15 + 30)} \div 3 = \underline{15}^*$</p> <p>$\overset{120}{60 \times 2} + 20 = \underline{140}$ $\overset{5}{15 \div 3} + 30 = \underline{35}$</p> <p>$\overset{120}{60 \times 2} + \overset{40}{20 \times 2} = \underline{160}^*$ $\overset{5}{15 \div 3} + 30 \overset{10}{\div} 3 = \underline{15}^*$</p> <p style="text-align: right;">30 min</p>	<p>Individual work, monitored, helped Written on BB or SB or OHT Reasoning, agreement, self-correction, praising.</p> <p>Extra praise if Ps notice and explain equal results without help from T.</p>

Bk4*Lesson Plan 10***Activity****6****Book 4, page 10**Q.3 Read: *Complete the tables. Write the rules in different ways.*

Deal with one part at a time. Elicit one form of the rule in words with the whole class first (unless Ps prefer to work it out for themselves). Then Ps complete the table and write the rule in different ways in *Pbs* under a time limit. Ps can do any necessary calculations in *Ex. Bks* or on scrap paper.

Review at BB with whole class. Ps come to BB to fill in columns, explaining reasoning. Class agrees/disagrees. Mistakes discussed and corrected.

A, come and write the rule. Who agrees? Who can write it another way? Ps check the different forms with values from table.

Solution:

a)

a	4	150	632	111	604	354	704	635	246	362
b	354	500	982	461	954	704	1054	985	596	712

$a = b - 350, \quad b = a + 350 \quad \text{Ext: } b - a = 350, (a - b = -350)$

b)

x	20	15	200	111	50	180	150	99	120	100
y	140	105	1400	777	350	1260	1050	693	840	700

$x = y \div 7, \quad y = x \times 7, \quad \text{Ext: } y \div x = 7, (x \div y = \frac{1}{7})$

c)

u	888	346	1	551	581	500	968	273	340	1001
v	112	654	999	449	419	500	32	727	660	-1

$u = 1000 - v, \quad v = 1000 - u, \quad (u + v = 1000)$

d)

m	2	40	10	800	200	5	8	50	25	800
n	400	20	80	1	4	160	100	16	32	1

$m = 800 \div n, \quad n = 800 \div m, \quad (m \times n = 800)$

If any Ps try long division by 2-digit numbers, T helps and asks them to show it on BB. e.g.

			3	2
2	5	8	0	0
	-	7	5	
			5	0
		-	5	0
				0

45 min

Notes

Individual work, monitored, (helped)

Tables drawn on BB or use enlarged copy master or OHP

Differentiation by time limit

Reasoning, agreement, self-correcting, praising

At a good pace

If problems, write details of calculations on BB. Accept any correct reasoning, e.g.

BB:

	7	10	1	2
-	3	5	0	
	3	6	2	

$$180 \times 7 = 700 + 560 = \underline{1260}$$

$$15 \times 7 = 105, \text{ so}$$

$$150 \times 7 = \underline{1050}$$

$$99 \times 7 = 100 \times 7 - 1 \times 7 = 700 - 7 = \underline{693}$$

$$10 \times 80 = 800, \text{ so}$$

$$\underline{5} \times 160 = 800$$

$$5 \times 160 = 800, \text{ so}$$

$$\underline{50} \times 16 = 800$$

$$50 \times 16 = 800, \text{ so}$$

$$25 \times \underline{32} = 800, \text{ etc.}$$

Extra praise if Ps notice these easy ways to calculate.

Bk4	<p>R: Mental calculation</p> <p>C: Multiplication and division tables. Operations up to 1000</p> <p>E: <i>Operations up to 2000</i></p>	<p><i>Lesson Plan</i></p> <p>11</p>
<p>Activity</p> <p>1</p>	<p>Multiplication table practice</p> <p>T says a multiplication and:</p> <p>a) chooses Ps at random to answer,</p> <p>b) Ps answer in order round class,</p> <p>c) T says a multiplication, P answers it and says a multiplication for next P to answer, etc. (relay round class)</p> <p style="text-align: right;"><i>5 min</i></p>	<p>Notes</p> <p>Whole class activity</p> <p>At speed</p> <p>T notes Ps who need to use their own \times tables or to look at the \times table on classroom wall.</p> <p>Praising, encouragement only</p>
<p>2</p>	<p>Chain calculations</p> <p>Listen to my instructions. Do the calculations in your head and write the results of each step one below the other in your <i>Ex. Bks.</i> Nod your head when you have done each step. Show me the final result when I say. e.g.</p> <p><i>Start with 800. Find its quarter. . . . Add 10. . . . Multiply by 3. . . . Add 70. . . . Divide by 7.</i></p> <p>Show me your answer . . . now! (100)</p> <p>Let's write the operations on the BB. Ps come to BB or dictate to T.</p> <p>BB: $800 \div 4 = 200$; $200 + 10 = 210$; $210 \times 3 = 630$; $630 + 70 = 700$; $700 \div 7 = \underline{100}$</p> <p>How could we write it as one equation? Ps suggest how to do it. Class agrees/disagrees. T helps with the brackets if necessary. Let's check it.</p> <p>BB: $[(800 \div 4 + 10) \times 3 + 70] \div 7 = \underline{100}$</p> <p>Repeat for, e.g.</p> <p><i>Start with 20. Multiply by 8. (160) Add 20. (180) Divide by 60. (3) Add 60. (63) Divide by 9. (7) Multiply by 80. (560)</i></p> <p>Show me . . . now! (560)</p> <p>Ps suggest how to write it as one equation (with T's help if necessary).</p> <p>BB: $[(20 \times 8 + 20) \div 60 + 60] \div 9 \times 80 = \underline{560}$</p> <p style="text-align: right;"><i>10 min</i></p>	<p>Whole class activity (but individual mental calculation)</p> <p>Wait until majority are ready before continuing to next step.</p> <p>Responses written on scrap paper or slates and shown in unison.</p> <p>Agreement, praising</p> <p>Discussion, agreement, checking, praising</p> <p>Remind Ps to use curved brackets for 1st set needed, then square brackets for 2nd set needed.</p> <p>Check that operations will be done in the correct order.</p> <p>You have been very clever!</p>
<p>3</p>	<p>Boom!</p> <p>Everyone stand up! We will count in multiples of 10 but you must say 'Boom' instead of the multiples of:</p> <p>a) <u>50</u>: '0, 10, 20, 30, 40, 'Boom', 60, 70, 80, 90, 'Boom', 110, . . .'</p> <p>b) <u>40 or 70</u>: '0, 10, 20, 30, Boom, 50, 60, Boom, Boom, 90, . . .'</p> <p>etc. Continue until fewer than 5 Ps remain standing. Let's give them a round of applause!</p> <p style="text-align: right;"><i>15 min</i></p>	<p>Whole class activity</p> <p>At speed, in order round class</p> <p>Ps knock on desks when they hear a mistake and P who made it must sit down.</p> <p>In good humour!</p> <p>Ps can choose the 'Boom' multiples too.</p>
<p>4</p>	<p>Secret numbers</p> <p>I am thinking of a number. I will give you a clue and you must work out what it is. Show me the number when I say.</p> <p>a) <i>It is 300 more than half of 420.</i></p> <p>Show me . . . now! (510) P who answered correctly explains to those who did not. Let's check each step to make sure it is correct.</p> <p>b) <i>If I multiply it by 5, then add 400, then divide by 11, the result is 50.</i></p> <p>Show me . . . now! (30) P explains. Class checks each step.</p> <p>If time, Ps can think of secret numbers and give clues too!</p> <p style="text-align: right;"><i>20 min</i></p>	<p>Individual work in <i>Ex. Bks.</i></p> <p>Responses shown on scrap paper or slates in unison.</p> <p>BB: e.g.</p> <p>a) $n = 420 \div 2 + 300$ $= 210 + 300 = \underline{510}$</p> <p>b) $n = (50 \times 11 - 400) \div 5$ $= (550 - 400) \div 5$ $= 150 \div 5 = \underline{30}$</p>

Bk4		<i>Lesson Plan 11</i>
Activity 5	<p>Inequalities</p> <p>Which <u>natural</u> numbers will make the inequality true? Elicit that natural numbers are positive whole numbers.</p> <p>a) Class reads inequality aloud first.</p> <p>'Five hundred plus the square is less than six hundred and eighteen minus one hundred and nine'</p> <p>What should we do first? (Work out the RHS.)</p> <p>Ps come to BB to do calculation, explaining reasoning. Class agrees/disagrees. Ps check with least and greatest possible values.</p> <p>BB: $500 + \square < 618 - 109$</p> <p>$\square$: 1, 2, 3, 4, 5, 6, 7 or 8</p> <p>b) Class reads the inequality aloud first. What should we do first? (Work out the LHS and RHS.) Ps come to BB to do calculations, explaining reasoning. Class agrees/disagrees. Ps check with least and greatest possible values.</p> <p>BB: $3 \times 27 + 150 < 200 + \bigcirc < 400 - 164$</p> <p>$231 < 200 + \bigcirc < 236$</p> <p>$\bigcirc$: 32, 33, 34, 35</p> <p style="text-align: right;">25 min</p>	<p>Notes</p> <p>Whole class activity</p> <p>Inequalities written on BB or SB or use enlarged copy master or OHP</p> <p>In unison</p> <p>Discussion, reasoning, agreement, checking, praising</p> <p><i>Check:</i></p> <p>BB: $500 + 1 < 509$ ✓</p> <p>$500 + 8 < 509$ ✓</p> <p>In unison</p> <p>Discussion, reasoning, agreement, checking, praising</p> <p><i>Check:</i></p> <p>BB:</p> <p>$231 < 200 + 32 < 236$ ✓</p> <p>$231 < 200 + 35 < 236$ ✓</p>
6	<p>Book 4, page 11</p> <p>Q.1 Read: <i>Do the calculations in the correct order.</i></p> <p>Deal with one at a time. Ps write results of 1st calculations above the operation signs.</p> <p>Review at BB with whole class. Ps come to BB or dictate to T. Class agrees/disagrees. Mistakes discussed and corrected.</p> <p><i>Solution:</i></p> <p>a) $2 \times 400 - 258 = \underline{542}$ b) $3 \times 140 - 130 = \underline{290}$</p> <p>c) $7 \times 80 + 258 = \underline{818}$ d) $220 + 4 \times 90 = \underline{580}$</p> <p>e) $912 - 5 \times 50 = \underline{662}$ f) $595 - 6 \times 70 = \underline{175}$</p> <p style="text-align: right;">30 min</p>	<p>Individual work, monitored, helped</p> <p>Written on BB or SB or use enlarged copy master or OHP</p> <p>Calculations can be done in <i>Ex. Bk4

Lesson Plan 11

Activity

8

Book 4, page 11

Q.3 Read: *Underline the data. Make a plan. Estimate, calculate and write the answer.*

Deal with one part at a time. Set a time limit. Ps read question themselves and solve it in Pbs. Remember to check your result if you have time. Ps sit up with arms folded when finished.

Review with the whole class. Ps come to BB to show solutions, explaining reasoning. Who agrees? Who did it a different way? Who made a mistake? What kind of mistake? etc.

Repeat for each of the other questions.

Solution:

- a) George has 324 stamps and Rita has 3 times as many as George. How many stamps does Rita have?

Plan: G: 324, R: 324×3 E: $300 \times 3 = 900$

C: e.g. $324 \times 3 = 900 + 60 + 12 = 972$

Answer: Rita has 972 stamps.

- b) Helen has 324 postcards, which is 3 times as many as Mary has. How many postcards does Mary have?

Plan: H: 324, M: $324 \div 3$ E: $300 \div 3 = 100$

C: e.g. $324 \div 3 = 300 \div 3 + 24 \div 3 = 100 + 8 = 108$

Answer: Mary has 108 postcards.

- c) Steve has 324 marbles which is a quarter of the number of marbles that Jack has. How many marbles does Jack have?

Plan: S: 324, J: 324×4 E: $300 \times 4 = 1200$

C: e.g. $324 \times 4 = 1200 + 80 + 16 = 1296$

Answer: Jack has 1296 marbles.

- d) Johnny has 324 football cards and Mike has 1 quarter of that number. How many football cards does Mike have?

How many football cards do the two boys have altogether?

- i) Plan: J: 324, M: $324 \div 4$ E: $320 \div 4 = 80$

C: e.g. $324 \div 4 = 320 \div 4 + 4 \div 4 = 80 + 1 = 81$

Answer: Mike has 81 football cards.

- ii) Plan: J + M: $324 + 81$ E: $320 + 80 = 400$

C: e.g. $324 + 81 = 320 + 80 + 4 + 1 = 400 + 5 = 405$

Answer: They have 405 football cards altogether.

- e) Charlie has £324. How many matchbox cars can he buy with this money if each car costs £9? How much money would he have left?

Plan: C: £324, 1 car: £9 No. of cars: $£324 \div £9$

C: e.g. $324 \div 9 = 270 \div 9 + 54 \div 9 = 30 + 6 = 36$

Answer: Charlie can buy 36 cars and he would have no money left.

Who had all 5 problems correct? Let's give them '3 cheers'!

45 min

Notes

Individual work, monitored, helped.

Discussion, reasoning, agreement, self-correction, praising

Keep up a good pace throughout.

Accept any form of correct calculation, e.g.

3	2	4	\times	3
9	7	2		

1

	1	0	8
3	3	2	4
-	3		
		2	4
		-	2
			4
			0

	3	2	4	\times	4
1	2	9	6

9	3	6		
	1			

Details of reasoning: e.g.

$$\begin{aligned}
 314 \times 4: \quad & 4 \times 4U = 16U = 1T + 6U \\
 & 4 \times 1T = 4T; \quad 4T + 1T = 5T \\
 & 4 \times 3H = 12H = 1Th + 2H
 \end{aligned}$$

20 min

Notes

Whole class activity

Written on BB or use enlarged copy master or OHP

Encourage Ps to give reasoning with details of place-value (as example below)
Agreement, praising

Use the expressions to show:

- place value (e.g. 5T)
- digit value (e.g. 5)
- real value (e.g. 50)

If any P still does not understand, ask them to do another example on BB (with help of rest of class)

4

Book 4, page 12

Q.1 Read: *Estimate the product first, then do the multiplication.*

Set a time limit. Ask Ps to estimate to the nearest 10.

Review at BB with whole class. Ps come to BB or dictate to T, explaining reasoning in detail. Class agrees/disagrees. Mistakes discussed and corrected. If problems, show multiplication in long form on BB.

Solution:

a)

E:	4	2	0
----	---	---	---

E:	4	5	0
----	---	---	---

E:	7	5	0
----	---	---	---

E:	1	0	5	0
----	---	---	---	---

	7	3	×	6
4	3	8		
	1			

	1	4	6	×	3
4	3	8			
	1	1			

	2	4	6	×	3

	2	4			

	2	4	7	×	3
7	4	1			
	1	2			

26 min

Individual work, monitored, helped

Written on BB or use enlarged copy master or OHP

Reasoning, agreement, self-correction, praising

Feedback for T

Ps point out relationships. e.g. doubling one term and halving the other term gives the same result, etc.

Bk4

Lesson Plan 12

Activity

5

Division

Let's do the division in different ways. Ps dictate what T should write (horizontal division), or come to BB (vertical division), explaining reasoning. Who agrees? Who can do it another way? etc.

T demonstrates shorter way if no P has done so, with place-value details.

BB:

a) $476 \div 2 = 400 \div 2 + 70 \div 2 + 6 \div 2 = 200 + 35 + 3 = \underline{238}$

	2	3	8
2	4	7	6
-	4		
	0	7	
	-	6	
		1	6
	-	1	6
			0

	2	3	8
2	4	7	6

Shorter way

Details: $4H \div 2 = \underline{2H}$
 $7T \div 2 = \underline{3T}$, and 1T remains
 $1T + 6U = 16U$
 $16U \div 2 = \underline{8U}$

b) $812 \div 7 = 700 \div 7 + 70 \div 7 + 42 \div 7 = 100 + 10 + 6 = \underline{116}$

	1	1	6
7	8	1	2
-	7		
	1	1	
	-	7	
		4	2
	-	4	2
			0

	1	1	6
7	8	1	2

Shorter way

Details: $8H \div 7 = \underline{1H}$, and 1H remains
 $1H + 1T = 11T$
 $11T \div 7 = \underline{1T}$, and 4T remains
 $4T + 2U = 42U$
 $42U \div 7 = \underline{6U}$

c) $714 \div 6 = 600 \div 6 + 60 \div 6 + 54 \div 6 = 100 + 10 + 9 = \underline{119}$

	1	1	9
6	7	1	4
-	6		
	1	1	
	-	6	
		5	4
	-	5	4
			0

	1	1	9
6	7	1	4

Shorter way

Details: $7H \div 6 = \underline{1H}$, and 1H remains
 $1H + 1T = 11T$
 $11T \div 6 = \underline{1T}$, and 5T remains
 $5T + 4U = 54U$
 $54U \div 6 = \underline{9U}$

d) $735 \div 5 = 500 \div 5 + 200 \div 5 + 35 \div 5 = 100 + 40 + 7 = \underline{147}$

	1	4	7
5	7	3	5
-	5		
	2	3	
	-	2	0
		3	5
	-	3	5
			0

	1	4	7
5	7	3	5

Shorter way

Details: $7H \div 5 = \underline{1H}$, and 2H remains
 $2H + 3T = 23T$
 $23T \div 5 = \underline{4T}$, and 3T remains
 $3T + 5U = 35U$
 $35U \div 5 = \underline{7U}$

Notes

Whole class activity

Divisions written on BB or SB or OHT

Use squared board if possible or grids drawn on BB or use enlarged copy master for long and short vertical division.

Allow Ps to show the methods of calculation, with rest of class pointing out errors.

T could show how to do the first short division in detail, then Ps could do the others (with T's help).

At a good pace

Reasoning, agreement

Praising, encouragement only

35 min

Bk4

Lesson Plan 12

Activity

6

Book 4, page 12

Q.2 Read: *Estimate the quotient first, then do the division.*
Check with multiplication.

Ps estimate by rounding to nearest 100. Ps can use long or short division. Deal with one part at a time if Ps are unsure.

Review at BB with whole class. Ps come to BB to do calculations, explaining reasoning. Class agrees/disagrees. Mistakes discussed and corrected.

Solution:

a) E: 200

H	T	U
2	1	2
4	8	4
-	8	
	0	4
-	4	
		0
	0	8
	-	8
		0

Check:

H	T	U		
2	1	2	×	4
8	4	8		

b) E: 140 (700 ÷ 5)

H	T	U
1	3	4
5	6	7
-	5	
	1	7
-	1	5
		2
	2	0
-	2	0
		0

Check:

H	T	U		
1	3	4	×	5
6	7	0		

c) E: e.g. 125 (1000 ÷ 8)

H	T	U
1	2	2
8	9	7
-	8	
	1	7
-	1	6
		1
	1	6
-	1	6
		0

Check:

H	T	U		
1	2	2	×	8
9	7	6		

40 min

Notes

Individual work, monitored, helped

Written on BB or use enlarged copy master or OHP

Ps give details of how they estimated and also say what they are doing when showing calculations.

Extra praise if Ps used short division correctly and can explain reasoning!

e.g.

	1	3	4
5	6	7	0

1 2

6H ÷ 5 = 1H, and 1H remains

1H + 7T = 17T

17T ÷ 5 = 3T, and 2T remain

2T + 0U = 20U

20U ÷ 5 = 4U

Feedback for T

7

Book 4, page 12

Q.3 Read: *Underline the data. Make a plan. Estimate, calculate and write the answer.*

Deal with one part at a time. Ps read problem themselves and write just a plan for each first.

Review plans with the whole class. A, what plan did you write? Who wrote the same? Who wrote a different one? etc. Class agrees on which plans are correct. Mistakes corrected.

Then Ps estimate, calculate and write the answers. Ps can use *Ex. Bks* for calculations and write only plans and answers in *Pbs*.

Review with whole class. Ps come to BB to do calculations, explaining reasoning. Class agrees/disagrees. Mistakes discussed and corrected.

Solution:

a) *Lisa had collected 516 shells. She gave 1 quarter of the shells to Alice and 1 third of them to Julie. How many shells did Lisa have left?*

Plan: L: 516, A: 516 ÷ 4, J: 516 ÷ 3

L had left: 516 - 516 ÷ 4 - 516 ÷ 3
 or 516 - (516 ÷ 4 + 516 ÷ 3)

C: e.g. 516 ÷ 4 = 400 ÷ 4 + 80 ÷ 4 + 36 ÷ 4
 = 100 + 20 + 9 = 129 A: 129

516 ÷ 3 = 300 ÷ 3 + 210 ÷ 3 + 6 ÷ 3
 = 100 + 70 + 2 = 172 J: 172

A + J: 129 + 172 = 229 + 72 = 299 + 2 = 301

L - (A + J): 516 - 301 = 215

Answer: Lisa had 215 shells left.

Individual work in writing plans first, monitored, helped

Discuss correct plans with whole class before calculating.

Individual work in calculating (or done with whole class if time is short)

Reasoning, agreement, self-correction, praising

E: 500 - 100 - 200 = 200

Or BB:

1	2	9
4	5	1

1 3

1	7	2
3	5	1

2

1	2	9
+	1	7
	3	0

1 1

5	1	6
-	3	0
	2	1

Check: 129 + 172 + 215
 = 516

Notes

Individual work, monitored, helped

(or part a) done with whole class first if Ps are unsure)

Written on BB or use enlarged copy master or OHP

Reasoning, agreement, self-correcting, praising

Accept any correct method of calculation (horizontal division in *Ex. Bks*, long division or short division)

Ps circle remainders and/or write beside answers.

Feedback for T

7

Book 4, page 13

Q.2 Read: Is 642 divisible by these numbers? Do the calculations, then write YES or NO.

How can we tell whether a number is divisible by another number? (After doing the division there will be no remainder.)

Set a time limit. Ps do long or short division (or horizontal division in *Ex. Bks* if they prefer) and write YES or NO on dotted lines in *Pbs*.

Review at BB with whole class. T points to a number. Is 642 divisible by this number? Class shouts YES or NO in unison.

Ps who respond incorrectly come to BB to do calculation (with help of class). Mistakes corrected.

Agree that 642 is divisible by 3 and 6, but not by 4 and 9.
Elicit that 3 and 6 are factors of 642 (642 is a multiple of 3 and 6).

Solution:

<p>a) 3 YES</p> <table border="1" style="border-collapse: collapse; text-align: center;"> <tr><td></td><td>2</td><td>1</td><td>4</td></tr> <tr><td>3</td><td>6</td><td>4</td><td>2</td></tr> <tr><td>-</td><td>6</td><td></td><td></td></tr> <tr><td></td><td>0</td><td>4</td><td></td></tr> <tr><td>-</td><td>3</td><td></td><td></td></tr> <tr><td></td><td></td><td>1</td><td>2</td></tr> <tr><td>-</td><td>1</td><td>2</td><td></td></tr> <tr><td></td><td></td><td></td><td>0</td></tr> </table>		2	1	4	3	6	4	2	-	6				0	4		-	3					1	2	-	1	2					0	<p>b) 4 NO</p> <table border="1" style="border-collapse: collapse; text-align: center;"> <tr><td></td><td>1</td><td>6</td><td>0</td></tr> <tr><td>4</td><td>6</td><td>4</td><td>2</td></tr> <tr><td>-</td><td>4</td><td></td><td></td></tr> <tr><td></td><td>2</td><td>4</td><td></td></tr> <tr><td>-</td><td>2</td><td>4</td><td></td></tr> <tr><td></td><td></td><td>0</td><td>2</td></tr> </table>		1	6	0	4	6	4	2	-	4				2	4		-	2	4				0	2	<p>c) 6 YES</p> <table border="1" style="border-collapse: collapse; text-align: center;"> <tr><td></td><td>1</td><td>0</td><td>7</td></tr> <tr><td>6</td><td>6</td><td>4</td><td>2</td></tr> <tr><td>-</td><td>6</td><td></td><td></td></tr> <tr><td></td><td>0</td><td>4</td><td>2</td></tr> <tr><td>-</td><td>4</td><td>2</td><td></td></tr> <tr><td></td><td></td><td></td><td>0</td></tr> </table>		1	0	7	6	6	4	2	-	6				0	4	2	-	4	2					0	<p>d) 9 NO</p> <table border="1" style="border-collapse: collapse; text-align: center;"> <tr><td></td><td></td><td>7</td><td>1</td></tr> <tr><td>9</td><td>6</td><td>4</td><td>2</td></tr> <tr><td>-</td><td>6</td><td>3</td><td></td></tr> <tr><td></td><td></td><td>1</td><td>2</td></tr> <tr><td>-</td><td></td><td></td><td>9</td></tr> <tr><td></td><td></td><td></td><td>3</td></tr> </table>			7	1	9	6	4	2	-	6	3				1	2	-			9				3

36 min

Individual work, monitored, helped

Differentiation by time limit

Written on BB or use enlarged copy master or OHP

Reasoning, agreement, self-correcting, praising

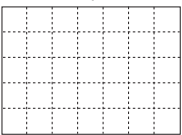

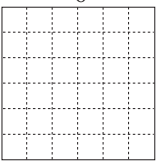

T shows another way to reason, e.g.

BB: $642 = 600 + 30 + 12$
(all divisible by 3 and 6)

or $642 = 630 + 9 + 3$
(630 and 9 are divisible by 9 but 3 is not)

or $642 = 400 + 240 + 2$
(400 and 240 are divisible by 4 but 2 is not)

<p>Activity</p> <p>1</p>	<p>Forming rectangles</p> <p>Let's draw different rectangles which have a perimeter of 24 units. Elicit that 1 unit is the side of a grid square.</p> <p>Ps come to BB to draw rectangles on the grid, confirming perimeter length by writing an operation. What is its area? e.g.</p> <p>BB:</p> <div style="display: flex; justify-content: space-between;"> <div style="width: 45%;"> <p>1 </p> <p>2 </p> <p>3 </p> <p>4 </p> <p>5 </p> <p>6  square</p> </div> <div style="width: 45%;"> <p>$P = 2 \times 1 + 2 \times 11 = \underline{24}$ (units) $A = \underline{11}$ (unit squares)</p> <p>$P = 2 \times (2 + 10) = 2 \times 12 = \underline{24}$ (units) $A = 2 \times 10 = \underline{20}$ (unit squares)</p> <p>$P = 2 \times (3 + 9) = 2 \times 12 = \underline{24}$ (units) $A = 3 \times 9 = \underline{27}$ (unit squares)</p> <p>$P = 2 \times (4 + 8) = 2 \times 12 = \underline{24}$ (units) $A = 4 \times 8 = \underline{32}$ (unit squares)</p> <p>$P = 2 \times (5 + 7) = 2 \times 12 = \underline{24}$ (units) $A = 5 \times 7 = \underline{35}$ (unit squares)</p> <p>$P = 2 \times (6 + 6) = 2 \times 12 = \underline{24}$ (units) $A = 6 \times 6 = \underline{36}$ (unit squares)</p> </div> </div> <p>Extra praise for unexpected sides e.g.</p> <div style="display: flex; justify-content: space-between;"> <div style="width: 45%;"> <p>$\frac{1}{2}$ </p> </div> <div style="width: 45%;"> <p>$P = 2 \times (11 \frac{1}{2} + \frac{1}{2}) = 2 \times 12 = \underline{24}$ (units) $A = 5 + 1 \text{ half} + 1 \text{ quarter} = 5 + 3 \text{ quarters} = \underline{5 \frac{3}{4}}$ (unit squares)</p> </div> </div>	<p>Notes</p> <p>Whole class activity</p> <p>Grid drawn on BB or use squared BB or enlarged copy master or OHP</p> <p>Ps could have copies on desks too if they wish.</p> <p>At a good pace</p> <p>Reasoning, agreement, praising</p> <p>T helps with writing operations where necessary.</p> <p>[Revision of perimeter and area of a rectangle (square).]</p> <p>What do you notice?</p> <p>Agree that the 24-unit perimeter which gives the largest area is the most regular shape, i.e. a square.</p> <p>If a P suggests this case, T helps with calculating the area.</p>
<p>2</p>	<p>Book 4, page 14</p> <p>Q.1 Read: <i>The area of a rectangle is 360 unit squares.</i> <i>How long is the other side if one side is:</i> a) 5 units, b) 12 units, c) 8 units?</p> <p>T or P explains task with aid of a diagram. Elicit that the operation to be done is division. Ps can do calculations in Ex. Bks if they cannot do them mentally.</p> <p>Review at BB with whole class. Ps come to BB to show their calculations. Who agrees? Who did it another way? etc.</p> <p><i>Solution:</i> e.g.</p> <p>a) $360 \div 5 = 350 \div 5 + 10 \div 5 = 70 + 2 = \underline{72}$ (units)</p> <p>b) $360 \div 12 = 360 \div 6 \div 2 = 60 \div 2 = \underline{30}$ (units)</p> <p>c) $360 \div 8 = 320 \div 8 + 40 \div 8 = 40 + 5 = \underline{45}$ (units)</p>	<p>Individual work, monitored, helped but whole class introduction</p> <p>BB:</p> <div style="display: flex; align-items: center;"> <div style="margin-right: 10px;"> $A = b \times c$ $= \underline{360}$ unit squares $b = A \div c, c = A \div b$ </div> <div style="border: 1px solid black; padding: 5px; margin-left: 10px;"> $A = 360$ </div> </div> <p>Reasoning, agreement, self-correcting, praising</p> <p>(or vertical long or short division)</p>

Bk4*Lesson Plan 14***Activity**

2

(Continued)

Read: *Calculate the perimeter of each rectangle.*

Review at BB with whole class. Ps dictate operations to T, explaining reasoning. Class agrees/disagrees. Mistakes discussed and corrected.

Solution:

a) $P = 2 \times (5 + 72) = 2 \times 77 = \underline{154}$ (units)

b) $P = 2 \times (12 + 30) = 2 \times 42 = \underline{84}$ (units)

c) $P = 2 \times (8 + 45) = 2 \times 53 = \underline{106}$ (units)

Extension

How could we show the sides of all the rectangles which have an area of 360 unit squares? T asks several Ps what they think. Agree that best way would be to show them in a table.

T (or P) draws table on BB or OHT. Let's do it logically! Which values should be put in the first column? (e.g. 1 and 360)

Ps dictate to T or come to BB, explaining reasoning. Encourage Ps to do the calculations mentally. Class points out errors.

What is the rule for the table? Who can write it a different way? etc.

BB:

<i>b</i>	1	2	3	4	5	6	8	9	10	12	15	18
<i>c</i>	360	180	120	90	72	60	45	40	36	30	24	20

Rule: $b = 360 \div c, \quad c = 360 \div b, \quad (b \times c = 360)$

What could we say about all the numbers in the table? (They are all factors of 360.)

18 min

Notes

Individual work, monitored, helped

Reasoning, agreement, self-correction, praising.

Whole class activity

(or individual or paired work within a time limit if Ps prefer, reviewed at BB with whole class)

At a good pace

Reasoning, agreement, praising

Then table carries on with values reversed.

Discussion on the rule.

Agreement, praising

3

Factorising

Let's break down 360 into its lowest factors T shows the first 1 or 2 steps on BB and Ps continue the diagram. Class agrees/disagrees.

BB: e.g.

What kind of numbers have we circled? (Prime numbers). What is a prime number? (A number which has only 2 factors: 1 and itself.) We can say that we have broken down 360 into its prime factors.

Does it matter how we do factorisation? (No, as we will always end up with the same prime factors.)

23 min

Whole class activity

Ps decide how to break down the factors. Try it in 2 or 3 different ways

If a factor cannot be broken down further, Ps draw a circle around it.

At a good pace

Agreement, praising

Check by multiplying the circled factors in increasing order.

BB: Prime number

factors: 1 and itself

Bk4

Lesson Plan 14

Activity

4

Book 4, page 14Q.2 Read: *Practise division.*

Check your divisions with multiplication in your head (or in your *Ex. Bks*) if you have time. T sets a time limit.

Review at BB with whole class. Ps come to BB or dictate to T, explaining reasoning. Class agrees/disagrees. Mistakes discussed and corrected. Do checks on BB with whole class. Ps dictate what T should write.

Solution:

a)	$\begin{array}{r} 116 \\ 7 \overline{) 813} \\ \underline{- 7} \\ 11 \\ \underline{- 7} \\ 43 \\ \underline{- 42} \\ 1 \end{array}$	b)	$\begin{array}{r} 168 \\ 4 \overline{) 672} \\ \underline{- 4} \\ 27 \\ \underline{- 24} \\ 32 \\ \underline{- 32} \\ 0 \end{array}$	c)	$\begin{array}{r} 115 \\ 6 \overline{) 695} \\ \underline{- 6} \\ 09 \\ \underline{- 6} \\ 35 \\ \underline{- 30} \\ 5 \end{array}$	d)	$\begin{array}{r} 131 \\ 3 \overline{) 395} \\ \underline{- 3} \\ 09 \\ \underline{- 9} \\ 05 \\ \underline{- 03} \\ 2 \end{array}$
	Check: $\begin{array}{r} 116 \times 7 \\ 812 \\ + 116 \\ \hline 813 \end{array}$		Check: $\begin{array}{r} 168 \times 4 \\ 672 \end{array}$		Check: $\begin{array}{r} 115 \times 6 \\ 690 \\ + 115 \\ \hline 695 \end{array}$		Check: $\begin{array}{r} 131 \times 3 \\ 393 \\ + 131 \\ \hline 395 \end{array}$

31 min

Notes

Individual work, monitored, (helped)

Written on BB or use enlarged copy master or OHP

Accept long or short vertical division.

Differentiation by time limit

Reasoning, agreement, checking, self-correction, praising

Feedback for T

5

Book 4, page 14Q.3 Read: *Practise division.*

Check your divisions with multiplication in your head (or in your *Ex. Bks*) if you have time. T sets a time limit.

Review at BB with whole class. Ps come to BB or dictate to T, explaining reasoning. Class agrees/disagrees. Mistakes discussed and corrected. Do checks on BB with whole class. Ps dictate what T should write.

Solution:

a)	$\begin{array}{r} 82 \\ 8 \overline{) 657} \\ \underline{- 64} \\ 17 \\ \underline{- 16} \\ 1 \end{array}$	b)	$\begin{array}{r} 83 \\ 9 \overline{) 752} \\ \underline{- 72} \\ 32 \\ \underline{- 27} \\ 5 \end{array}$	c)	$\begin{array}{r} 71 \\ 5 \overline{) 356} \\ \underline{- 35} \\ 06 \\ \underline{- 05} \\ 1 \end{array}$	d)	$\begin{array}{r} 93 \\ 3 \overline{) 279} \\ \underline{- 27} \\ 09 \\ \underline{- 09} \\ 0 \end{array}$
	Check: $\begin{array}{r} 82 \times 8 \\ 656 \\ + 164 \\ \hline 657 \end{array}$		Check: $\begin{array}{r} 83 \times 9 \\ 747 \\ + 752 \\ \hline 752 \end{array}$		Check: $\begin{array}{r} 71 \times 5 \\ 355 \\ + 71 \\ \hline 356 \end{array}$		Check: $\begin{array}{r} 93 \times 3 \\ 279 \end{array}$

39 min

Individual work, monitored, (helped)

Written on BB or use enlarged copy master or OHP

Accept long or short vertical division.

Differentiation by time limit

Reasoning, agreement, checking, self-correction, praising

Feedback for T

Bk4		Lesson Plan 14																																				
Activity	<p>6</p> <p>Book 4, page 14</p> <p>Q.4 Read: Do the calculations and write the answers in your exercise book.</p> <p>Try to picture the problem in your head. Draw a diagram if it will help you.</p> <p>For a) and b), Ps read problem themselves, do calculation and write answer as a sentence in Ex. Bks.</p> <p>Review with the whole class. Ps come to BB to do calculations, explaining reasoning. Class agrees/disagrees. Mistakes discussed and corrected.</p> <p>Solution:</p> <p>a) A floor tile is 205 mm wide. How wide is the utility room if 9 tiles laid end to end are needed for each row?</p> <p>Plan: 1 tile: 205 mm, 9 tiles: 205 mm × 9</p> <p>C: e.g. 205 × 9 = 200 × 9 + 5 × 9 = 1800 + 45 = 1845 (mm)</p> <p>Answer: The utility room is 1 m 84 cm 5 mm wide.</p> <p>b) 4 sacks of wheat weigh 304 kg altogether. How much wheat, on average, is in each sack?</p> <p>Plan: 4 sacks: 304 kg, 1 sack: 304 kg ÷ 4</p> <p>C: e.g. 304 ÷ 4 = 280 ÷ 4 + 24 ÷ 4 = 70 + 6 = 76 (kg)</p> <p>Answer: On average, there is 76 kg of wheat in each sack.</p> <p>Why do we say 'on average'? (Because there might be 76 kg in each sack but there could also be, e.g. 78 kg in sack 1, 74 kg in sack 2, 75 kg in sack 3, 77 kg in sack 4. which also give a total of 304 kg.)</p> <p>c) Read: Study the diagram. Make up a question about it.</p> <p>Set a time limit. Ps (Ps can work in pairs.)</p> <p>Review at BB with whole class. Ps suggest questions. Class agrees whether they are valid. Deal with all cases.</p> <p>e.g. If a man walks at a steady speed and takes 7 minutes to cover 420 m, how far did he walk in in the first minute?</p> <p>T (or class) chooses the 'best' one to solve. Ps come to BB or dictate what T should write. P who thought of the question decides whether the solution is correct.</p> <p>e.g. 7 minutes: 420 m 1 minute: 420 m ÷ 7 = 60 m</p> <p>Let's give them a round of applause!</p>	<p>Notes</p> <p>Individual work, monitored, helped (or all done as whole class activity if time is short)</p> <p>Discussion, reasoning, agreement, self-correction, praising</p> <p>or</p> <table><tr><td></td><td>2</td><td>0</td><td>5</td><td>×</td><td>9</td></tr><tr><td>1</td><td>8</td><td>4</td><td>5</td><td></td><td></td></tr></table> <p>1845 mm = 1 m 84 cm 5 mm</p> <p>or</p> <table><tr><td></td><td></td><td>7</td><td>6</td></tr><tr><td>4</td><td>3</td><td>0</td><td>4</td></tr><tr><td>-</td><td>2</td><td>8</td><td></td></tr><tr><td></td><td></td><td>2</td><td>4</td></tr><tr><td></td><td>-</td><td>2</td><td>4</td></tr><tr><td></td><td></td><td></td><td>0</td></tr></table> <p>Whole class discussion</p> <p>Allow Ps time to think and explain. T gives hints only if necessary.</p> <p>Individual (or paired) work, monitored</p> <p>Diagram drawn on BB or use enlarged copy master or OHP</p> <p>Whole class discussion. Praise all contributions.</p> <p>Extra praise if Ps realise the similarity to part b). i.e. the man has to walk at a steady speed, otherwise we can only work out the average distance he covered per minute.</p>		2	0	5	×	9	1	8	4	5					7	6	4	3	0	4	-	2	8				2	4		-	2	4				0

Book 4, page 15

Q.3 Read: *Pete can cycle 4 m in one second. How long will it take Pete to cycle: a) 760 m, b) 380 m, c) 1520 m?*

Set a time limit. Ps can use any correct form of calculation.

Review at BB with whole class. Ps explain their solutions on BB. Who did the same? Who did it another way? etc.

Mistakes discussed and corrected.

Solution: e.g.

a) 760 m b) 380 m c) 1520 m

$\begin{array}{r} \boxed{190} \\ 4 \overline{) 760} \\ \underline{4} \\ 360 \\ \underline{360} \\ 0 \end{array}$	$\div 2 \rightarrow$	$\begin{array}{r} \boxed{95} \\ 4 \overline{) 380} \\ \underline{4} \\ 380 \\ \underline{380} \\ 0 \end{array}$	$\times 4 \rightarrow$	$\begin{array}{r} \boxed{380} \\ 4 \overline{) 1520} \\ \underline{4} \\ 1520 \\ \underline{1520} \\ 0 \end{array}$
3		2		3
$\times 2$				

190 seconds 95 seconds 380 seconds

If no P has done so, T could elicit another way to obtain solutions to b) and c) using direct proportion. T draws arrows. Extra praise if Ps noticed relationships without hints from T.

40 min

Notes

Individual work monitored, helped

Differentiation by time limit

Discussion, reasoning, agreement, self-correcting, praising

or, e.g.

$$760 \text{ m} \div 4 \text{ m} = (400 \text{ m} + 360 \text{ m}) \div 4 \text{ m} = 100 + 90 = \underline{190} \text{ (times)}$$

Revise direct proportion.

[If one value (i.e. dividend) increases (decreases) by a certain number of times, another value (i.e. quotient) also increases (decreases) by that number of times.]

7

Book 4, page 15

Q.4 Read: *Fill in the missing numbers and signs.*

Ps do calculations and check with reverse operations at RHS of Pbs or in Ex. Bks..

Review at BB with whole class. Ps come to BB to fill in numbers and signs, explaining reasoning. Class agrees/disagrees.

Mistakes discussed and corrected.

In a), agree that dividing by 2 and then by 3 is the same as dividing by 6.

Solution:

a) $708 \xrightarrow{\div 2} \boxed{354} \xrightarrow{\div 3} \boxed{118}$ or $\boxed{118} \xrightarrow{\times 6} \boxed{708}$

Ch: $\begin{array}{r} \boxed{354} \\ 2 \overline{) 708} \\ \underline{70} \\ 8 \end{array}$ $\begin{array}{r} \boxed{118} \\ 3 \overline{) 354} \\ \underline{33} \\ 24 \end{array}$

Ch: $\begin{array}{r} \boxed{118} \times 6 \\ 708 \end{array}$ ✓

b) $698 = \boxed{139} \times 5 + \boxed{3}$

Ch: $\begin{array}{r} \boxed{139} \times 5 \\ 695 \\ + 3 \\ \hline 698 \end{array}$ ✓

45 min

Individual work monitored, helped

(or whole class activity if time is short)

Written on BB or use enlarged copy master or OHT

Discussion, reasoning, agreement, self-correcting, praising

or, e.g.

$$708 \div 2 = (600 + 108) \div 2 = 300 + 54 = \underline{354}$$

$$354 \div 3 = (300 + 30 + 24) \div 3 = 100 + 10 + 8 = \underline{118}$$

etc.

R: Mental calculation
 C: **Written calculations. Divisibility**
 E: Numbers up to 2000. Problems

Lesson Plan
16**Activity****1****Find the mistakes**

Mr. Silly has done these calculations.! What do you think of them? Are they correct? How can we check? Could the layout be better?

Ps come to BB to try to explain *Mr Silly's* reasoning, find any mistakes, say what he has done wrong and write the operation again correctly. Class agrees/disagrees.

BB: e.g.

a)

7	9	4	8		
-	7	0	0	1	0
	2	4	8		
-		7	0		1
	1	7	8		
-		7	0		1
	1	0	8		
-		7	0		1
		3	8		
-		2	8		4
		1	0		
		-	7		1
			③	1	3
				5	

Correct (but very long!)

Check:

1	3	5	×	7
9	4	5		
		+	3	
9	4	8		

b)

1	2	0	3
+	3	1	5
4	3	5	3

315 has wrong place value!
Should be:

1	2	0	3
+	3	1	5
1	5	1	8

d)

5	×	1	0	8
	0			
	4	0		
5	4	0		

Correct result, but a better layout is:

1	0	8	×	5
	4	0		
	0			
5				
5	4	0		

c)

2	7	5	×	3
	1	5		
2	1			
6				
8	2	5		

(long way) ✓

e) $817 \div 8 = 12, r 1$ ✗
 (0 tens missing)

Should be:
 $817 \div 8 = 102, r 1$

Check:

	1	0	2	r 1
8	8	1	7	
-	8			
	0	1	7	
	-	1	6	
			①	

6 min

Notes

Whole class activity

(Ps may do calculations in *Ex. Bks.* first if they wish)

Written on BB or use enlarged copy master or OHP

At a good pace

Reasoning, agreement, praising

Accept any form of correct calculation with correct reasoning.

or

e) $817 \div 8$
 $= 800 \div 8 + 17 \div 8$
 $= 100 + 2, r 1$
 $= 102, r 1$

Feedback for T

2**Number sets**

Let's write the numbers from 0 to 20 in the correct place in the set diagrams.

Deal with one part at a time. Ps come to BB one after the other to write a number, explaining reasoning. Class agrees/disagrees.

BB:

a)

Divisible by 8	Not divisible by 8
0 8 16	1 2 3 4 5 6 7 9 10 11 12 13 14 15 17 18 19 20

b)

Divisible by 5	Not divisible by 5
0 5 10 15 20	1 2 3 4 6 7 8 9 11 12 13 14 16 17 18 19

c)

	Divisible by 8	Not divisible by 8
Not divisible by 5	8 16	1 2 3 4 6 7 9 11 12 13 14 17 18 19
	(48, 112)	(101, 533)
Divisible by 5	0	5 10 15 20
	(40, 240)	(70, 95)

T points to each set in c). Ps say other numbers which belong there.

12 min

Whole class activity

Drawn on BB or use enlarged copy master or OHP

At speed

Reasoning, agreement, praising

T chooses Ps at random. Agreement, praising

Bk4*Lesson Plan 16***Activity****3****Problems**

Listen carefully and think how you would work out the answer.

- a) *How much will 8 bars of chocolate cost if 2 of the same bars cost £1.22?*

Ps come to BB or dictate to T. Who agrees? Who would do it another way? etc. T summarises by writing out as below.

$$\begin{array}{ll} \text{BB: } 2 \text{ bars} \rightarrow & £1.22 = 122 \text{ p} \\ 1 \text{ bar} \rightarrow & 122 \text{ p} \div 2 = 61 \text{ p} \\ 8 \text{ bars} \rightarrow & 122 \text{ p} \div 2 \times 8 = 61 \text{ p} \times 8 = 488 \text{ p} = \underline{£4.88} \end{array}$$

T highlights the combined operations as a one-line plan.

Or by using direct proportion:

$$\begin{array}{l} \text{BB: } \times 4 \left(\begin{array}{l} 2 \text{ bars} \rightarrow 122 \text{ p} \\ 8 \text{ bars} \rightarrow \underline{488 \text{ p}} \end{array} \right) \times 4 \end{array}$$

1	2	2	×	4
4	8	8		

Answer: 8 bars of chocolate will cost £4.88.

- b) *How much will 9 packets of sweets cost if 3 of the same packets of sweets cost £3.06?*

Who can write the operations in one line? Who can show it using direct proportion?

$$\begin{array}{ll} \text{BB: } 3 \text{ packets } £3.06 = 306 \text{ p} & \\ 9 \text{ packets } 306 \text{ p} \div 3 \times 9 = 102 \text{ p} \times 9 & \\ & = 918 \text{ p} = \underline{£9.18} \end{array}$$

Or by using direct proportion:

9 packets are 3 times 3 packets, so will cost 3 times as much as 3 packets.

$$\text{BB: } 306 \text{ p} \times 3 = 918 \text{ p} = \underline{£9.18}$$

Answer: 9 packets of sweets will cost £9.18.

*20 min***Notes**

Whole class activity

Initial discussion about different methods of solution.

Involve several Ps.

At a good pace

Reasoning, agreement, praising

T writes out again only if Ps have not done so clearly

If Ps do not suggest this way, T elicits or demonstrates it.

Ps say answer as a sentence.

Reasoning, agreement, praising

Ps say answer as a sentence.

4**Book 4, page 16**

- Q.1 Read: *Write the numbers from 200 to 220 in the correct column in the table.*

Draw dots on the graph to show the remainders.

T (P) explains task. Do first two numbers with whole class first if Ps are unsure what to do.

Review at BB with whole class. Ps come to BB one after the other to write a number in the table and show it in the graph. Class agrees/disagrees. Mistakes discussed and corrected.

Solution:

Remainder after dividing by 5				
0	1	2	3	4
200	201	202	203	204
205	206	207	208	209
210	211	212	213	214
215	216	217	218	219
220				

*27 min*

Individual work, monitored, helped

Drawn on BB or use enlarged copy master or OHP

Discussion, reasoning, agreement, self-correcting, praising

Why are there no dots on the remainder 5 line?

(e.g. Because if you had a remainder of 5 you would be at the next multiple of 5 which is already shown on the line for remainder 0.)

Lesson Plan 16

Activity

5

Book 4, page 16, Q.2Read: *Helen had 952 stamps. She gave 278 stamps to Sam.*a) *How many stamps did Helen have left?**Complete the calculation.*

Ps come out to BB to point to relevant data and complete the middle subtraction, explaining reasoning. Class agrees/disagrees. Ps write the result in *Pbs* too.

BB:

-			

 $\xleftarrow{-200}$

9	5	2
-	2	7
6	7	4

 $\xrightarrow{+100}$

-			

Read: b) *How many stamps would she have left if she had at first*i) *200 stamps less?*

Which calculation is this? Should we follow the arrows pointing to the right or to the left? Ps come to BB to point to relevant arrows, to write the LH subtraction, explaining reasoning and to write operation above lower arrow. Class agrees/disagrees. Ps write the result in *Pbs*.

BB:

	7	5	2
-	2	7	8
	4	7	4

 $\xleftarrow{-200}$

9	5	2
-	2	7
6	7	4

 $\xrightarrow{+100}$

-			

Read: b) *How many stamps would she have left if she had at first*ii) *100 stamps more?*

Ps come to BB to point to relevant arrows, to write the subtraction, on RHS, explaining reasoning and to write operation above lower arrow. Class agrees/disagrees. Ps write the result in *Pbs* too.

Solution:

	7	5	2
-	2	7	8
	4	7	4

 $\xleftarrow{-200}$

9	5	2
-	2	7
6	7	4

 $\xrightarrow{+100}$

	1	0	5	2
-		2	7	8
		7	7	4

Extension

*How many stamps would Helen have left if she had given Sam:*i) *200 less stamps*ii) *100 more stamps?*

Ps come to BB to write calculations and operations above arrows. Class agrees/disagrees.

BB:

	9	5	2
-		7	8
	8	7	4

 $\xleftarrow{-200}$

	9	5	2
-	2	7	8
	6	7	4

Bk4	<p>R: Calculation C: Measures: revision of length, capacity, mass. Numbers up to 2000 E: Problems</p>	<p><i>Lesson Plan</i> 17</p>
<p>Activity 1</p>	<p>Measuring length</p> <p>a) What units does your ruler show? (e.g. cm and mm) What range of lengths can you measure with it? (e.g. 0 cm to 27 cm or 0 mm to 275 mm; or more if we mark, e.g. 20 cm, then move the ruler along)</p> <p>Who can fill in the missing items? Ps come to BB or dictate to T. BB: 1 centimetre = 10 millimetres 1 cm = 10 mm</p> <p>Measure the width of your exercise book. T asks several Ps their result. Ps might give it in different units. T writes on BB. e.g. BB: Width of exercise book: 18 cm 5 mm = 185 mm</p> <p>b) i) What range of lengths can we measure with this metre stick? (0 m to 1 m, or 0 cm to 100 cm, or 0 mm to 1000 mm) ii) What range of lengths can we measure with this tape measure? (e.g. 0 m to 1 and a half m, or 0 cm to 150 cm, or 0 mm to 1500 mm)</p> <p>Let's measure the width of A's desk (the classroom). Ps come to front of class in pairs to choose an appropriate measuring tool, measure and write length on BB. (T should have an idea of what the lengths are beforehand. If the measures are way out, ask another pair of Ps to repeat it.) e.g. BB: Width of: A's desk: 503 mm = 50 cm 3 mm the classroom: 1245 cm = 12 m 45 cm (= 12 450 mm)</p> <p>Who can fill in the missing items? Ps dictate to T or come to BB. Rest of class write in <i>Ex. Bks.</i> too.</p> <p>BB: 1 m = 100 cm = 1000 mm 1 km = 1000 m 1 cm = 10 mm</p> <p>What place is about 1 km from the school? (T should already have one or two in mind, or cite number of times round playground)</p> <p style="text-align: right;"><i>10 min</i></p>	<p>Notes</p> <p>Whole class activity</p> <p>Ps have rulers on desks and T has other measuring tools (e.g. metre rule, tape measure, etc.) (T could have a ruler or tape measure in inches and feet too and compare these Imperial units with cm and m.)</p> <p>Discussion, agreement, praising</p> <p>At a good pace throughout</p> <p>And/or T could ask several Ps how tall they are (or measure them) and write their heights on BB.</p> <p>Extension</p> <p>[T might mention that in some countries, e.g. Hungary, they use these units of length.</p> <p>BB:</p> $1 \text{ mm} < 1 \text{ cm} < 1 \text{ dm} < 1 \text{ m} < 1 \text{ km}$ $\times 10 \quad \times 10 \quad \times 10 \quad \times 1000$ <p>What do you think dm means? (decimetre) How many cm do you think are in 1 dm? (10)</p> <p>How many dm do you think are in 1 m? (10). Elicit or tell that 1 dm = 1 tenth of a m]</p>
<p>2</p>	<p>Measuring capacity</p> <p>What is capacity? (How much liquid a container can hold.)</p> <p>a) Let's measure capacity using non-standard units. (e.g. measuring the capacity of a jug or bottle using a tumbler or glass.) Ps estimate first, then confirm by measuring with water. e.g. BB: 3 glasses < capacity of jug < 4 glasses</p> <p>b) What range of capacity can be measured using this measuring jug (feeding bottle)? e.g. 0 ml to 1000 ml, or 0 cl to 100 cl, or 0 litre to 1 litre.</p> <p>How much water is in this bucket (bottle, etc.)? Ps estimate first, then measure. (e.g. 2 litres, 75 cl, 750 ml, etc.)</p> <p>What is missing? Ps come to BB or dictate to T.</p> <p>BB: 1 litre = 100 cl = 1000 ml 1 cl = 10 ml</p> <p>Ps copy in <i>Ex. Bks.</i></p> <p>Elicit the relationship between capacity and length. Show it in a diagram or demonstrate with an open-top 10 cm glass cube.</p> <p style="text-align: right;"><i>20 min</i></p>	<p>Whole class activity</p> <p>T has various containers of different size</p> <p>Discussion, agreement, praising</p> <p>At a good pace</p> <p>T could mention Imperial units too (pint, gallon) and compare with decimal units.</p> <p>BB: <u>1 litre of water</u></p> <div style="text-align: center;">  </div> <p>Extension</p> <p>How many litres of water would you displace in a bath?</p>

Bk4		<i>Lesson Plan 17</i>
Activity 3	<p>Measuring mass</p> <p>T has various objects to weigh and different sets of scales and weights.</p> <p>a) Ps come to front of class to measure weights using non-standard units. Ps estimate first. e.g. 2 spoons < a book < 3 spoons</p> <p>b) What range of units could we measure with these scales? Ps come to BB to read range and T writes on BB. (e.g. 0 g to 1000 g, or 0 kg to 5 kg)</p> <p>Ps come to front to estimate mass first then weigh various items using appropriate sets of scales and standard units. Ps write weights on BB. T could ask various Ps what they weigh, or Ps come to front of class to weigh themselves on bathroom scales and write weights on BB.</p> <p>What is missing? Ps come to BB or dictate to T.</p> <p>BB: 1 kg = 1000 g 1 tonne = 1000 kg</p> <p>Ps copy in <i>Ex. Bks.</i> What kind of things would you weigh in tonnes? (e.g. ships, elephants, transporters, etc. – very heavy things!)</p> <p>Elicit the relationship between mass, capacity and length.</p> <p>Ps can demonstrate by filling a 10 cm × 10 cm × 10 cm open-top glass cube with water, pouring it into a litre jug, then pouring it into the container on a set of scales.</p> <p>BB: 1000 cm cubes (cc) of water → 1 litre → 1 kg 1 cc of water → 1 ml → 1 g</p> <p style="text-align: right;">28 min</p>	<p style="text-align: center;">Notes</p> <p>Whole class activity</p> <p>Digital and mechanical scales and balances with various weights: e.g. 1 g, 2 g, 5 g, 10 g, 20 g, 50 g, 100 g, 200 g, 500 g, 1 kg</p> <p>[T might show Imperial weights too (ounce, lb, stone) and compare with decimal measures.]</p> <p>At a good pace</p> <p>Discussion, agreement, praising</p> <p>Allow Ps to explain it if they can but T should have appropriate measuring tools available for them to use.</p> <p>T gives hints only if Ps do not remember.</p> <p>Agreement, praising</p>
4	<p>Book 4, page 17</p> <p>Q.1 Read: <i>Fill in the missing numbers and units.</i></p> <p>What kind of measures are these? (length) Set a time limit.</p> <p>Review at BB with whole class. Ps dictate results to T or come to BB, explaining reasoning. Mistakes discussed and corrected.</p> <p><i>Solution:</i></p> <p>a) 3 m 35 cm = <u>335</u> cm b) 5 m 70 cm = 570 <u>cm</u> c) 198 cm = <u>1</u> m <u>98</u> cm d) 609 cm = 6 <u>m</u> <u>9</u> cm e) 8 cm 4 mm = <u>84</u> mm f) 1 m 32 cm 5 mm = 1325 <u>mm</u> g) 1273 mm = <u>1</u> m <u>27</u> cm <u>3</u> mm h) 1905 mm = <u>1</u> m <u>90</u> cm <u>5</u> mm</p> <p style="text-align: right;">32 min</p>	<p>Individual work, monitored, helped</p> <p>Written on BB or use enlarged copy master or OHP</p> <p>Differentiation by time limit</p> <p>Discussion, reasoning, agreement, self-correcting, praising</p> <p>Feedback for T</p>
5	<p>Book 4, page 17</p> <p>Q.2 Read: <i>Fill in the missing numbers and units.</i></p> <p>What kind of measures are these? (capacity) Set a time limit.</p> <p>Review at BB with whole class. Ps dictate results to T or come to BB, explaining reasoning. Mistakes discussed and corrected.</p> <p><i>Solution:</i></p> <p>a) 3 litres 42 cl = <u>342</u> cl b) 6 litres 58 cl = 658 <u>cl</u> c) 824 cl = <u>8</u> litres <u>24</u> cl d) 703 cl = 7 <u>litres</u> <u>3</u> cl e) 1 litre 63 cl 5 ml = <u>1635</u> <u>ml</u> f) 1 litre 4 cl 8 ml = 1048 <u>ml</u> g) 1546 ml = <u>1</u> litre <u>54</u> cl <u>6</u> ml h) 1038 ml = <u>1</u> litre <u>3</u> cl <u>8</u> ml</p> <p style="text-align: right;">36 min</p>	<p>Individual work, monitored, helped</p> <p>Written on BB or use enlarged copy master or OHP</p> <p>Differentiation by time limit</p> <p>Discussion, reasoning, agreement, self-correcting, praising</p> <p>Feedback for T</p>

Bk4	<p>R: Calculations C: Measures: (length, capacity, mass, time). Numbers up to 2000 E: Problems</p>	<p><i>Lesson Plan</i> 18</p>
<p>Activity</p> <p>1</p>	<p>Estimating length</p> <p>Imagine these things in real life. Estimate their lengths.</p> <p>BB: (a) book (b) rubber (c) house (d) car (e) table</p> <p>1 m < e < 2 m 2 cm b < 3 cm</p> <p>10 cm < a < 20 cm 4 m < d < 5 m</p> <p>10 m < c < 20 m</p> <p>Ps come to BB to write letter of item in appropriate inequality. Class agrees disagrees. If problems, check against real measures.</p> <p style="text-align: right;">4 min</p>	<p>Notes</p> <p>Whole class activity</p> <p>(T could have some real items to show to class)</p> <p>Inequalities written on BB or use enlarged copy master or OHP</p> <p>At a good pace</p> <p>Agreement, praising</p> <p>Feedback for T</p>
<p>2</p>	<p>Estimating capacity</p> <p>Imagine these things in real life. Estimate their capacity</p> <p>BB: (a) jug (b) bucket (c) tank (d) spoon (e) glass (f) bottle</p> <p>1 litre < f < 2 litres 80 litres < c < 100 litres</p> <p>10 ml < d < 20 ml 100 ml < e < 200 ml</p> <p>800 ml < a < 1000 ml 1000 cl < f < 2000 cl</p> <p>5 litres < b < 10 litres 80 cl < a < 1 litre</p> <p>Ps come to BB to write letter of item in appropriate inequality. Class agrees disagrees. Extra praise if Ps notice that 2 inequalities are the same as two others (see joining lines).</p> <p style="text-align: right;">10 min</p>	<p>Whole class activity</p> <p>(T could have some real items to show to class.)</p> <p>Inequalities written on BB or use enlarged copy master or OHP</p> <p>At a good pace</p> <p>Discussion, agreement, praising</p> <p>T points to other inequalities</p> <p>Ps say them using other units, e.g 10 cl < e < 20 cl</p>
<p>3</p>	<p>Estimating mass</p> <p>Imagine these things in real life. Estimate their mass (weight).</p> <p>BB: (a) 1 litre of milk (b) apple (c) teacher (d) loaf of bread</p> <p>(e) Y4 boy (f) egg</p> <p>900 g < a < 1100 g 20 kg < e < 40 kg</p> <p>50 g < f < 100 g 50 kg < c < 1000 kg</p> <p>500 g < d < 1000 g 100 g < b < 200 g</p> <p>Ps come to BB to write letter of item in appropriate inequality. Class agrees disagrees.</p> <p style="text-align: right;">15 min</p>	<p>Whole class activity</p> <p>(T could have real items to show to class.)</p> <p>Inequalities written on BB or use enlarged copy master/OHP</p> <p>At a good pace</p> <p>Discussion, agreement, praising</p> <p>Extension</p> <p>Ps suggest another item and class agrees on an inequality for it. Check with real weight.</p>

Bk4		<i>Lesson Plan 18</i>
Activity 4	<p>Time</p> <p>What standard units of time do we use? Ps tell what they know. (e.g. seconds, minutes, hours, days, weeks, months, seasons, years) Let's fill in the missing units. Ps come to BB or dictate to T.</p> <p>BB: 1 year = 4 seasons 1 year = 52 weeks + 1 or 2 days</p> <p>1 year = 12 months 1 week = 7 days</p> <p>1 year = 365 or 366 days 1 day = 24 hours</p> <p>1 hour = 60 minutes 1 minute = 60 seconds</p> <p>T informs class (or elicits if T thinks Ps might know):</p> <ul style="list-style-type: none"> • Leap years have an extra day (February 29th) so have <u>366</u> days. • Years divisible by 4 are leap years, except the whole hundred years when only every fourth hundred is a leap year. When is the next leap year? (2004, as the next year divisible by 4) • In a non-leap year, 1 January and 31 December are on the same day of the week. • The year 2000 was the last year of the second millennium (or second thousand years), or the last day of the 20th century. • 2001 is the first year of the third millennium (or third thousand years), or the first year of the 21st century. What was the first <u>day</u> of the 21st century? (1 January 2001, or 01 / 01 / 2001) <p style="text-align: right;">20 min</p>	<p>Notes</p> <p>Whole class activity T has clock and large calendar on the wall.</p> <p>Written on BB or use enlarged copy master or OHP At a good pace Agreement, praising</p> <p>BB: $52 \times 7 = 350 + 14$ = 364</p> <p>Feedback for T</p> <p>Discussion. Involve several Ps. e.g. 2000 was a leap year but 2100 will not be. T refers to calendar where appropriate.</p> <p>BB: 1 century = 100 years 1 millennium = 1000 years</p> <p>Remind Ps of different ways of writing the date.</p>
5	<p>What is the time?</p> <p>a) T sets a real or model clock and Ps read the time. Encourage other Ps to express the times in different ways.</p> <p>e.g. 12 o'clock, 12:00 or 00:00, mid-day (noon) or midnight 4 o'clock, 4.00 pm or 4.00 am, 04:00 or 16:00 2 minutes to nine, 8.58 am or 8.58 pm, 8:58 or 20:58 A quarter to 12, 11.45 am or 11.45 pm, 11:45 or 23:45, etc.</p> <p>b) T (or P) dictates times in different ways. Ps set their model clocks and show to T on command.</p> <p style="text-align: right;">25 min</p>	<p>Whole class activity T chooses Ps at random. Class points out errors. Remind Ps that 12 o'clock is neither am nor pm. Agreement, praising Ps can set the time too!</p> <p>Use copy master from Y2 LP 83/1. Agreement, praising</p>
6 Extension	<p>Book 4, page 18</p> <p>Q.1 Read: <i>Join up the quantities to the tools you would use to measure them.</i></p> <p>Review at BB with whole class Ps come to BB to draw joining lines. Class agrees/disagrees. Mistakes discussed and corrected.</p> <p>Solution:</p> <div style="text-align: center;"> </div> <p>T points to a quantity and Ps express it in another way.</p> <p style="text-align: right;">29 min</p>	<p>Individual work, monitored Drawn on BB or use enlarged copy master or OHP Discussion, agreement, self-correcting, praising Feedback for T</p> <p>e.g. 3 kg 480 g = 3480 g Agreement, praising</p>

Bk4		Lesson Plan 18
Activity		Notes
7	<p>Book 4, page 18</p> <p>Q.2 Read: Join up the measures to the matching units.</p> <p>Review at BB with whole class Ps come to BB to draw joining lines. Class agrees/disagrees. Mistakes discussed and corrected.</p> <p>Solution:</p> <div><div>metre kilogram litre centimetre</div><div><div>capacity</div><div>time</div><div>length</div><div>mass</div></div><div>centilitre minute gram day</div></div> <p>What other units could be used for each type of measure?</p> <p>33 min</p>	<p>Individual work, monitored</p> <p>Written on BB or use enlarged copy master or OHP</p> <p>Discussion, agreement, self-correcting, praising</p> <p>Feedback for T</p> <p>e.g. capacity: ml (pint, gallon)</p>
8	<p>Book 4, page 18</p> <p>Q.3 Read: Fill in the missing numbers and units.</p> <p>Elicit that there are 14 equations. Set a time limit.</p> <p>Review at BB with whole class. Ps come to BB or dictate to T. Ps mark/correct own work and write how many correct out of 14.</p> <p>Who had 14 correct? Who made 1 mistake (2, 3, 4, more than 4) mistakes? What was your mistake? Who did the same? Who made a different mistake? etc.</p> <p>Solution:</p> <div><div>a) 439 cm = 4 m 39 cm b) 1831 mm = 1 m 83 cm 1 mm c) 1210 g = 1 kg 210 g d) 1942 ml = 1 litre 942 ml e) 11 minutes = 660 seconds f) 372 seconds = 6 m 12 sec g) January = 4 weeks 3 days</div><div>12 m 6 cm = 1206 cm 1 m 67 mm = 1067 mm 1 kg 340 g = 1340 g 1 litre 86 ml = 1086 ml 4 hrs 27 min = 267 min 10 min 40 sec = 640 sec June = 4 weeks 2 days</div></div> <p>40 min</p>	<p>Individual work, monitored, helped</p> <p>Written on BB or use enlarged copy master or OHP</p> <p>Differentiation by time limit</p> <p>Reasoning, agreement, self-correction, praising</p> <p>Evaluation. Class applauds Ps with all (most) correct.</p> <p>Feedback for T</p>
9	<p>Book 4, page 18</p> <p>Q.4 Read: Write in the missing numbers. (They need only be approximate.)</p> <p>Ps fill in what they can during the rest of the lesson. They can finish it at home if they run out of time.</p> <p>T chooses Ps to read out their details. Class decides whether their estimates are realistic or not.</p> <p>Solution: e.g.</p> <p>Today's date: 16 / 10 / 2001</p> <p>My height: 134 cm = 1 m 34 cm</p> <div><div>My weight: 32 kg My age: 8 years 3 months I go to bed at: 9.00 pm I get up at: 8.00 am</div><div>Length of my step: 60 cm Length of my span: 12 cm Length of my foot: 14 cm I sleep for: 11 hours per day</div></div> <p>45 min</p>	<p>Individual work, monitored</p> <p>Ps have rulers on desks.</p> <p>T should have bathroom scales and a height measure against the classroom wall.</p> <p>T might need to explain what a 'span' is (from tip of thumb to tip of little finger when hand is stretched out flat)</p> <p>Ps can help each other to find the measures they do not know.</p> <p>Agreement, self-correcting, praising, encouragement only</p> <p>In good humour!</p>

Bk4

R: Calculations up to 1000
 C: **Length, capacity, mass, time. Calculations up to 2000**
 E: Problems

Lesson Plan
19**Activity****1****Problems**

Study the diagrams and the data. Let's think of questions to ask and then try to answer them. Ps suggest questions and methods of solution.

a) BB:

[N.B. Choose easier lengths for sides if T does not want class challenged so much!]

e.g. 3 m 42 cm

Q.1 What is the perimeter of the rectangle?

$$P = 2 \times (2 \text{ m} + 3 \text{ m } 42 \text{ cm}) = 2 \times 5 \text{ m } 42 \text{ cm} \\ = \underline{10 \text{ m } 84 \text{ cm}}$$

Q.2 Which side is longer and by how much?

Let's label the long side a and the short side b .

$$a = 3 \text{ m } 42 \text{ cm} = 342 \text{ cm}$$

$$b = 2 \text{ m} = 200 \text{ cm, so } a > b$$

$$a - b = 342 \text{ cm} - 200 \text{ cm} = 142 \text{ cm} = \underline{1 \text{ m } 42 \text{ cm}}$$

Answer: a is longer than b by 1 m 42 cm

Q.3 What is the area of the rectangle?

$$A = 3 \text{ m } 42 \text{ cm} \times 2 \text{ m} = 3 \text{ m} \times 2 \text{ m} + 42 \text{ cm} \times 2 \text{ m} \\ = 6 \text{ m}^2 + 42 \text{ cm} \times 200 \text{ cm} \\ = 6 \text{ m}^2 + 8400 \text{ cm}^2 \\ = \underline{6 \text{ m}^2 \text{ } 8400 \text{ cm}^2}$$

$$\text{or } A = 342 \text{ cm} \times 200 \text{ cm} = 684 \text{ cm} \times 100 \text{ cm} = 68 \text{ } 400 \text{ cm}^2 \\ = \underline{6 \text{ m}^2 \text{ } 8400 \text{ cm}^2}$$

Because

BB: $1 \text{ m} \times 1 \text{ m} = 1 \text{ m}^2$ (1 m square)
 $1 \text{ cm} \times 1 \text{ cm} = 1 \text{ cm}^2$ (1 cm square)
 $1 \text{ m}^2 = 100 \times 100 \text{ cm}^2 = \underline{10 \text{ } 000 \text{ cm}^2}$

b) BB: \rightarrow £13 20 p

e.g.

Q.1 What do 3 balls cost?

$$12 \text{ balls: } £13 \text{ } 20 \text{ p} = 1320 \text{ p}$$

$$3 \text{ balls: } 1320 \text{ p} \div 12 \times 3 = 110 \text{ p} \times 3 = 330 \text{ p} = \underline{£3 \text{ } 30 \text{ p}}$$

$$\text{Or } 3 \text{ balls} = 12 \text{ balls} \div 4, \text{ so cost is } 1320 \text{ p} \div 4 = 330 \text{ p}$$

Of course, Ps might think of questions not mentioned here!

Notes

Whole class activity

Diagrams drawn on BB

T intervenes only if necessary.

Ps draw diagrams and write solutions in *Ex. Bks.* too.

Reasoning, agreement, praising

$$\text{or } 2 \times 5 \text{ m } 42 \text{ cm}$$

$$= 2 \times 542 \text{ cm} = \underline{1084 \text{ cm}}$$

BB:

This is very difficult because of the data, but if Ps suggest it let them work through it as far as they can, praising any correct contribution.

T helps with the calculation and reading the result.

T reminds Ps of the notation for 'squares' and explains why $68 \text{ } 400 \text{ cm}^2 = 6 \text{ m}^2 \text{ } 8400 \text{ cm}^2$

Have no expectations of Ps learning it yet, but some might follow the reasoning!

C:

			1	1	0
1	2	1	3	2	0
	-	1	2		
			1	2	
		-	1	2	
				0	0

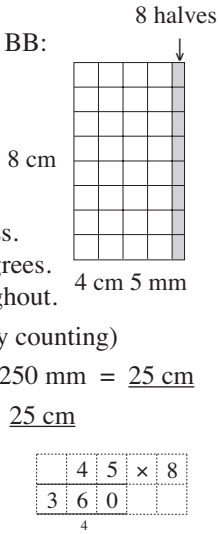

or

		3	3	0
4	1	3	2	0

1

$$330 \text{ p} = £3 \text{ } 30 \text{ p} = £3.30$$

10 min

Bk4		Lesson Plan 19
Activity 2	<p>Construction</p> <p>a) Draw a rectangle in your <i>Ex. Bks</i> with sides 4 cm 5 mm and 8 cm. T draws a rough diagram on BB but Ps measure (or count) accurately in <i>Ex. Bks</i> or on grid.</p> <p>b) Calculate its perimeter and its area. T sets a time limit. Review at BB with whole class. Ps come to BB or dictate to T. Class agrees/disagrees. Mistakes discussed and corrected. T helps throughout.</p> <p><i>Solution:</i> by calculating in either mm or cm (or by counting)</p> <p>$P = 2 \times (45 \text{ mm} + 80 \text{ mm}) = 2 \times 125 \text{ mm} = 250 \text{ mm} = \underline{25 \text{ cm}}$ or $P = 2 \times (4.5 \text{ cm} + 8 \text{ cm}) = 2 \times 12.5 \text{ cm} = \underline{25 \text{ cm}}$</p> <p>$A = 45 \text{ mm} \times 80 \text{ mm} = \underline{3600 \text{ mm}^2}$, or $A = 4.5 \text{ cm} \times 8 \text{ cm} = (32 + 4) \text{ cm}^2 = \underline{36 \text{ cm}^2}$</p>  <p style="text-align: right;">18 min</p>	<p>Notes</p> <p>Individual work in <i>Ex. Bks</i> (or on 0.5 cm square grid) monitored, helped</p> <p>Perimeter found individually but area could be done with the whole class.</p> <p>Reasoning, agreement, self-correction, praising</p> <p>Elicit that: $45 \text{ mm} = 4.5 \text{ cm}$ $4.5 = 4 \text{ and } 5 \text{ tenths}$ $= 4 \text{ and a half}$</p> <p>BB: $1 \text{ mm} \times 1 \text{ mm} = 1 \text{ mm}^2$ $10 \text{ mm} \times 10 \text{ mm} = 100 \text{ mm}^2 = 1 \text{ cm}^2$</p>
3	<p>Missing numbers and units</p> <p>Let's see how quickly we can fill in the missing items!</p> <p>Ps come to BB to write numbers and units, explaining reasoning and to say completed equation. Class checks mentally whether they are correct.</p> <p>BB:</p> <p>a) $780 \text{ m} + \boxed{220 \text{ m}} = 1 \text{ km}$ $2 \text{ km} - \boxed{500} \text{ m} = 1500 \text{ m}$ $1260 \text{ m} + \boxed{740 \text{ m}} = 2 \text{ km}$ $1 \text{ km} - \boxed{560} \text{ m} = 440 \text{ m}$</p> <p>b) $450 \text{ g} + \boxed{550 \text{ g}} = 1 \text{ kg}$ $1 \text{ kg} - 20 \text{ g} = \boxed{980} \text{ g}$ $1350 \text{ m} + \boxed{650 \text{ g}} = 2 \text{ kg}$ $2 \text{ kg} - 840 \text{ g} = \boxed{1160} \text{ g}$</p> <p>c) $330 \text{ ml} + \boxed{670 \text{ ml}} = 1 \text{ litre}$ $1 \text{ litre} - \boxed{590} \text{ ml} = 410 \text{ ml}$ $1600 \text{ ml} + \boxed{400 \text{ ml}} = 2 \text{ litres}$ $\boxed{1310} \text{ ml} - 1 \text{ litre} = 310 \text{ ml}$</p> <p style="text-align: right;">25 min</p>	<p>Whole class activity</p> <p>Written on BB or SB or OHT or use enlarged copy master</p> <p>At a good pace</p> <p>Reasoning, e.g. '$780 \text{ m} + \underline{220 \text{ m}} = 1 \text{ km}$ because $1 \text{ km} - 780 \text{ m} = \underline{220 \text{ m}}$'</p> <p>Agreement, praising</p>

<p>Activity</p> <p>1</p>	<p>Which is more?</p> <p>Let's compare them and draw arrows pointing towards the one which is more. Ps come to BB to draw arrows. Class points out errors.</p> <p>BB:</p> <p>a)  b) </p> <p>What do you notice? (e.g. 6 arrows, 3 pointing towards the biggest quantity, 2 towards the 2nd biggest, 1 towards the 2nd smallest; the smallest quantity has only arrows pointing away from it)</p> <p style="text-align: right;">5 min</p>	<p>Notes</p> <p>Whole class activity Written on BB or flash cards stuck to BB, or use enlarged copy master or OHP At a good pace In good humour! Reasoning, agreement, praising Feedback for T</p>
<p>2</p>	<p>Which belongs?</p> <p>Which of these quantities belongs to which food ?</p> <p>Ps come to BB to draw joining lines or to cross out unrealistic quantities, explaining reasoning. Class agrees/disagrees.</p> <p>BB:</p>  <p>(Ps might say, e.g., that they can eat a slice of bread or drink a glass of milk in 5 minutes; or that in Giant's Land a glass could hold 4 litres of milk and a slice of bread could weigh 3 kg and measure 130 cm long!)</p> <p style="text-align: right;">10 min</p>	<p>Whole class activity Drawn on BB or use pictures cut from magazines and cards stuck to BB, or use enlarged copy master or OHP At a good pace Reasoning, agreement, praising In good humour! If possible, confirm with real glass of milk and slice of bread. Extra praise if Ps make a valid case for one of the quantities crossed out.</p>
<p>3</p>	<p>Time</p> <p>Write the answers to these questions in your <i>Ex. Bks</i>. Use suitable units of time. The times need only be approximate or you could give a range if you are unsure.</p> <p>Review answer after every question. Deal with all cases.</p> <p>a) How long do you sleep each day? (e.g. 8 to 11 hours) b) How long is the school's Easter break? (e.g. 2 weeks) c) How long is half a year? (e.g. 6 months; 26 weeks; 182 and a half days) d) How much time does it take you to get to school? (various answers) e) How long is your maths lesson? (e.g. 45 minutes; 3 quarters of an hour) f) How much time does it take you to run 100 m? (e.g. 20 seconds, half a minute, etc.)</p> <p>Ps can think of question too!</p> <p style="text-align: right;">15 min</p>	<p>Individual work in <i>Ex. Bks</i> but class kept together Or Ps could show answers on scrap paper or slates in unison on command. Discuss whether answers are realistic or unrealistic. In f) T could have a rough distance measured beforehand to give Ps an idea, e.g. from the school gate to the playing fields. Extra praise for clever questions!</p>

Bk4

Lesson Plan 20

Activity

4

Book 4, page 20

Q.1 Read: *Write a plan. Do the calculation in your exercise book. Write the answer*

Deal with one part at a time. Ps read question themselves, write a plan in *Pbs*, do calculation in *Ex. Bks.* and write answer in *Pbs*.

Review with whole class. T asks several Ps for their answer.

A, come and tell us how you worked it out. Who did the same?

Who did it a different way? etc. Mistakes discussed/corrected.

Solution:

- * a) *A ball bearing weighs 30 g. What is the weight of 451 ball bearings?*

$$\text{Plan: } 30 \text{ g} \times 451 \quad \text{C: } 30 \times 451 = 3 \times 4510 = 13\,530 \text{ (g)} \\ = \underline{13 \text{ kg } 530 \text{ g}}$$

Answer: They weigh 13 kg 530 g.

- b) *A snail moves at a speed of 6 cm per minute. How far will it have gone after 3 hours 7 minutes?*

$$\text{Plan: } (3 \times 60 + 7) \times 6 \text{ cm} \quad \text{C: } 187 \times 6 \text{ cm} = 1122 \text{ cm} \\ = \underline{11 \text{ m } 22 \text{ cm}}$$

Answer: It will have gone 11 m 22 cm.

- * c) *Grandma made 17 litres of tomato sauce and poured it into 70 cl bottles. How many bottles did she fill?*

$$\text{Plan: } (17 \times 100) \text{ cl} \div 70 \text{ cl} \quad \text{C: } 1700 \div 70 = 170 \div 7 \\ = \underline{24, \text{r } 2}$$

Answer: She filled 24 bottles.

- d) *Mum bought 14 m 36 cm of material and made 4 tablecloths, all the same size. How much material did she use for each tablecloth?*

$$\text{Plan: } 14 \text{ m } 36 \text{ cm} \div 4 \quad \text{C: } 1436 \text{ cm} \div 4 = 359 \text{ cm} \\ = \underline{3 \text{ m } 59 \text{ cm}}$$

Answer: Mum used 3 m 59 cm for each tablecloth.

25 min

Notes

Individual work, monitored, helped

(starred questions can be done with whole class if T thinks they are too difficult)

Reasoning, agreement, self-correction, praising

$$\begin{array}{r} 4510 \times 3 \\ 13530 \end{array}$$

$$\begin{array}{r} 187 \times 6 \\ 1122 \end{array}$$

$$\begin{array}{r} 24 \text{ r } 2 \\ 70 \overline{) 1700} \\ \underline{140} \\ 300 \\ \underline{280} \\ 20 \end{array}$$

24 full bottles + 2 cl left over

$$\begin{array}{r} 359 \\ 4 \overline{) 1436} \\ \underline{12} \\ 23 \\ \underline{20} \\ 36 \\ \underline{32} \\ 4 \end{array}$$

5

Book 4, page 20, Q.2

Read: *Mary had a length of ribbon which measured 9 m 24 cm.*

She cut 4 pieces from it, each 124 cm long.

What length of ribbon was left?

What has the diagram to do with the question? How can we solve it?

Ps come to BB to explain diagram and suggest methods of solution.

Class agrees/disagrees or offers alternative methods.

e.g Length of ribbon: 9 m 24 cm = 924 cm

Length cut off: 4 × 124 cm

$$\text{Length left: } 924 \text{ cm} - 4 \times 124 \text{ cm} = 924 \text{ cm} - 496 \text{ cm} \\ = 428 \text{ cm} = \underline{4 \text{ m } 28 \text{ cm}}$$

T writes new information on diagram as it is calculated.

Answer: 4 m 28 cm of ribbon remained.

30 min

Whole class activity

(or individual work if Ps prefer)

Diagram drawn on BB.

Reasoning, agreement, praising

Lesson Plan 21

Activity

4

Number line

- a) Let's join up each number to its approximate position on the number line. Ps come to BB to say the number, point to its place on the number line and draw joining line. Class agrees/disagrees.
- b) Let's write the next smaller and greater units, tens and hundreds for each number. Ps come to BB or dictate to T. Class points out errors.
- c) T points to each original number in turn. What is this number rounded to the nearest 10 (100)? Ps come to BB or dictate to T. Class points out errors. (Numbers could be coloured or starred.)

BB:

20 min

Notes

Whole class activity

Drawn on BB or use enlarged copy master or OHP

At a good pace

Reasoning, agreement, praising

Agree that 5 rounds up

What do you notice?

(e.g. 591 rounds down to nearest ten but rounds up to nearest 100; 408 rounds to 400 as the nearest 10 and the nearest 100)

Feedback for T

5

Book 4, page 21

Q.2 Read: a) Join up the numbers to their approximate position on the number line.

b) Write the next smaller and greater whole tens and hundreds in the boxes.

Set a time limit. Review at BB with whole class. Ps come to BB or dictate to T. Class agrees/disagrees. Mistakes discussed and corrected.

For each middle number, colour the nearest ten *red* and the nearest hundred *yellow*. Review with whole class.

Solution:

a)

b)

400	<	420	<	423	<	430	<	500
500	=	500	<	507	<	510	<	600
600	<	680	<	685	<	690	<	700
700	<	750	<	751	<	760	<	800
800	<	890	<	892	<	900	=	900
900	<	970	<	977	<	980	<	1000
1000	<	1080	<	1089	<	1090	<	1100

26 min

Individual work, monitored, helped

Drawn on BB or use enlarged copy master or OHP

Agreement, self-correction, praising

Or done orally with whole class

Ps tell what they notice.

Who had them all correct?

The person nearest them give them a pat on the back!

<div>3</div> <div>Extension</div>	<div><div>Find the mistakes</div><div>Pete is a year 4 pupil in another school. He is unsure of his units, so he has written several answers. Let's help him choose the correct one. Ps come to BB to cross out unrealistic data and say why they cannot be correct. Class agrees/disagrees. BB: a) Pete's height is: 13 m 13 mm 13 cm 130 cm b) Pete's handspan is: 160 mm 160 cm 1600 cm c) Length of Pete's step is: 46 m 46 cm 46 mm d) Pete's age is: 103 years 103 days 103 weeks 103 months What other data could be written down? Ps suggest criteria and Ps estimate their own data. (e.g. weight, how far away from school they live, length of little finger, how high (long) they can jump, etc.)</div><div>15 min</div></div>	<div>Whole class activity Written on BB or use enlarged copy master or OHP At a good pace Reasoning, agreement, praising In good humour! Extra praise for creative suggestions.</div>																																																																										

Bk4		Lesson Plan 23
Activity 4	<p>Book 4, page 23</p> <p>Q.1 Read: <i>Solve the problems in your exercise book.</i></p> <p>Deal with one part at a time. Ps read the question themselves, make a plan, do the calculation and write the answer as a sentence in <i>Ex. Bks.</i></p> <p>Review with whole class. Ps come to BB to show their solution, explaining reasoning. Who agrees? Who thinks something else? Who did it a different way? Who made a mistake? What kind of mistake? etc.</p> <p>Solutions:</p> <p>a) <i>An athlete won a high jump competition with a jump of 236 cm. A dolphin can leap out of the water and into the air to a height which is 374 cm above that reached by the high jumper.</i> <i>How high can this dolphin jump?</i> BB: A: 236 cm D: $236 \text{ cm} + 374 \text{ cm} = \underline{610 \text{ cm}}$ <i>Answer:</i> This dolphin can jump to a height of 610 cm.</p> <p>b) <i>A milk churn contained 7 litres 5 cl of milk. The farmer's wife used 2 litres 18 cl of the milk to feed some newborn lambs. How much milk was left in the churn?</i> BB: Had: 7 litres 5 cl = 705 cl Used: 2 litres 18 cl = 218 cl Had left: $705 \text{ cl} - 218 \text{ cl} = 487 \text{ cl} = \underline{4 \text{ litres } 87 \text{ cl}}$ <i>Answer:</i> There was 4 litres 87 cl of milk left in the churn.</p> <p style="text-align: right;">21 min</p>	<p>Notes</p> <p>Individual work, monitored, helped</p> <p>(Ps could show answers on scrap paper or slates in unison on command.)</p> <p>Reasoning, agreement, self-correcting, praising</p> <p>Feedback for T</p> <div style="text-align: center;"> $\begin{array}{r} 236 \\ + 374 \\ \hline 610 \\ 11 \end{array}$ </div> <div style="text-align: center;"> $\begin{array}{r} 705 \\ - 218 \\ \hline 487 \end{array}$ </div>
5	<p>Factors and products</p> <p>Study the diagrams. Note how do the factors and products change. Let's fill in the missing numbers and signs.</p> <p>Ps come to BB to fill in missing items, explaining reasoning. Class agrees/disagrees. What do you notice? (If a factor is increased by a certain number of times, the product also increases by that number of times.)</p> <p>BB:</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;"> <p>a)</p> </div> <div style="text-align: center;"> <p>b)</p> </div> </div> <p style="text-align: right;">25 min</p>	<p>Whole class activity</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Reasoning, agreement, praising</p> <p>Feedback for T</p>
6	<p>Book 4, page 23</p> <p>Q.2 Read: <i>Look at how the factors and products change. Fill in the missing numbers and signs.</i></p> <p>Review at BB with whole class. Ps come to BB or dictate to T. Class agrees/disagrees. Mistakes discussed and corrected.</p> <p>Solution:</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;"> <p>a)</p> </div> <div style="text-align: center;"> <p>b)</p> </div> </div> <p style="text-align: right;">30 min</p>	<p>Individual work, monitored, helped</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Discussion, reasoning, agreement, self-correction, praising</p>

Bk4		Lesson Plan 23
Activity 7	<p>Book 4, page 23, Q.3</p> <p>Read: <i>Look at how the dividends, divisors and quotients change. Fill in the missing numbers and signs.</i></p> <p>Ps work out the divisions first in <i>Ex. Bks.</i> Ps come to BB to fill in missing quotients. Class agrees/disagrees. Then Ps fill in missing operations. Class checks mentally.</p> <p>What do you notice? (e.g. If the dividend increases by a certain number of times, the quotient also increases by that number of times; if the divisor decreases by a certain number of times, the quotient increases by that number of times)</p> <p><i>Solution:</i></p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;"> <p>a)</p> </div> <div style="text-align: center;"> <p>b)</p> </div> </div> <p style="text-align: right;">35 min</p>	<p style="text-align: center;">Notes</p> <p>Whole class activity (or individual work if Ps wish)</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Reasoning, agreement, praising</p> <p>T repeats what Ps have noticed more clearly if necessary.</p>
8	<p>Book 4, page 23</p> <p>Q.4 Read: <i>Solve the problems in your exercise book.</i></p> <p>Give Ps a set time to read questions themselves and do the calculations in <i>Ex. Bks.</i> Check that the amounts add up to 1200!</p> <p>Review with whole class. T (or a P) reads each question and Ps show results on scrap paper or slates on command.</p> <p>Ps who responded correctly explain to those who did not. Mistakes discussed and corrected.</p> <p><i>Solutions:</i></p> <p><i>Flora has collected 1200 1 p coins and she wants to put them in two piggy banks. How many coins should she put in each piggy bank so that there is:</i></p> <ol style="list-style-type: none"> <i>twice as much money in one piggy bank as in the other?</i> BB: $1200 \div 3 = 400$; (PB₁: <u>400</u> and PB₂: <u>800</u>) <i>half as much money in one piggy bank as in the other?</i> BB: $1200 \div 3 = 400$; (PB₁: <u>400</u> and PB₂: <u>800</u>) <i>three times as much money in one piggy bank as in the other?</i> BB: $1200 \div 4 = 300$; (PB₁: <u>300</u> and PB₂: <u>900</u>) <i>1 third as much money in one piggy bank as in the other?</i> BB: $1200 \div 4 = 300$; (PB₁: <u>300</u> and PB₂: <u>900</u>) <i>five times as much money in one piggy bank as in the other?</i> BB: $1200 \div 6 = 200$; (PB₁: <u>200</u> and PB₂: <u>1000</u>) <i>1 fifth as much money in one piggy bank as in the other?</i> BB: $1200 \div 6 = 200$; (PB₁: <u>200</u> and PB₂: <u>1000</u>) <i>1 seventh as much money in one piggy bank as in the other?</i> BB: $1200 \div 8 = 150$ (PB₁: <u>150</u> and PB₂: <u>1050</u>) <p style="text-align: right;">45 min</p>	<p>Individual work, monitored, to start, then whole class review (or all done as a whole class activity, one at a time)</p> <p>Piggy Banks drawn on BB or use enlarged copy master</p> <p>Discussion, reasoning, agreement, self-correction, praising</p> <p>Extra praise if Ps realise that a) and b), c) and d), etc. are really the same question, e.g.</p> <ul style="list-style-type: none"> twice as much in PB₂ is the same as half as much in PB₁ 3 times as much in PB₂ is the same as 1 third as much in PB₁. <p>T could show solution like this:</p> <p>Let s = smaller amount</p> <p>a) PB₁: s, PB₂: $2 \times s$ $s + 2 \times s = 3 \times s = 1200$ $s = 1200 \div 3 = 400$ So PB₁: <u>400</u> and PB₂: $2 \times 400 = \underline{800}$</p> <p>c) PB₁: s, PB₂: $3 \times s$ $s + 3 \times s = 4 \times s = 1200$ $s = 1200 \div 4 = 300$ So PB₁: <u>300</u> and PB₂: $3 \times 300 = \underline{900}$</p> <p>etc.</p>
